ASX RELEASE

17 August 2020

MONADELPHOUS CONTRACTS UPDATE

Engineering company Monadelphous Group Limited (ASX: MND) (“Monadelphous” or “the Company”) today announced it has secured construction and maintenance contracts in the resources and energy sectors with a combined value of approximately \$100 million.

Under its recently awarded WAIO Site Engineering Panel Framework Agreement with BHP, the Company has been awarded the following contracts in the Pilbara region of Western Australia:

- A contract for the supply and installation of the Jimblebar Transfer Station Project, with work expected to be completed by December 2020; and
- A contract for the refurbishment of Car Dumper 3 at Nelson Point, Port Hedland, with work expected to be undertaken during the second half of the 2020 calendar year.

Further, Monadelphous has also been awarded a contract under its WAIO Asset Panel Framework Agreement with BHP for the Port Availability Improvement Project to provide multidisciplinary brownfield modification works to conveyors and transfer chutes across the Nelson Point and Finucane Island facilities. The work is expected to be completed in the second half of the 2021 calendar year.

In Western Australia, the Company has secured a three-year extension to an existing contract with Custom Fleet to manage the servicing of the Western Power light vehicle fleet in metro and regional areas.

In Chile, Monadelphous has secured a number of new contracts through its maintenance and construction services business, Buildtek, which it acquired late last year. This includes two contracts with Minera Escondida BHP, for the construction and assembly of a communications tower and associated infrastructure at the Escondida copper mine, as well as an upgrade to the conveyor system feeding the Filter Plant Warehouse at Coloso Port, both in the Antofagasta region. The Company has also been awarded a contract for the removal and replacement of five liquefied natural gas discharge arms at GNL Quintero’s operations in Valparaiso.
