Shaun Ankers - Chief Executive Officer

21 February 2020

CEO's Commentary

for the half year ended 31 December 2019

The Energy One Group is pleased to report another profitable period of growth for the six months to 31 December 2019. This was achieved through growth in both our Australasian (AU) business and our UK/EU business arm (Contigo Software Limited). Late in the half, we also announced our intention to acquire eZ-nergy, a French SaaS company that will complement our other products and services in the UK and Europe

The financial performance of the Group, for the half, was as follows:

- Group operating revenue was \$9.4M (total revenue and other income: \$9.7M)
- EBITDA of \$2.3M, which is 24% of total revenue.
- NPBT was \$0.767M.
- · NPAT of \$0.41M

The immediate observation is that while both revenue and EBITDA are up on the prior corresponding period, the Net Profit Before Tax is flat. As previously foreshadowed, this is a direct result of the considerable investment being made in our products to prepare for the new 5-minute settlement market, and other key initiatives (such as platform integration), in Australia.

During the half there were also two sizeable one-off items. The Company adopted the changes to the accounting standards pertaining to leases - AASB16. These changes improved EBITDA by \$0.26M while one-off acquisition costs reduced EBITDA by \$0.32M.

It is worth noting that the business is neither seasonal nor symmetrical (from one half to the next) with performance in each half being reflective of the ebb-and-flow of project work during any given 12-month period.

Given the previous corresponding period only had a partial contribution from Contigo it is helpful to view the performance on a whole-of-year basis. With this in mind, and using a Calendar-year period (Trailing Twelve Months TTM) to allow for a 12-month review:

- The Contigo (UK) business produced a TTM EBITDA of \$1.39M, up ~10% on our expectations (of EBITDA \$1.25M) originally published when we acquired the business. This result arises despite Contigo being 4% down on our original revenue forecasts. This result indicates the margin improvements we have achieved in that business to date.
- Operating (TTM) EBITDA of \$2.83M for the Australian business also improved by ~11.5% and revenue was up 16.5%. Operating EBITDA margin for the AU remains strong at 26%, assisted by the higher margins associated with recurring revenues.

Recurring revenues for the half were 73% for AU and 68% for UK Contigo (an improvement on the 65% we observed in June 19). For the Group, recurring revenue is at 71% of operating revenue. Importantly the U.K. business has not seen any deterioration in market conditions experienced by other vendors.

We note that amortisation and capitalisation are both up on the previous corresponding period. The past 12 months have been a period of considerable investment in our products. This includes developing integration connections between software platforms, enabling software modules that can be cross-sold between the Australian and UK platforms.

During the first half this platform integration enabled the UK business to win a prestigious customer (a state-based market operator) in the EU. Pleasingly the win was based on the combination of enTrader (a UK/Contigo product) and EnergyFlow (originating in Australia). The win would not have been possible without the combination of these two products and validates our strategy of providing customers with synergies arising out of an enhanced product suite.

CEO's Commentary (continued)

for the half year ended 31 December 2018

The Company maintains a policy of focussed spend on R&D/Innovation. Capitalisation for FY19 was 7% of turnover and 9% for the half.

Australian business update

Consistent with past practice, the Company has focussed on growing our AU business and responding to opportunities created by changing market structure and regulation. We are proud of our commitment to the Australasian energy market and remain the only 'large' ETRM vendor that has a permanent physical presence in Australia and attendant focus on our local customers' needs and requirements.

This commitment has been evidenced by our recent performance with the pypIT system allowing customers in the gas transmission market to respond to capacity trading and other market developments in a timely and efficient manner. These system changes have been successfully and seamlessly introduced by our customers in recent months and the Company has been able to report revenue enhancement (see FY19 annual report) directly arising out of that commitment to facilitating market changes.

In addition, we acquired new customers for our SimEnergy and NemSight products from new entrants in both the generation and retail segments. In the past 6-8 months we have also been busy installing two major projects for *EnergyOneTrading*. Of these projects, one has reached 'Go-live' already, and another is expected to do so in the second half.

Our FY19 Annual Report noted that we continue to invest heavily preparing our products for changing market regulations. The Company is well advanced in adapting our products for this new 5-minute market structure (due to commence in mid-2021). This change affects three of our main Australian products and is therefore a key development initiative. To this end we are pleased to report that progress is going well and entirely as expected. Our EnergyOffer product has already passed dry-run testing in the market and is therefore well advanced. Our other ETRM products have also been through alpha-testing and we anticipate they will be ready in plenty of time to facilitate the new market in mid-2021. We also mentioned that the FY20 year would be 'steady' as these investments were being made in advance of the market being ready to procure them. We maintain this view.

The AU pipeline of opportunities entering the second half includes another 1-2 major projects in development phase, one of which is expected to sign shortly and another that will hopefully come to fruition within the next 12 months, as well as several smaller projects, upgrades, enhancements and new sales for each of our main products.

In the new energy space, battery power, embedded generation (e.g. Photovoltaic panels) and demand-side technology are all areas of focus for us, with novel product innovations and new features for existing products being developed to assist these new technologies.

European business update

On 24 December 2019, we entered a Share Purchase Agreement to acquire eZ-nergy, a French-based software company and provider of SaaS software for physical scheduling and nomination of energy for European markets.

eZ-nergy (eZ) is a highly appealing acquisition for Energy One, particularly for its symbiotic nature with Contigo's suite of products.

CEO's Commentary (continued)

for the half year ended 31 December 2018

A summary of eZ and Contigo's synergies is presented here:

- eZ-Ops and enTrader these two products provide an opportunity for customers to manage their
 physical and contract energy positions seamlessly. The two products already share three customers in
 common
- eZ-Ops scheduling and enVoy can be integrated to take advantage of the relative strengths of each product in the respective UK and EU energy markets.
- Common technology and cultural strengths Contigo and eZ product share the same underlying technology, allowing for strong integration and operational synergies.

Both companies' products are offered as fully SaaS-deployed offerings, making them fast to deploy, cost-effective and reliable for users. eZ also offer business process outsourcing for the scheduling and nominations, a business-line we intend to develop and grow.

Financial effects of proposed eZ-nergy acquisition

During the half, we expensed \$0.3M of acquisition costs related to the intended acquisition of eZ-nergy (eZ). This transaction is not yet complete as it awaits 'foreign investment' regulatory approval by the French Government in addition to the finalisation of funding. The advice we have been given is that we do not expect any major issues relating to this application, other than timing.

We expect the transaction to be completed by the end of April 2020, potentially providing 2 months of financial contribution from the eZ-nergy business. There will also be some additional transaction costs as we move toward completion. The precise effect on the full year Group result will be forthcoming as the transaction reaches completion.

As mentioned previously, we are exploring funding options. These are progressing satisfactorily but are not yet completed. The vendors have accepted equity as part-payment (as well as cash) and we may also seek a capital raising to augment any existing debt facility. In any event, the transaction is expected to be earnings accretive once consolidated.

Summary

The Energy One group will (with eZ) have some 250 customer installations in 18 countries. We are already recognised as an established independent vendor of these ETRM systems, particularly in Australasia and Europe. Our goal in the next period (12 months) is to expand upon and further establish ourselves in Europe, growing our market share in UK/EU and be recognised as the major disrupter and challenger brand. The EU market (in particular) is dominated by 2-3 major global brands owned by private equity.

Implementing these large systems typically involves complex projects with a history of project over-runs. We expect that our excellent track record and reputation for delivering ETRM systems on time and within budget, using the agile SaaS approach, will stand us in good stead with customers looking for cost-effective solutions to replace legacy systems.

As mentioned above, we had our first 'win' in the EU, arising out a joint offering of UK and AU product range. This is a large project (in the order of €1M+ over 12-18 months of installation, with trailing income from SaaS fees) and was made possible by our extended product offerings. We also have several smaller opportunities (3-5) in development where other such product combinations are being offered. This pipeline of opportunities further emphasises our desire to make acquisitions that bring synergies and opportunities to both businesses. We expect the merger with eZ-nergy to produce considerable development opportunities in the same vein.

Our UK sales pipeline and sales remain strong and we have not experienced any material deterioration in market conditions that other vendors have experienced, arising from recent market structure and regulation changes.

CEO's Commentary (continued)

for the half year ended 31 December 2018

The improved focus on the sales process at Contigo post acquisition and the large number of firms moving from start-up to mature businesses increases the potential market for our enterprise grade risk and trading systems. In Australia and the UK we are noticing a diversity of sophisticated new entrants, who have an appetite for a best in class SaaS systems, where EOL and Contigo can improve risk compliance, reduce error and automate routine energy market tasks.

We are pleased with the continual improvement in financial performance and steady, synergistic growth in customer numbers and revenues without loosing focus on continued, reliable profitability, and ongoing investment in the development and enhancement of products.

We now hold strong positions in the physical and contract trading software for electricity and gas and have an increasing presence in Europe (shortly to become stronger via eZ-nergy). We also remain committed to building on our existing product range, reputation and customer base to make EOL a one-stop shop for energy trading software and services in our target markets here and abroad.

With this in mind, the Board remains confident in it's existing guidance of a full-year FY20 operating EBITDA result (excluding one-acquisition costs and lease accounting changes) of \$4.5M.

Directors' Report

for the half year ended 31 December 2019

Your directors present their report on Energy One Limited (the Company) and its controlled entities (the Group) for the half year ended 31 December 2019.

Directors

The names of directors who held office during or since the end of the half-year:

Andrew Bonwick – Chairman
Shaun Ankers – Chief Executive Officer
Ian Ferrier - Non-executive Director
Ottmar Weiss – Non-executive Director
Vaughan Busby – Non-executive Director

Principal activities

The principal activity of the Group during the half year was the development and supply of software services to energy companies and utilities.

There were no significant changes in the nature of the principal activities of the Group during the half year.

Review of operations

The revenue for the Group for the half year was \$9,662,323 (31/12/2018: \$6,015,335). The Earnings before depreciation, amortisation, interest, tax and acquisition costs was \$2,342,007 (31/12/2018: \$1,600,606). Before allowing for the impact of AASB16, EBITDA would have been \$2,083,523 (31/12/2018: \$1,600,606). The net profit before tax and acquisition costs amounted to \$765,783 (31/12/2018: \$764,348), net profit after tax for the Group for the half year amounted to \$407,909 (31/12/2018: \$372,048).

On 24 December 2019, Energy One Limited entered into a share purchase agreement (SPA) to acquire the share capital of eZ-Nergy SAS, a French company selling Software as a Service (SaaS) to utility customers across Europe, for €4,000,000. The amount will be paid in cash and equity. The instalments totalling €3,500,000; €2,000,000 on completion, €500,000 six months from completion, €500,000 twelve months from completion and €500,000 eighteen months from the completion date. Equity, the equivalent of €500,000 shares will be issued at \$2.27 per share on completion. The completion of the transaction and execution of the SPA is dependent upon securing funding and regulatory approvals such as French Foreign Investment Clearance.

There were no other material changes in the first half of FY20. The Group has continued to invest in people and systems to ensure that Energy One maintains its position both as a leader in information systems within the energy trading and risk management (ETRM) software market - both in Australasian and European markets.

Auditor's independence declaration

Inelew Bunios

The auditor's independence declaration for the year ended 31 December 2019 has been received and can be found after this Directors' Report.

Note 1 Summary of Significant Accounting Policies

This consolidated interim financial report for the half-year reporting period ended 31 December 2019 ("financial period") has been prepared in accordance with the requirements of the Corporations Act 2001, and Australian Accounting Standards including AASB 134: Interim Financial Reporting.

This consolidated interim financial report is intended to provide users with an update on the latest annual financial statements of Energy One Limited and its subsidiaries ('the Group'). As such, it does not contain information that represents relatively insignificant changes occurring during the half-year within the Group. It is therefore recommended that this financial report be read in conjunction with the annual financial statements of the Group for the year ended 30 June 2019, together with any public announcements made during the half-year in accordance with the continuous disclosure requirements of the Corporations Act 2001.

Other than the implementation of the new accounting policy noted below, the same accounting policies and methods of computation have been followed in this interim financial report as were applied in the most recent annual financial statements and the corresponding interim reporting period.

New and amended standards adopted by the Group

The Group has adopted all of the new, revised or amending Accounting Standards and Interpretations issued by the AASB that are relevant to its operations and effective for the current financial period. There has been no material impact of these changes on the Groups' accounting policies, other than what has been explained in the notes provided below.

AASB 16 Leases

This standard is applicable to annual reporting periods beginning on or after 1 January 2019. The standard replaces AASB 117 'Leases' and for lessees will eliminate the classifications of operating leases and finance leases. Subject to exceptions, a 'right-of-use' asset will be capitalised in the statement of financial position, measured at the present value of the unavoidable future lease payments to be made over the lease term. The exceptions relate to short-term leases of 12 months or less and leases of low-value assets (such as personal computers and small office furniture) where an accounting policy choice exists whereby either a 'right-of-use' asset is recognised or lease payments are expensed to profit or loss as incurred. A liability corresponding to the capitalised lease will also be recognised, adjusted for lease prepayments, lease incentives received, initial direct costs incurred and an estimate of any future restoration, removal or dismantling costs. Straight-line operating lease expense recognition will be replaced with a depreciation charge for the leased asset (included in operating costs) and an interest expense on the recognised lease liability (included in finance costs). In the earlier periods of the lease, the expenses associated with the lease under AASB 16 will be higher when compared to lease expenses under AASB 117. However EBITDA (Earnings Before Interest, Tax, Depreciation and Amortisation) results will be improved as the operating expense is replaced by interest expense and depreciation in profit or loss under AASB 16. For classification within the statement of cash flows, the lease payments will be separated into both a principal (financing activities) and interest (either operating or financing activities) component.

The Group has adopted this standard from 1 July 2019 using the modified retrospective approach with no adjustment to the opening balance of retained earning for the current period. Prior periods have not been restated.

There are no other standards that are not yet effective and that are expected to have a material impact on the Group in the current or future reporting periods and on foreseeable future transactions.

for the half year ended 31 December 2019

Lease liabilities - current	594,578	0
Lease liabilities - Non current	1,253,160	0

Leased assets

Leased assets are capitalised at the commencement date of the lease and comprise of the initial lease liability amount, initial direct costs incurred when entering into the lease less any incentives received. The Group have adopted AASB 16 from 1 July 2019, and have adjusted the right-of-use assets at the date of initial application by the amount of any provision for onerous lease recognised immediately before the date of application. The Group amortises the right-of-use assets on a straight line basis from the adoption date to end of the lease or break term. The Group also assess the right-of-use assets for impairment annually.

Lease liabilities

The lease liability is measured at the present value of the fixed and variable lease payments net of cash lease incentives that are not paid at the balance date. Lease payments are apportioned between the finance charges and reduction of the lease liability using the incremental borrowing rate implicit in the lease to achieve a constant rate of interest on the remaining balance of the liability. Lease payments for building exclude variable service fees for cleaning and other costs.

On transition to AASB 16 the weighted average incremental borrowing rate applied to lease liabilities recognised under AASB 16 is 3.17%.

Contigo Software Limited (UK)

On 30 November 2018, Energy One Limited acquired all the shares in Contigo Software Limited ("Contigo") for £715,000 (\$1,327,023) and financed Contigo with a £3,285,000 (\$6,096,882) shareholder loan. A further £413,131 refund of working capital in excess of £800,000 as at acquisition date was paid in February 2019.

Contigo is a leading supplier of Energy Trading and Risk management (ETRM) solutions that simplify contract and physical energy trading across Europe's complex and sophisticated energy trading landscape. Based in Solihull (UK), Contigo's products use the latest technology and a smart approach to deliver modern, flexible and easy to use software solutions for all points in the energy value chain, including generators, traders, suppliers and large consumers. Contigo has 10+ years of operation, 30+ customers, over 45 staff and a strong brand and market reputation.

The fair value of assets, liabilities and contingent liabilities are estimated by taking into consideration all available information at reporting date. Fair value adjustments at the completion of business combination accounting is retrospective, where applicable, to the period the combination occurred and may have any impact on the assets and liabilities, depreciation and amortisation reported.

for the half year ended 31 December 2019

Note 19 Segment information

The Group is managed primarily on the basis of product and service offerings and operates in one segment, being the Energy software industry, and in two geographical segments, being Australasia and UK/Europe. Management and the Board of Directors assesses the performance of the operating segment based on the accounting profit and loss.

Management and the Board of Directors have determined the Group is organised into the two geographical segments for profit and loss purposes as represented in the following table:-

	Australasia 31 Dec 2019	UK/Europe 31 Dec 2019	Australasia 31 Dec 2018	UK/Europe 31 Dec 2018
	\$	\$	\$	\$
Revenue & other income	5,623,411	4,028,766	5,252,763	745,133
Expenses	(4,170,396)	(3,139,775)	(3,882,752)	(514,537)
Earnings before interest, tax, depreciation & amortisation	1,453,016	888,991	1,370,010	230,596
Depreciation & amortisation	(695,721)	(437,943)	(446,783)	(46,616)
Earnings before interest, tax and acquisition costs	757,295	451,048	923,228	183,980

		Consolidated Group	
		31 Dec 2019	31 Dec 2018
	Note	\$	\$
Reconciliation of unallocated amounts to profit after tax:-			_
Earnings before interest, tax and acquisition costs		1,208,343	1,107,208
Interest paid		(151,659)	(30,340)
Interest received		10,145	17,439
Acquisition and related costs		(301,046)	(329,958)
			_
Profit before income tax		765,783	764,348

Segment revenue excludes interest received. Expenses exclude interest paid, depreciation, amortisation and acquisition costs.

During the financial period, the Australasian segment derived 36% (31 December 2019 : 42%) of revenue from the top three customers and the UK/Europe segment derived 25% (31 December 2019 : 38%) from the top three customers.

AASB16 was adopted in the period using the modified retrospective approach and as such comparatives are not restated. The current and comparative EBITDA measures are not directly comparable.

Note 20 Commitments

On 24 December 2019, Energy One Limited entered into a share purchase agreement (SPA) to acquire 100% share capital of eZ-Nergy SAS, a French company selling Software as a Service (SaaS) to utility customers across Europe, for €4,000,000. The amount will be paid in cash instalments totalling €3,500,000; €2,000,000 on completion, €500,000 six months from completion. €500,000 twelve months from completion and €500,000 eighteen months from the completion date. Equity, the equivalent of €500,000 shares will be issued at \$2.27 per share on completion. The execution of the SPA is dependent upon securing funding and regulatory approvals such as French Foreign Investment Clearance.

for the half year ended 31 December 2019

Note 21 Subsequent Events

No other matter or circumstance has arisen since 31 December 2019 which is not otherwise dealt with in this report, that has significantly affected or may significantly affect the operations of the Group, the results of its operations or the state of affairs of the Group.

The Company issued shares rights on 22 November 2019 under the EIP which was approved at the AGM on 26 October 2017 as follows:-

177,008 Shares rights to the senior executive staff vesting on performance (KPI based) and service conditions between 31 August 2020 and 31 August 2022 issued at an average of \$2.02

The Company issued 13,600 shares at \$2.50 on 1 November 2019 to employees under the EIP which was approved at the AGM 26 October 2017.

Directors' Declaration

In the director's opinion:

- (a) the financial statements and notes set out on 10 to 21 are in accordance with the Corporations Act 2001, including:
 - (i) complying with Accounting Standard AASB 134: Interim Financial Reporting and the Corporations Regulations 2001;
 - (ii) giving a true and fair view of the consolidated entity's financial position as at 31 December 2019 and of its performance for the half year ended on that date; and
- (b) there are reasonable grounds to believe that the Company will be able to pay its debts as and when they become due and payable.

Signed in accordance with a resolution of the Directors.

Report on the Half-Year Financial Report

Conclusion

We have reviewed the half-year financial report of Energy One Limited (the Company), and its subsidiaries (the Group), which comprises the consolidated statement of financial position as at 31 December 2019, the consolidated statement of profit or loss and other comprehensive income, the consolidated statement of changes in equity and the consolidated statement of cash flows for the half-year then ended, and notes comprising a statement of accounting policies and other explanatory information, and the directors' declaration.

Based on our review, which is not an audit, we have not become aware of any matter that makes us believe that the half-year financial report of the Group is not in accordance with the *Corporations Act* 2001 including:

- (i) Giving a true and fair view of the Group's financial position as at 31 December 2019 and of its financial performance for the half-year ended on that date; and
- (ii) Complying with Accounting Standard AASB 134 Interim Financial Reporting and the Corporations Regulations 2001.

Directors' responsibility for the Half-Year Financial Report

The directors of the company are responsible for the preparation of the half-year financial report that gives a true and fair view in accordance with Australian Accounting Standards and the *Corporations Act 2001* and for such internal control as the directors determine is necessary to enable the preparation of the half-year financial report that is free from material misstatement, whether due to fraud or error.

Auditor's responsibility

Our responsibility is to express a conclusion on the half-year financial report based on our review. We conducted our review in accordance with Auditing Standard on Review Engagements ASRE 2410 *Review of a Financial Report Performed by the Independent Auditor of the Entity*, in order to state whether, on the basis of the procedures described, we have become aware of any matter that makes us believe that the half-year financial report is not in accordance with the *Corporations Act 2001* including giving a true and fair view of the Group's financial position as at 31 December 2019 and its financial performance for the half-year ended on that date and complying with Accounting Standard AASB 134 *Interim Financial Reporting* and the *Corporations Regulations 2001*. As the auditor of the Group, ASRE 2410 requires that we comply with the ethical requirements relevant to the audit of the annual financial report.

A review of a half-year financial report consists of making enquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Australian Auditing Standards and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Independence

In conducting our review, we have complied with the independence requirements of the *Corporations Act 2001*. We confirm that the independence declaration required by the *Corporations Act 2001*, which has been given to the directors of the Group, would be in the same terms if given to the directors as at the time of this auditor's review report.
