CHAIRMAN'S LETTER

Friday, 25 September 2020

Dear Shareholder,

On behalf of the board of Kina Securities Limited (**Kina** or **Company**), it is my pleasure to invite you to participate in Kina's 1 for 2 offer of new shares in Kina ("**New Shares**") at an offer price of K1.97 ("**Offer Price**") per New Share to raise A\$10,500,763 (before costs), equivalent to K25,895,840¹ ("**Offer**").

The proceeds of the Offer (and the Offshore Offer (as described below)) will be used to strengthen Kina's balance sheet, enable Kina to further pursue growth opportunities in the SME sector and fund additional strategic projects which will enhance Kina's digital leadership in PNG.

Details of the Offer

The Offer is an offer of New Shares to existing eligible PNG retail shareholders (**Eligible Shareholders**) and does not extend to those shareholders who participated in the Institutional Entitlement Offer (as described below). Eligible Shareholders are entitled to subscribe for 1 New Share at the Offer Price for every 2 existing ordinary shares in Kina ("**Existing Shares**") held at 7.00pm (Port Moresby time) on Monday, 14 September 2020 ("**Record Date**") ("**Entitlement**"). The Offer Price of K1.97 per New Share is the PNG Kina equivalent of the offer price of A\$0.80 under the Offshore Offer. The Offer is not underwritten.

Concurrent with the Offer, Kina announced an offer of New Shares to eligible Shareholders outside of PNG ("**Entitlement Offer**") to raise A\$69,898,067 (K172,375,012) (before costs), comprising an accelerated institutional entitlement offer ("**Institutional Entitlement Offer**") and retail entitlement offer ("**Retail Entitlement Offer**"), and which is being made on substantially the same terms as the Offer. Kina also announced a placement of New Shares to new and existing institutional investors ("**Placement**") and together with Entitlement Offer, the "**Offshore Offer**") to raise A\$10,468,657 (K25,816,663). The Offshore Offer is fully underwritten and managed by Morgans Corporate Limited.

The Institutional Entitlement Offer and the Placement were successfully completed on Monday, 14 September 2020. The Retail Entitlement Offer opened at 9.00am (AEST) on Thursday, 17 September 2020 and closes at 5.00pm (AEST) on Thursday, 1 October 2020.

The Offer is non-renounceable and therefore your Entitlement will not be tradeable on the PNGX or any other exchange, and it is not otherwise transferable. This means that Eligible Shareholders (as defined in section 8 of this Prospectus) who do not take up their Entitlements will not receive any payment or value for those Entitlements and their proportionate interest in Kina will be diluted.

Under the Offer, Eligible Shareholders that take up their full Entitlement may also apply for additional New Shares in excess of their Entitlement, at the Offer Price ("**Oversubscription Facility**"). Additional New Shares will only be available under the Oversubscription Facility to the extent that there are Entitlements under the Offer that are not taken up by Eligible Shareholders or that would otherwise have been offered to Ineligible Shareholders if they were eligible to participate in the Offer. Applications under the Oversubscription Facility will be subject to scale back if Eligible Shareholders apply for more additional New Shares than available under the Oversubscription Facility. Directors of Kina are not entitled to participate in the Oversubscription Facility.

¹ Based on exchange rate as per page 3, based on Bank of Papua New Guinea Mid-Rate.

If you have any doubt about whether you should participate in the Offer, you should seek professional financial advice from your stockbroker, solicitor, accountant or other professional adviser before making any investment decision.

If you have questions on how to complete the Entitlement and Acceptance Form or how to take up your Entitlement or have lost your Entitlement and Acceptance Form and would like a replacement form, please visit www.kinabank.com.pg or call the Kina Shareholder Information Line on +61 1800 550 560 (outside Australia) or +675 321 6377 (PNG) between 8.30am and 5.30pm (Port Moresby time) Monday to Friday during the Offer Period.

2. FURTHER DETAILS OF THE OFFER

2.1 OFFER OF SECURITIES

The Company is offering Eligible Shareholders the opportunity to subscribe for New Shares under the Offer as described in section 1.2.

If you have received this Prospectus and there is an accompanying personalised Entitlement and Acceptance Form showing your name and entitlement to New Shares, then you are considered an Eligible Shareholder.

2.2 NON-RENOUCEABLE

Each Eligible Shareholder's Entitlement is non-renounceable and will not be tradeable on PNGX, ASX or otherwise transferable. Eligible Shareholders who do not take up their Entitlements in full will not receive any value in respect of the Entitlements not taken up.

2.3 NO UNDERWRITING

The Offer is not underwritten. Therefore, to the extent that there is less than full take-up of Eligible Shareholders' Entitlements, the New Shares not subscribed for will not be issued.

2.4 DETERMINATION OF ENTITLEMENTS

The Offer is being made to Shareholders who are Eligible Shareholders.

Each Eligible Shareholder's Entitlement is shown on their personalised Entitlement and Acceptance Form. Entitlements were calculated on the basis of registered holdings of Shares on the Record Date. Where fractions arose in the calculation of Entitlements, they were rounded up to the nearest whole number of New Shares.

2.5 ISSUE, QUOTATION AND TRADING OF SECURITIES

New Shares will be issued to successful applicants in uncertificated form. Applicants who are existing Shareholders will have their New Shares added to their existing holding under their existing Shareholder Reference Number ("**SRN**") and updated Issuer Sponsored Statements will be mailed to their address as shown in the Company's share register. The Company will, within 3 business days after the date of this Prospectus, apply for quotation of the New Shares on PNGX and ASX. While the Company is not aware of any reason why quotation would be denied, there is no assurance that the application will be granted. If quotation is not granted, New Shares will not be issued and Application Monies will be refunded to applicants without interest.

PROSPECTUS

*for an offer of ordinary shares to existing retail shareholders
in Papua New Guinea*

As noted above, Issuer Sponsored Statements for New Shares will be despatched following the issue of the New Shares. It is the responsibility of each applicant to confirm their holding before trading in New Shares. Any applicant who sells New Shares before receiving confirmation of their holding in the form of their holding statement will do so at their own risk. The Company disclaims all liability, whether in negligence or otherwise, to any person who trades in New Shares before receiving their holding statement.

2.6 PNGX WAIVER

The Company received a waiver from the PNGX from PNGX Listing Rule 7.1 to permit the Company, to the extent necessary, to undertake the Offshore Offer and the Offer without seeking prior Shareholder approval. Under the PNGX Listing Rules, the Offer and Entitlement Offer did not come within the definition of a 'pro rata issue' as neither the Entitlement Offer, nor the Offer, will be made to all holders of securities with a registered address in Papua New Guinea. The effect of the PNGX granting the waiver to the Company was to enable the Company to offer the Shares under the Offshore Offer and the Offer to Shareholders without breaching PNGX Listing Rule 7.1 by exceeding its existing 15% placement capacity.

2.7 UPDATE ON OFFSHORE OFFER

As at the date of this Prospectus, under the Institutional Entitlement Offer, the Company has already raised A\$34,573,459 (K85,261,305) (before costs) from eligible institutional Shareholders as part of the Institutional Entitlement Offer. New Shares were issued under the Institutional Entitlement Offer on Monday, 21 September 2020.

2.9 RIGHTS AND RESTRICTIONS ATTACHED TO NEW SHARES

The New Shares will be issued fully paid and will rank equally with Existing Shares.

The rights and restrictions attached to Shares are set out in the Constitution and the Companies Act and are subject to the PNGX Listing Rules, ASX Listing Rules and the general law.

PROSPECTUS

*for an offer of ordinary shares to existing retail shareholders
in Papua New Guinea*

(a) Voting at general meetings

At a general meeting, every Shareholder present in person or by proxy, representative or attorney has:

- in voting by voice or on a show of hands:
 - (i) subject to paragraphs (ii) and (iii), each shareholder present has one vote;
 - (ii) where a shareholder has appointed more than one person as representative, proxy or attorney for the shareholder, none of the representatives, proxies or attorneys is entitled to vote;
 - (iii) where a person is entitled to vote because of paragraph (i) in more than one capacity, that person is entitled to only one vote.
- on a poll, each shareholder present:
 - (iv) has one vote for each fully paid share held; and
 - (v) for each other share held, has a vote in respect of the share which carries the same proportionate value as the proportion of the amount paid up on the total issue price of that share at the time the poll is taken bears to the total issue price of the share.

In general terms, a poll may be demanded by at least 5 shareholders entitled to vote at the meeting, or by a shareholder or shareholders representing at least 10% of the total voting rights of all shareholders at the meeting.

If votes are equal on a proposed resolution, the Chairman can exercise a casting vote on a show of hands or on a poll (except when only two directors are present or expect when only two directors are competent to vote on the question then at issue).

(b) Dividends

Subject to the Companies Act, the Board may, from time to time pay a dividend on Shares. Such dividends can be in the form of cash and/or other property, and are distributed among Shareholders equally, subject to their respective rights and interests.

(c) Issue of further shares

Subject to the PNGX Listing Rules, the Board may issue, grant options in respect of, or otherwise dispose of further Shares on terms and conditions and with such rights and privileges as the Board sees fit. Any such shares, options or other securities may be issued with such preferred, deferred or other special rights, obligations or restrictions, whether in regard to dividends, voting, return of share capital, payment of calls or otherwise, as the board may determine and on any terms that the board considers appropriate.

(d) Transfers of Shares

Shares are transferable by an instrument in writing which is in a form approved by ASX, PNGX or the Board or is in any other usual or common form. However, the Board can refuse or delay registration of any transfer of Shares where the ASX Listing Rules, PNGX Listing Rules or other applicable laws and regulations permit and must do so if

PROSPECTUS

*for an offer of ordinary shares to existing retail shareholders
in Papua New Guinea*

the transfer would be in contravention of the ASX Listing Rules, PNGX Listing Rules or other applicable laws and regulations.

(e) Shareholder proposals

Where a Shareholder gives notice to the Board of a matter proposed to be raised for discussion or resolution at the next meeting of Shareholders and the notice is received by the Board not less than 7 days before the last day on which the notice of meeting must be given to Shareholders, the Board must give notice of the proposal to all Shareholders entitled to receive that notice of meeting. The Company will bear the expense of giving such notice except where the Shareholder gives the notice less than 1 month before the last day on which the notice of meeting must be given, in which case the Shareholder bears the expense.

(f) Liquidation

If the Company is in liquidation and the assets available for distribution among the Shareholders (in that capacity) are insufficient to repay all the paid up capital, those assets will be distributed so that, to the greatest possible extent, the amount distributed to a Shareholder in respect of each Share gives effect to any special or preferential rights attached to any particular class of shares and is proportional to the amount paid up (or which at the commencement of the liquidation ought to have been paid up) on that Share compared with the total paid up capital of the Company.

3. ACTIONS REQUIRED BY ELIGIBLE SHAREHOLDERS

3.1 CHOICES AVAILABLE TO YOU

If you are an Eligible Shareholder, you can choose to:

- take up your Entitlement in full, and if you do so, you may apply for additional New Shares under the Oversubscription Facility – in other words, you subscribe for all of that number of New Shares to which you are entitled as shown on your personalised Entitlement and Acceptance Form, and you may apply for additional New Shares in excess of your Entitlement as shown on your personalised Entitlement and Acceptance Form (see section 3.3);
- take up your Entitlement in part – in other words, you subscribe for some (but not all) of that number of New Shares to which you are entitled as shown on your personalised Entitlement and Acceptance Form (see section 3.3). The part not taken up will lapse and the New Shares not subscribed for may be acquired by Eligible Shareholders under the Oversubscription Facility; or
- not take up any of your Entitlement, in which case you should do nothing. If you do not take up your Entitlement, your Entitlement will lapse and you will not receive any value or payment for your Entitlement. The New Shares not subscribed for may be acquired by Eligible Shareholders under the Oversubscription Facility. Your Entitlement is non-renounceable, which means it is non-transferrable and cannot be sold, traded on PNGX or any other exchange, nor can it be privately transferred. If you do not take up your Entitlement, your percentage holding in Kina will be reduced as a result of the Offer.

If you have received this Prospectus and there is an accompanying personalised Entitlement and Acceptance Form showing your name and entitlement to New Shares, then you are considered an Eligible Shareholder.

PROSPECTUS

*for an offer of ordinary shares to existing retail shareholders
in Papua New Guinea*

Eligible Shareholders are under no obligation to take up all or any of their Entitlement. However, Eligible Shareholders who do not take up their full Entitlement will have their shareholding interest in the Company diluted (i.e. their percentage holding in Kina will be reduced) compared to Eligible Shareholders who do take up their full Entitlement. The New Shares representing their Entitlement (or the part of their Entitlement not taken up) may be acquired by Eligible Shareholders under the Oversubscription Facility. Shareholders who are not Eligible Shareholders will be automatically diluted as a result of the Offer compared to Eligible Shareholders who take up their Entitlement in full or in part.

3.2 OVERSUBSCRIPTION FACILITY

Any New Shares referable to Entitlements not taken up by 5.00pm (Port Moresby time) on Friday, 6 November 2020 may be made available to those Eligible Shareholders who took up their full Entitlement and applied for additional New Shares under the Oversubscription Facility. If you apply for additional New Shares under the Oversubscription Facility, and if your application is successful (in whole or in part), your additional New Shares will be issued to you at the same time and on the same terms that other New Shares are issued under the Offer. The decision on the number of additional New Shares to be issued to you will be final.

Additional New Shares will only be allocated to Eligible Shareholders if available, and subject to the Companies Act, PNGX Listing Rules and other applicable laws and regulations. If you apply for additional New Shares, there is no guarantee that you will be allocated any additional New Shares. If Eligible Shareholders apply for more additional New Shares than available under the Oversubscription Facility, Kina will scale back applications for additional New Shares in its absolute discretion having regard to the pro-rata Entitlement of Eligible Shareholders who apply for additional New Shares.

3.3 HOW TO TAKE UP YOUR ENTITLEMENT IN FULL, IN PART AND PARTICIPATE IN THE OVERSUBSCRIPTION FACILITY, OR IN PART

If you are an Eligible Shareholder and wish to take up your Entitlement in full, in part and participate in the Oversubscription Facility, or in part, you should do the following.

Step 1 Complete the personalised Entitlement and Acceptance Form accompanying this Prospectus, also available for download online at www.kinabank.com.pg in accordance with the instructions on the form.

Step 2 Decide how you wish to pay the Application Monies (being K1.97 for each New Share subscribed for, and each additional New Share applied for under the Oversubscription Facility, if applicable). If you take up all of your Entitlement, any Application Monies received for more than your full Entitlement of New Shares will be treated as applying for as many additional New Shares as it will pay for in full.

You may only pay by bank cheque in accordance with the instructions on the personalised Entitlement and Acceptance Form.

Step 3 Return the completed and signed Entitlement and Acceptance Form, together with payment for the full Application Monies, in accordance with the instructions on the Entitlement and Acceptance Form.

Your completed form, together with your payment, must be received by the Share Registry no later than 5.00pm (Port Moresby time) on Friday, 6 November 2020.

PROSPECTUS

3.4 DEALINGS WITH APPLICATION MONIES

Application Monies received from Eligible Shareholders will be held in bank accounts established and kept by the Company or the Share Registry solely for the purpose of holding the Application Monies.

The Company also reserves the right to withdraw or cancel the Offer at any time prior to the issue of New Shares. If it does so, all Application Monies will be refunded to applicants without interest.

4. RISK FACTORS

Before applying for New Shares, you should closely read all of this Prospectus and consider whether the New Shares are a suitable investment for you. You should also closely read all of the Half-Year Report, Annual Report and Investor Presentation.

Eligible Retail Shareholders should be aware that an investment in Kina, including taking up your Entitlement, involves risks. The key risks identified by Kina are set out in the "Key Corporate and Transaction Risks" section of the Investor Presentation in Schedule 1 of this Prospectus, but these are not an exhaustive list of the risks associated with an investment in New Shares.

Participating in the Offer and investing in New Shares involves a degree of risk. Some of these risks are specific to an investment in the Company, while others relate generally to any investment in the equity markets. The occurrence of these risks could have an adverse impact on the Company's business, its results or financial condition and performance, or its Share price. In particular, investors should note that the unprecedented uncertainties and risks created by the COVID-19 pandemic could materially change Kina's risk profile at any point after the date of this Prospectus and adversely impact the financial position and prospects of the Group in the future.

5. PNGX ANNOUNCEMENTS

Copies of documents lodged by the Company in connection with its reporting and disclosure obligations may be obtained from, or inspected at, the Company's office. The Company will provide free of charge to any person who requests it during the period of the Offer a copy of:

7. PNG TAX IMPLICATIONS

7.1 INTRODUCTION

The comments below provide a general summary of PNG income tax, goods and services tax ("**GST**") and stamp duty implications of the Offer for Eligible Shareholders that are PNG residents and hold New Shares on capital account. In addition, the summary below applies only to Eligible Shareholders who are PNG tax resident individuals, companies or complying superannuation funds. The summary does not apply to Eligible Shareholders who:

- hold Shares as revenue assets or trading stock (which will generally be the case if you are a bank, insurance company or carry on a business of share trading);
- may be subject to special tax rules, such as insurance companies, partnerships, tax exempt taxpayers, trusts (except where expressly stated), or temporary residents.

The summary does not take account of the individual circumstances of particular Eligible Shareholders and does not constitute tax advice. It does not purport to be a complete analysis of the potential tax consequences of the Entitlement Offer and is intended as a general summary of PNG tax implications. Eligible Shareholders should seek professional advice on the taxation implications of acquiring, owning and disposing of Shares, taking into account their specific circumstances.

Tax laws are complex and subject to ongoing change. The comments below are based on the PNG tax law as it applies as at 9.00am (AEST) on Friday, 25 September 2020. Other than as expressly discussed or specified, the comments do not take into account or anticipate changes in PNG tax law or future judicial interpretations of law after this time. If there is a change, including a change having retrospective effect, the income tax, stamp duty and GST consequences of the Entitlement Offer should be reconsidered in light of the changes. The summary provided below does not take into account tax legislation of any country other than PNG.

This summary is general in nature and is not intended to be an authoritative or complete statement of the applicable law. The Company and its advisors disclaim all liability to any Eligible Shareholders or other party for all costs, loss, damage and liability that Eligible Shareholders or other party may suffer or incur arising from, relating to or in any way connected with the contents of this summary or the provision of this summary to the Eligible Shareholder or other party or the reliance on this summary by the Shareholder or other party.

7.2 GRANTING OF AN ENTITLEMENT

On the grant of an Entitlement you should not derive any assessable income for PNG income tax. The grant of the Entitlement should not be regarded as a dividend.

7.3 IF YOU TAKE UP YOUR ENTITLEMENT

Upon taking up your Entitlement in full or in part you should not derive any assessable income for PNG income tax purposes. The amount paid to acquire your New Shares will not be deductible for PNG income tax purposes because it is of a capital nature.

As there is no PNG capital gains tax, the amount you pay to acquire the New Shares will not be relevant for PNG income tax purposes (provided that you have not acquired the New Shares for the purpose of profit-making by sale or as part of a profit-making undertaking or scheme).

PROSPECTUS

*for an offer of ordinary shares to existing retail shareholders
in Papua New Guinea*

7.4 DISPOSAL OF NEW SHARES

If you dispose of your New Shares you will only derive assessable income for PNG income tax purposes if you acquired the New Shares for the purpose of profit-making by sale or as part of a profit-making undertaking or scheme. There is no capital gains tax as such in PNG.

7.5 STAMP DUTY

No stamp duty will be payable on the grant or exercise of an Entitlement.

Transfers of any marketable securities listed on PNGX are exempt from stamp duty in PNG where effected through a licensed broker. New Shares are expected to be listed on PNGX and ASX.

Apart from the exemption stated above, transfers of New Shares will be liable to stamp duty at the rate of 1% of the consideration for or value of the securities, whichever is greater.

7.6 GOODS AND SERVICES TAX

PNG goods and services tax will not apply to any Application Monies you pay in consideration for New Shares issued on exercise of your Entitlement.

7.7 TAXATION IN RESPECT OF DIVIDENDS ON NEW SHARES

Any future dividends or other distributions made in respect of New Shares will be subject to the same income taxation treatment as dividends or other distributions made on Existing Shares held in the same circumstances.

Executive Summary

KSL is conducting an equity raising to enhance its capital base and regulatory ratios following the simplification of its corporate legal structure and to provide for continued strong underlying organic growth. This will provide capacity for anticipated loan growth in the medium term, and to compete more effectively in the targeted larger SME, Commercial and Corporate segments of the PNG market.

In August, 2020 Kina completed a planned amalgamation of the KSL Group operations delivering the following outcomes:-

- Kina Securities Limited is now the parent company and the holder of the Banking License – an Authorised Financial Institution.
- A structure that allowed an enhanced Capital Management Plan to be implemented.
- A more streamlined structure from an operations and management perspective.
- Eliminated the need for inter-company loans of PGK 175 million and related compliance with the BPNG Prudential Standards on both the Capital Adequacy Ratio (CAR) and the Single Borrower Limit (SBL).
- Eliminated the exemption to exclude the deduction of Goodwill of PGK 92 million from the calculation of Tier 1 Capital resulting in a reduction of both the CAR and SBL albeit still within the Prudential Guidelines but potentially restricting medium term loan growth opportunities.

With the exception of the strategic investment by ADB of USD 10 million in December, 2019, KSL has not undertaken a capital raise since the IPO in 2015. Over the past ten consecutive half years Kina Bank has continued to pay dividends at or above 60% of NPAT maintaining an appropriate balance between the dividend payout ratio and organic growth.

The ANZ acquisition was completed without a capital raising and despite this, KSL has increased its total asset base from PGK 986 million in 2015 to PGK 3,025 million and increased lending assets from PGK 374 million to PGK 1,420 million. Post the ANZ acquisition, Kina has increased its market share from 4% in 2015 to 12% and has an aspiration to growth this to 20-25% over the next 3-5 years. While organic loan book growth has been achieved an average of 20% per annum, the existing capital base, CAR and SBL will potentially inhibit the Bank's ability to achieve more immediate scale in market share.

Kina has experienced continued high growth in foreign exchange earnings. Strong revenue growth is important for the bank to continue to invest and reduce its cost to income ratio ensuring it is well placed for any future potential and strategically aligned inorganic opportunities.

Executive Summary cont.

Further important considerations:-

Single Borrower Limit: A key constraint of the current SBL of PGK 50 million is Kina's ability to service larger SME's Commercial and Corporate customers for 'whole of wallet' business. These include many national and multi-national organisations. A higher capital base will enable Kina to compete more effectively in the segments of the market and in accordance with the Bank's 2025 Strategic Plan.

Capital Adequacy: Post amalgamation the CAR is approximately 14%. While this is an acceptable level above the Prudential limit, it does not provide Kina with a strong platform for growth. The additional capital will increase the CAR to approximately 21% providing significant capacity for expansion and provides support for targeted and non sovereign SME, Commercial and Corporate businesses.

Targeted SME, Commercial and Corporates: The ability to acquire these larger businesses as customers enables a more holistic banking relationship with cross sell of loan, FX, and transactional products and services for a main bank relationship positioning. These larger market opportunities are also generally better credit risk rated clients. Growth from these sectors of the market are at the centre of the Bank's 2025 strategic plan and market share aspirations.

Targeted Deposits: Multi-national companies (MNC) and Super Funds have a structured process for placing deposits with financial institutions. Strength of balance sheet and capital position are a contributing factor when assessing deposit limits. A significant value of market liquidity is held by these organisations.

Other Intangible Benefits: There are also several intangible benefits from being a well capitalised bank which include providing general customer confidence in PNG and offshore through correspondent banking arrangements; greater confidence to regulators, vendors and strategic business partners. A higher market capitalisation also provides inclusion in the larger indices on ASX enhancing the liquidity of the KSL stock and increasing market awareness and profile.

Strategic Rationale

- As reported in the recent H2FY2020 results, Kina Bank continues to see significant additional growth opportunities, both organic and inorganic, across its new and existing customer base both in terms of additional services from existing clients and market share gains from competitors. This capital issue will put Kina Bank in a stronger position to take advantage of such opportunities on the back of a stronger capital base, particularly the Capital Adequacy and Single Borrower Limits.
- Also informed to the market in May 2020, Kina Bank has undertaken an amalgamation and simplification of its corporate structure which was approved by the IPA on 1 September 2020, effective July 2020. This capital raise is intended to enhance the capital ratios and enable the bank to retain its competitiveness.
- Kina Bank will also apply a portion of the raise to its Strategic projects that will enhance the company's leadership position in the banking industry. These capabilities are revenue accretive from day of implementation.

2025 Strategic Plan – Visual

The 2025 Strategy describes how Kina Bank will grow market share and financial results, build resilience and achieve competitive advantage from 2020 to 2025. It provides target state business models (including optionality), implementation phasing, and an execution framework.

The 2025 Strategy defines the opportunity, over 5 years, to:

- grow core banking market share and financial results;
- commercialise innovative in-market offers (adjacencies) to provide more value to existing customers and access larger financial value pools;
- explore and experiment with strategic opportunity and strategic risk, to build resilience and future value pools; and
- grow organisational capabilities as strategic assets, to enable revenue agility and resilience.

Key Corporate and Transaction Risks

General economic and share market risk

The performance of Kina, in common with other companies, is subject to general economic conditions, movements in interest and inflation rates, and currency exchange rates which may have an adverse effect on Kina's activities, as well as its ability to fund those activities. There can be no assurance that a weakening in the PNG economy or that a weakening in the economic and business conditions of other countries, will not have an adverse effect on Kina's financial condition and on the results of its operations. Adverse changes to the economic and business conditions in PNG and other economies such as Australia, New Zealand, China, India, Japan, Malaysia, members of the European Union and the United States could also negatively impact Kina's customers and investments.

Foreign exchange transactions are a material component of Kina's business. Revenue generation and profitability in respect of foreign exchange transactions are dependent on volumes and margins, which are subject to volatility and regulatory intervention by BPNG. There is a risk that continued volatility, and further changes in applicable regulations or policy, may adversely impact future Kina revenue and profitability.

There are also risks associated with any investment in a company listed on the ASX. The value of shares may rise above or below the current share price, depending on the operational and financial performance of Kina and a number of external factors over which none of Kina, its Directors or its employees have any control. Those external factors include economic conditions in the Papua New Guinea and other overseas jurisdictions which may impact equity capital markets; changing investor sentiment in Australia, Papua New Guinea and other overseas share markets; changes in fiscal, monetary, regulatory or other government policies and developments and general conditions in the markets in which Kina proposes to operate and which may impact on the future value and pricing of Kina shares.

COVID-19

The ongoing COVID-19 pandemic has had a significant impact on the global and PNG economy and the ability of businesses, individuals, and governments to operate. There continues to be considerable uncertainty as to the duration and further impact of COVID-19, including (but not limited to) in relation to government, regulatory or health authority actions, work stoppages, lockdowns, quarantines, and travel restrictions. A suspension of operations, or quarantining of Kina employees, may affect Kina's overall operations and operating results. These factors are beyond Kina's control and could have an adverse effect on the overall business sentiment and environment, causing material uncertainties in the regions where Kina conducts its business, cause Kina's business to suffer in ways that cannot be predicted with any reasonable certainty, and which may materially adversely impact Kina's business, financial condition and results of operations.

Risk of major systematic shock to PNG or other financial system

There is a risk that major systemic shock, similar to that experienced during the global financial crisis could occur causing an adverse impact on the financial system in PNG.

The financial services industry and capital markets have been, and may continue to be, adversely affected by market volatility and uncertainty as to the outlook of global economic conditions. Any such market and economic disruptions could have an adverse effect on financial institutions such as Kina because consumer and business confidence may decrease.

Competition

The financial services industry is highly competitive and, as a result, Kina faces competition in various aspects of its business. Kina's key competitors include Westpac and BSP, who compete with Kina's provision of core banking services in PNG. If Kina is unable to compete effectively in its various businesses and markets, its market share may decline. Increased competition may also divert business to Kina's competitors or create pressure to lower margins. Kina is also dependent on its ability to offer products and services that match evolving customer preferences, habits and sentiment. If Kina is not successful in developing or introducing new products and services or responding or adapting to changes in customer preferences, habits and sentiment, Kina may lose its customers to competitors. This could adversely affect Kina's businesses, financial performance, financial condition and prospects.

Key Corporate and Transaction Risks

Compliance with laws, regulation and regulatory policy

A number of laws and regulations apply to the businesses carried on by entities within the Group. Entities within the Group are supervised by one or more regulatory authorities which have broad administrative powers over the businesses operated by the relevant entity. Such regulatory authorities include the Securities Commission, Registrar of Companies and, to the extent businesses are regulated under the Banks and Financial Institutions Act 2000 (PNG) or Securities Act 1997 (PNG).

Regulatory and other governmental agencies (including courts, revenue and tax authorities) frequently review banking and tax laws, regulations, codes of practice and policies. Changes to laws, regulations, codes of practice or policies, including changes in interpretation or implementation of laws, regulations, codes of practices or policies could affect Kina in substantial and unpredictable ways. Additionally, any such changes may adversely affect Kina's business, operations and financial condition. The changes may lead Kina to, among other things, change its business mix, incur additional costs as a result of increased management attention, hold significant levels of additional liquid assets.

Credit Risk and decline in assets market

Credit risk is a significant risk and arises primarily from Kina's lending and investment activities. The risk arises from the likelihood that some customers and counterparties will be unable to honour their obligations to Kina, including the repayment of loans and interest. Kina's banking operations hold assessed provisions for its credit exposures. If economic conditions deteriorate, some customers and / or counterparties could experience higher levels of financial stress and Kina may experience a significant increase in defaults and writeoffs, and be required to increase its provisioning.

Deterioration in economic conditions, inadequate provisioning or significant breakdown in credit disciplines, could diminish available capital and could adversely affect Kina's businesses, financial performance, liquidity, capital resources and financial condition.

There is a risk that the economic consequences of COVID 19 could become more severe and far reaching across the economy, leading to a more widespread downturn in business and economic activity. This would likely result in a significant loss of revenue for many businesses across a wide range of industry sectors, in turn potentially leading to further increased unemployment and customer defaults. Kina's performance is influenced by asset markets in PNG and other jurisdictions, including equity, property and other investment asset markets. Declining asset prices could also impact customers and counterparties and the value of security Kina holds against loans which may impact Kina's ability to recover amounts owing to it if customers or counterparties were to default.

In particular, the residential, commercial and rural property lending sectors are important to the businesses of Kina. Overall, the property market has been variable and in some locations there have been substantially reduced asset values. Declining property valuations in PNG or other markets where it does business could decrease the amount of new lending Kina is able to write and / or increase the losses that Kina may experience from existing loans.

For example, a significant decrease in PNG housing market demand or property valuations, or a significant slowdown in housing, commercial or strata title property markets could adversely impact Kina's lending activities because the ability of its borrowers to repay their loans may be affected, causing Kina to incur higher credit losses. These circumstances could also lead to a decline in the demand for its lending products, and this could adversely affect Kina's businesses, financial performance, capital resources, financial condition and prospects.

Additionally, a decline in asset markets and economic conditions generally could have adverse consequences for Kina's clients' funds under management, which would negatively impact on Kina's performance.

Key Corporate and Transaction Risks

Market risk

Kina is exposed to market risk as a consequence of both its investments and trading activities in financial markets and through asset and liability management of its balance sheet. In Kina's financial market trading business, it is possibly exposed to potential losses arising from adverse movements in levels and volatility of interest rates, foreign exchange rates, and credit prices. In Kina's asset and liability management of its balance sheet, it is possibly exposed to potential losses arising from adverse movements in levels and volatility of interest rates. If Kina was to suffer substantial losses due to any market volatility, it could adversely affect Kina's businesses, financial performance, liquidity, capital resources and financial condition.

Funding and Liquidity risk

Banks and other financial institutions (including Kina) are currently subject to global credit and capital market conditions which experienced extreme volatility, disruption and decreased liquidity following the global financial crisis.

If market conditions deteriorate due to economic, financial, political or other reasons, Kina's funding costs may be adversely affected and its liquidity and its funding of lending activities may be constrained. If Kina's current sources of funding prove to be insufficient, it may be forced to seek alternative funding.

The availability of such alternative funding, and the terms on which it may be available, will depend on a variety of factors, including prevailing market conditions, the availability of credit, Kina's credit ratings and credit market capacity. Even if available, the cost of these alternatives may be more expensive or on unfavourable terms, which could adversely affect Kina's businesses, liquidity, capital resources, financial performance and financial condition. There is no assurance that Kina will be able to obtain adequate funding at acceptable prices or at all.

Operational

Kina relies to a significant degree on information technology systems. Most of Kina's daily operations are computer based and its information technology systems are essential to maintaining effective communication with customers and keeping pace with the competitive environment. Kina is exposed to a number of system risks, including complete or partial failure of the information technology systems such as inadequacy of internal, partner or third party information technology systems, capacity of the existing systems to effectively accommodate Kina's planned growth and integrate existing and future acquisitions and alliances or systems integration programs not being completed within the timetable or budget, and compromise of information or technology arising from external or internal security threats. Kina has disaster recovery and systems development roadmaps in place to mitigate some of these risks. However, any failure in Kina's information technology systems could result in business interruption, the loss of customers, damaged reputation and weakening of its competitive position.

Operational risks including information technology could impact on Kina's operations or adversely affect demand for its products and services and its reputation, which could adversely affect Kina's businesses, financial performance and prospects.

Credit rating risk

Credit ratings are opinions on a bank or financial institution's creditworthiness. Credit ratings affect the cost and availability of funding from capital markets and other funding sources and they may be important to customers or counterparties when evaluating products and services offered by banks and financial institutions. Therefore, maintaining high quality credit ratings is important.

If Kina fails to maintain a strong credit rating, this could adversely affect Kina's cost of funds and related margins, competitive position and its access to capital and funding markets, which, in turn, could adversely affect Kina's businesses, financial performance, capital resources, financial condition and prospects. The extent and nature of these impacts would depend on various factors, including the extent of any ratings change, whether the rating of Kina or other members in Kina Group differ among agencies (split ratings) and whether any ratings changes also impact Kina's peers or the sectors in which Kina operates. Standard & Poors' credit rating for PNG stands at B-. Moody's' rating for PNG sovereign debt is B2. In general, a sovereign credit rating is used by sovereign wealth funds, pension funds and other investors to gauge the credit worthiness of a country's government. The impact of any downgrades to PNG's sovereign credit rating or its perceived creditworthiness could adversely affect PNG's financial markets and economic conditions and, in turn, Kina's businesses, financial performance and financial condition.

Key Corporate and Transaction Risks

Investment performance

Kina has a significant investment portfolio, which consists of:

- commercial bills with BPNG, treasury bills and government-inscribed stock with the PNG Government;
- a share portfolio of local shares, vacant land in Port Moresby; and shareholding equity in local companies.

The investment portfolio is managed in accordance with Kina's risk appetite, investment policy and investment approach.

Kina's investment approach for client assets is to invest in a range of assets including PNG fixed income instruments, PNG unlisted equities, PNGX listed equities, PNG property investments and international investments in individual stocks, managed funds and diversified indices. Kina through its investment portfolios is exposed to risk and volatility in the markets, securities and other assets in which it invests.

Litigation and regulatory proceeding risk

Kina, like all entities in the banking or finance sectors, is exposed to the risk of litigation and / or regulatory proceedings brought by or on behalf of policyholders, deposit holders, government agencies or other potential claimants.

There can be no assurance that significant litigation will not arise in the future and that the outcome of litigation proceedings from time to time will not have an adverse effect on Kina's businesses, financial performance, financial condition or prospects.

Risk management strategy

Kina has implemented risk management strategies and internal controls involving processes and procedures intended to identify, monitor and mitigate the risks to which it is subject, including liquidity risk, credit risk, market risk (including interest rate and foreign exchange risk) and operational risk.

However, there are inherent limitations with any risk management framework as there may be risks that exist or develop in the future, risks that Kina has not anticipated or identified or controls that may not operate effectively.

If Kina's risk management processes and procedures prove ineffective, inadequate, or are otherwise not appropriately implemented, Kina could suffer unexpected losses and reputational damage which could adversely affect Kina's businesses, financial performance, capital resources, financial condition and prospects.

Capital base and capital ratios

Kina's capital base is critical to the management of its business and access to funding. BPNG requires Authorised Institutions within the Kina Group to maintain adequate regulatory capital in accordance with prudential standards issued by BPNG under the PNG BFI Act.

Under current regulatory requirements, as a counterparty's risk grade worsens, Kina's risk-weighted assets and loan provisions increase. Additional regulatory capital requirements arising as a consequence of increased loan provisions may be exacerbated during times of financial stress, particularly if there are lower profit levels. As a result, greater volatility in capital ratios may arise and may require Kina to raise additional capital. There can be no certainty that any additional capital required would be available or could be raised on reasonable terms.

Kina's capital ratios may be impacted by a number of factors including lower profitability, higher asset growth and changes in business strategy (including acquisitions or an increase in capital intensive businesses).

Key Corporate and Transaction Risks

Reputational damage

Kina's ability to attract and retain customers and investors and its prospects could be adversely affected if Kina's reputation is damaged. There are various potential sources of reputational damage including potential conflicts of interest, pricing policies, failing to comply with legal and regulatory requirements (including without limitation, money laundering laws, trade sanctions legislation or privacy laws), ethical issues, litigation, failing to comply with information security policies, improper sales and trading practices, personnel and supplier policies, improper conduct of companies in which it holds strategic investments, technology failures, security breaches and risk management failures. Kina's reputation could also be adversely affected by the actions of the financial services and allied industries in general or from the actions of its customers and counterparties.

Failure to appropriately address issues that could or do give rise to reputational damage could also give rise to additional legal risks, subject Kina to regulatory enforcement actions, fines and penalties and could lead to loss of business which could adversely affect Kina's financial performance, financial condition and prospects.

Retention of key management personnel

Kina's future success depends, in part, on its capacity to retain and motivate existing management personnel as well as attract new management personnel. In particular, Kina's performance is dependent on the talents and efforts of key management personnel. The loss of key management personnel may cause material disruption to Kina's business and operations in the short to medium term and may have an adverse impact on the financial performance and prospects of Kina.

Taxation

Kina is subject to taxation legislation in Papua New Guinea and any significant change in taxation law or its interpretation and application by an administrative body could have an adverse effect on the results of its operations.

Key Corporate and Transaction Risks

PNG liquidity and realisation

Whilst Kina is listed in PNG, trading on the PNGX is very limited, largely because of the illiquid nature of the PNG investment market. Accordingly, there may be relatively few or many potential buyers or sellers of Shares on PNGX at any time. This may affect or cause volatility in the market price of Shares. It may also affect the prevailing price at which Shareholders are able to sell their Shares on PNGX.

Environmental risk

Kina and its customers operate businesses that hold assets in a diverse range of geographical locations within PNG. Any significant environmental change or external event (including fire, storm, drought, flood, earthquake or pandemic) in any of these locations has the potential to disrupt business activities, impact on Kina's operations, damage property and otherwise affect the value of assets held in the affected locations and Kina's ability to recover amounts owing to it.

Insurance

Kina seeks to maintain appropriate policies of insurance and any future increase in the cost of such insurance policies, or an inability to fully renew or claim against insurance policies as a result of the current economic environment and the impact of COVID-19 (for example, deterioration in an insurer's ability to honour claims), could adversely affect the Group's business, financial position and operational results.

General risks associated with investments in equity capital

Investors should be aware that there are risks associated with any investments in equity capital.

The value of the shares in Kina may rise above or fall below the price under the Offer, depending on the financial position and operating performance of Kina as well as prevailing market conditions. Further, the price at which the New Shares trade on PNGX may be affected by several factors unrelated to the financial and operating performance of Kina and over which Kina and the Directors have limited or have no control. These external factors include: (i) the impact of COVID-19, including on health of workforce, the industry, customers, supply chains and travel and other restrictions; (ii) economic conditions and outlook in PNG, Australia, the US and overseas; (iii) changes in interest rates and the rate of inflation; (iv) investor sentiment in the local and international stock markets and the banking sector; (v) changes in fiscal, monetary, regulatory and other government policies; (vi) changes in government legislation and policies, including tax laws; (vii) the development of new technologies and displacement of existing technologies; and (viii) geo-political conditions such as acts or threats of terrorism or military conflicts.

Investors should also note that the historic share price performance of Kina shares provides no guidance as to its future share price performance.

There have been significant fluctuations and volatility in the prices of equity securities in recent months, which may have been caused by general rather than company-specific factors, including the general state of the economy, the response to the COVID-19 pandemic, investor uncertainty, geo-political matters, and global hostilities and tensions. In particular, the COVID-19 pandemic has resulted in significant market falls and volatility both in PNG, Australia, the US and overseas, including in the prices of equity securities. As detailed above, there continues to exist considerable uncertainty as to the further impact of COVID-19 on the PNG and global economy and share markets including in relation to governmental action, work stoppages, university and school stoppages, lockdowns, quarantines, travel restrictions and the impact on the economy and share markets. Any of these events and resulting fluctuations may materially adversely impact the market price of the shares in Kina.

Dilution risk

Investments in equity capital will have the effect of diluting the share ownership of existing shareholders of Kina.

Future equity offerings by Kina may dilute the percentage ownership of Kina by existing shareholders of Kina. In certain circumstances, securities issued by Kina in the future may have rights, preferences or privileges attached to them that are senior, to or otherwise adversely affect, those attached to the shares.

Dividends

Any future determination as to the payment of dividends by Kina will be at the discretion of the Directors and will depend on the financial condition of Kina, future capital requirements and general business and other factors considered relevant by the Directors. At all times, and particularly in light of the COVID-19 pandemic, there can be no guarantee as to the likelihood, timing, franking of quantum of future dividends or franking credits.

Change in accounting policy

Kina is subject to the usual business risk that there may be changes in accounting policies which impact Kina.

Entitlement Offer and Placement may not be fully underwritten and may not complete

The Entitlement Offer and Placement (but not the PNG Retail Offer) are subject to a range of conditions and termination events set out in the underwriting agreement entered into by Kina and the Underwriter on 10 September 2020 (Underwriting Agreement). If certain conditions are not satisfied or certain events occur, then the Underwriter may terminate the Underwriting Agreement, which may have an adverse impact on the ability of Kina to proceed with the Entitlement Offer and Placement and the amount of funds raised as part of the Entitlement Offer and Placement. In the event the Underwriting Agreement is terminated by the Underwriter, there is no guarantee that the Entitlement Offer and Placement will continue in its current form or continue at all. Failure to raise sufficient funds under the Entitlement Offer and Placement (as a result of it not proceeding or otherwise) could materially adversely affect Kina's business, cash flow, financial position and results of operations.

Key terms of Underwriting Agreement

The Underwriter's obligations under the Underwriting Agreement, including to underwrite the Entitlement Offer and Placement (other than with respect to the PNG Retail Offer), and manage the Entitlement Offer and Placement (other than the PNG Retail Offer), are conditional on certain matters, including the timely delivery of due diligence process materials, obtaining any necessary ASX and Papua New Guinea National Stock Exchange (PNGX) Listing Rule waivers and any necessary PNG regulatory approvals and obtaining a trading halt on ASX and PNGX by opening of trading on the announcement date. - any change of law or policy in Australia and Papua New Guinea is announced or occurs which, in the reasonable opinion of the Underwriter, is likely to prohibit or adversely affect or regulate the offer, capital issues or stock markets or the Underwriter's ability to promote or market the offer or enforce contracts to issue or allot the shares, or adversely affect the taxation treatment of the shares
