ASX ANNOUNCEMENT

Quarterly Activity Statement to 31 March 2021

The Company advises its operational activities for the quarter to 31 March 2021 as follows;

Sea Cucumber Project

The travel bans to Western Australia which commenced in late March 2020 have continued to significantly restrict our ability to manage our businesses in WA and for those businesses to complete all their respective requirements to operate. In late March this year the management of the Company was finally able to return to WA.

The dispute with our dedicated contractor at Shark Bay remains unresolved, despite our best efforts. At all times we have sought to encourage our partner to perform including at least the supply of limited product as a demonstration by it, that it was willing to meet some of our supply objectives and its past promises. A conference with Tidal Moon's lawyers took place in Perth in March 2021 and little progress took place, although the parties continue to discuss and continue to seek some interim solution.

The Company continues to pursue other supply possibilities in Western Australia but a meeting with senior WA government officials in March left the company underwhelmed by the government's support, or indeed lack of support of a sea cucumber industry in WA.

The Company has strengthened its relationships with the local Aboriginal community leaders and we now await confirmation of the local community obtaining further rights to harvest sea cucumbers in WA. Throughout the past 9 months we have supported local Aboriginal persons in their endeavours to better understand the sea cucumber resources in Shark Bay and subject to the weather the Company has continued to support this process through summer.

Throughout 2020 and the quarter to 31 March 2021 the Company has continued to investigate and settle its manufacturing contractor in Japan, maintain and expand its sales leads throughout Japan, the PRC and other parts of Asia. The Company has on sold some wholesale product and generated sales of \$188,000 in Japan (July 2020 to 31 March 2021). The Company is now completing the design of its new products and has commenced manufacturing ready for a product launch in late May or early June 2021.

The Company is sourcing raw dried sea cucumber from other suppliers to meet its demand. The first 3 tons of product from Peru has been delivered to our Japanese subsidiary and further deliveries of tons is scheduled for delivery in this quarter.

Blue Ocean Japan

The Company notes that its wholly owned subsidiary in Japan, Blue Ocean Japan commenced active trading under the supervision of the Company's Managing Director, Mr Nakamura who was in Japan until late February 2021 when he was finally able to return to Australia. Mr Nakamura is now managing all BOJ operations from Australia.

The Company has put in place a strong management and operational team in Japan and we have confidence that this team will be able to undertake the manufacturing, sales and marketing of products including the product launch in this quarter.

The Company is looking for Japan and Australia to reach an agreement during 2021 for both companies to comprise a further travel bubble which would allow the management from the company to readily travel to Japan to assist in the management of BOJ. The Company is very supportive of an arrangement that could see the management quarantine at home when returning from Japan. The Company does recognise that we are some months away from such a solution and we have in place plans to effectively manage the businesses remotely from Australia.

Sandalwood Project

The Company has completed its due diligence into a manufacturer to undertake the production of sandalwood oil in NSW from WAS native sandalwood. The Company is continuing to pursue the supply of reasonably priced raw material from WA.

Bundybunna

The Company continued to seek clarification of the timing of the termination of the winding up and the cash flow needs of the project, post termination. The Company is currently undertaking a thorough review of the Bundybunna project.

There have been no significant changes to the Company's operations since the annual general meeting of the Company on 26 November 2020.

The Company does not need to remind its shareholders of the hardships of 2020. The coronavirus has had a significant impact on the Company's operations over the past 3 months and this continues to be the position.

The Company does not expect any substantial change to these issues over the coming months, despite the vaccine for COVID 19 becoming available. The Company remains disappointed at Australia's poor vaccine roll out.

The Company is encouraging all its staff and the staff of its dedicated contractors, including in Japan to get vaccinated as soon as possible.
