

3 August 2020

Viva Energy market update

Viva Energy (the **Company**) notes the Victorian State Government's recent announcements regarding stage 4 restrictions, Melbourne metropolitan curfew and stage 3 restrictions for regional Victoria, in response to the COVID-19 pandemic.

The Company remains focused on maintaining safe and reliable supply of liquid fuels to support our customers and the Victorian economy through this challenging environment. As always, the health and safety of our employees, contractors and the many communities in which we operate is our top priority.

Approximately one quarter of the Company's petrol and diesel sales volumes are generated in Victoria, and predominantly through the Company's Retail sub-segment which includes sales through the Alliance, Liberty, Shell and Independently branded service stations, and Wholesale channels.

In aggregate, the Company's total Victorian sales of petrol and diesel for July 2020 are in line with the same period last year driven by a strong wholesale and agricultural performance. Victorian petrol sales for July 2020, however, are approximately 25% lower than the same period last year driven by sales declines in the retail network as a result of restrictions in place across the state. By comparison, petrol sales across the rest of country are recovering and are approximately 11% lower for July 2020 than compared to the same period last year.

The Company is closely monitoring the situation and assessing any further potential impacts on Victorian fuel sales and refining production as a result of these additional restrictions.
