FORWARD LOOKING STATEMENTS DISCLAIMER

These materials prepared by De Grey Mining Limited (or the "Company") include forward looking statements. Often, but not always, forward looking statements can generally be identified by the use of forward looking words such as "may", "will", "expect", "intend", "plan", "estimate", "anticipate", "continue", and "guidance", or other similar words and may include, without limitation, statements regarding plans, strategies and objectives of management, anticipated production or construction commencement dates and expected costs or production outputs.

Forward looking statements inherently involve known and unknown risks, uncertainties and other factors that may cause the Company's actual results, performance and achievements to differ materially from any future results, performance or achievements. Relevant factors may include, but are not limited to, changes in commodity prices, foreign exchange fluctuations and general economic conditions, increased costs and demand for production inputs, the speculative nature of exploration and project development, including the risks of obtaining necessary licenses and permits and diminishing quantities or grades of reserves, political and social risks, changes to the regulatory framework within which the Company operates or may in the future operate, environmental conditions including extreme weather conditions, recruitment and retention of personnel, industrial relations issues and litigation.

Forward looking statements are based on the Company and its management's good faith assumptions relating to the financial, market, regulatory and other relevant environments that will exist and affect the Company's business and operations in the future. The Company does not give any assurance that the assumptions on which forward looking statements are based will prove to be correct, or that the Company's business or operations will not be affected in any material manner by these or other factors not foreseen or foreseeable by the Company or management or beyond the Company's control.

Although the Company attempts and has attempted to identify factors that would cause actual actions, events or results to differ materially from those disclosed in forward looking statements, there may be other factors that could cause actual results, performance, achievements or events not to be as anticipated, estimated or intended, and many events are beyond the reasonable control of the Company. Accordingly, readers are cautioned not to place undue reliance on forward looking statements. Forward looking statements in these materials speak only at the date of issue. Subject to any continuing obligations under applicable law or any relevant securities exchange listing rules, in providing this information the Company does not undertake any obligation to publicly update or revise any of the forward looking statements or to advise of any change in events, conditions or circumstances on which any such statement is based.

ACKNOWLEDGMENT OF COUNTRY

At De Grey Mining, we acknowledge the Traditional Custodians of the land upon which we operate and recognise their unique cultural heritage, beliefs and connection to these lands, waters and communities.

We pay our respects to all members of these Indigenous communities, and to Elders past, present and emerging. We also recognise the importance of continued protection and preservation of cultural, spiritual and educational practices.

As we value treating all people with respect, we are committed to building successful and mutually beneficial relationships with the Traditional Custodians throughout our areas of operation.

REDEFINING THE PILBARA

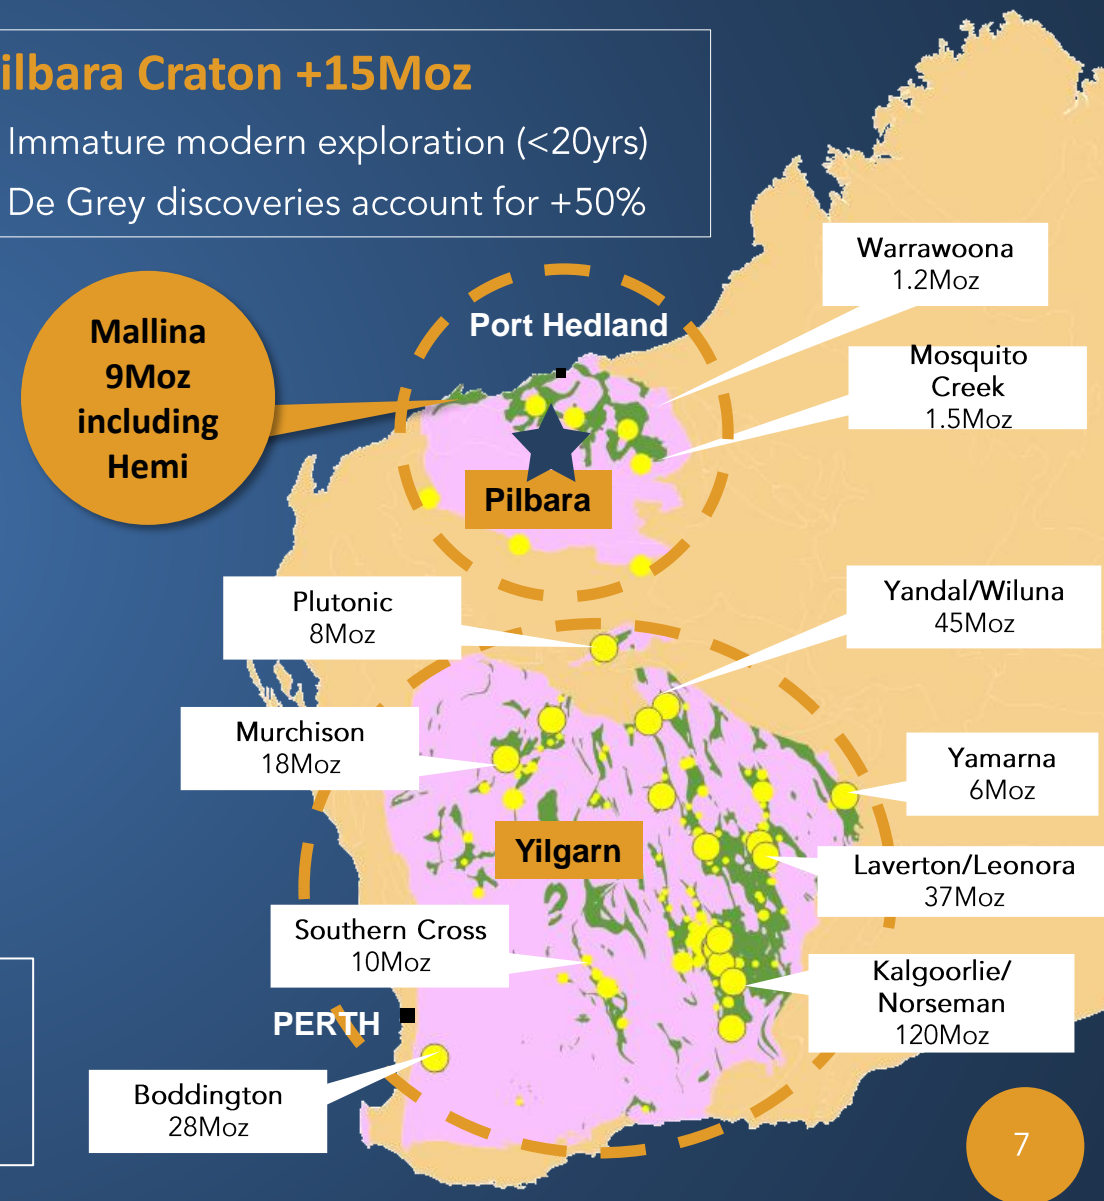

- The same geological setting as the Yilgarn:
 - Archaean aged rocks 2.5 – 4 billion years old
 - Granite/greenstone belts
- Potential for shear-hosted gold previously recognised
- Recent discovery of a intrusion-hosted style of gold mineralisation new for the Pilbara
- Transformational discovery for De Grey and the region
- 150km of prospective strike still largely untested

Yilgarn Craton +200Moz

- Very mature exploration (>120yrs)
- New discoveries expected at depth

Pilbara Craton +15Moz

- Immature modern exploration (<20yrs)
- De Grey discoveries account for +50%

A Mineral Resource of high integrity

← 77% Indicated in the upper 140m

← 84% Indicated in the upper 220m

← 46% Indicated in the upper 140m

← 77% Indicated in the upper 140m

← Only discovered in January 2021

↑ Hosted within 200m of surface

↑ Mineral Resources are open along strike and at depth

1. Refer to ASX announcement *6.8Moz Hemi Maiden Mineral Resource drives MGP to 9.0Moz* dated 23 June 2021

SINCE THE HEMI DISCOVERY

- Drilling completed to support the Mineral Resource over 15 months to the cut-off date of 17 May 2021:
 - 688 RC holes (134,166m)
 - 169 diamond holes (69,061m)
- A further 200,000m of aircore drilling testing new intrusives
- Drilling added resources at a rate of 450,000oz per month
- Very low discovery cost of ~\$8.50 per resource ounce
- All deposits still remain open

HIGH OUNCES PER VERTICAL METRE

DEPOSIT	OUNCES PER VERTICAL METRE
Brolga	9,000
Aquila	2,500
Crow	4,000
Falcon	3,800
Diucon/Eagle	6,000
TOTAL Hemi	25,300

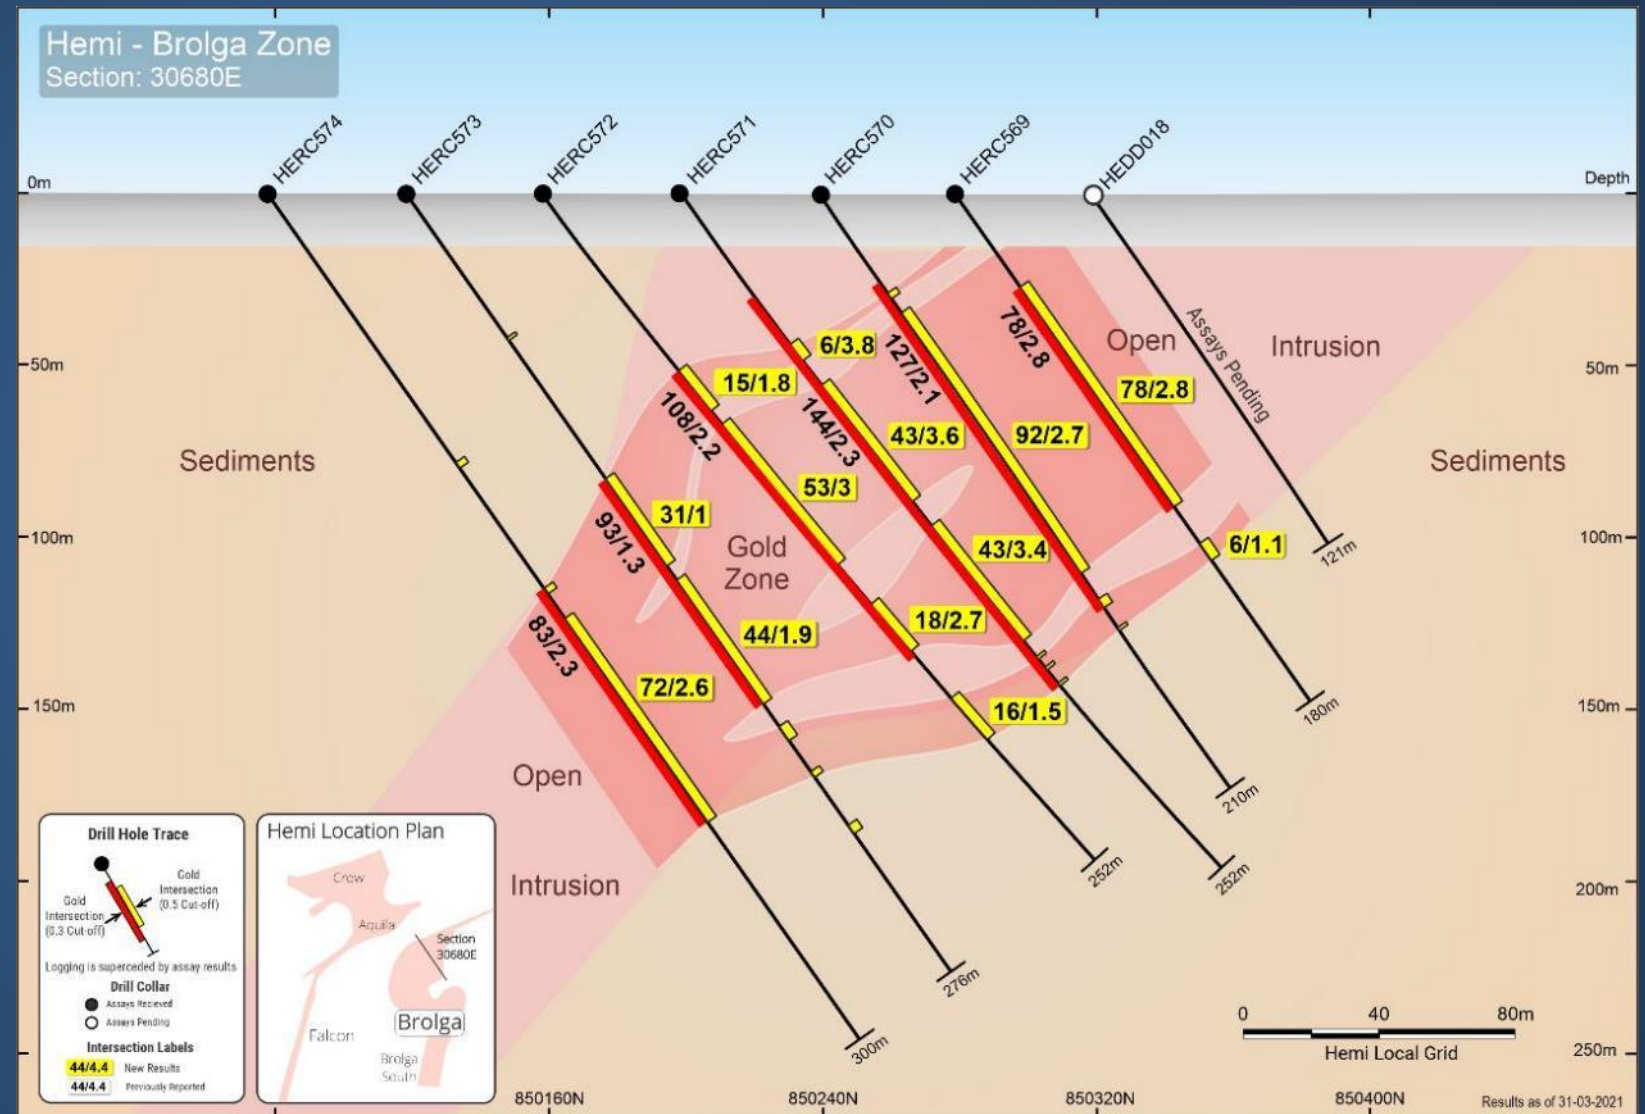

ATTRACTIVE GRADE PROFILE FOR MINING

CUT-OFF GRADE IN THE TOP 370M	CUT-OFF GRADE BELOW 370M	MINERAL RESOURCE ESTIMATE
0.3g/t Au	1.5g/t Au	192Mt @ 1.1g/t Au for 6.8Moz
0.4g/t Au	1.5g/t Au	172Mt @ 1.2g/t Au for 6.6Moz
0.5g/t Au	1.5g/t Au	155Mt @ 1.3g/t Au for 6.4Moz
0.6g/t Au	1.5g/t Au	135Mt @ 1.4g/t Au for 6.1Moz
0.7g/t Au	1.5g/t Au	114Mt @ 1.5g/t Au for 5.6Moz

BROLGA ZONE AT HEMI

- Wide zone of consistent grade mineralisation
- Remains open at depth and to the west and south
- RC and diamond drilling in progress testing extensions to the mineralised footprint

HEMI'S VALUE DRIVERS

1

Tier 1 scale and jurisdiction

A new multi-million ounce gold province

2

Thick ore zones from shallow depths

With very high ounces per vertical metre

3

Rapid, cost effective delineation

Discovery costs of \$8.50/oz in 15 months

4

Open pittable deposits

Amenable to large scale bulk mining

5

Continued rapid growth in endowment

Diucon and Eagle discoveries early 2021

6

Significant future resource upside

Exploration in parallel with growth at Hemi

A TIER 1 AUSTRALIAN GOLD DEPOSIT

HIGH QUALITY DEPOSITS KEEP GROWING

Deposit	Resource Growth First Five Years
Tropicana	95%
Gruyere	76%
Mallina/Hemi	?

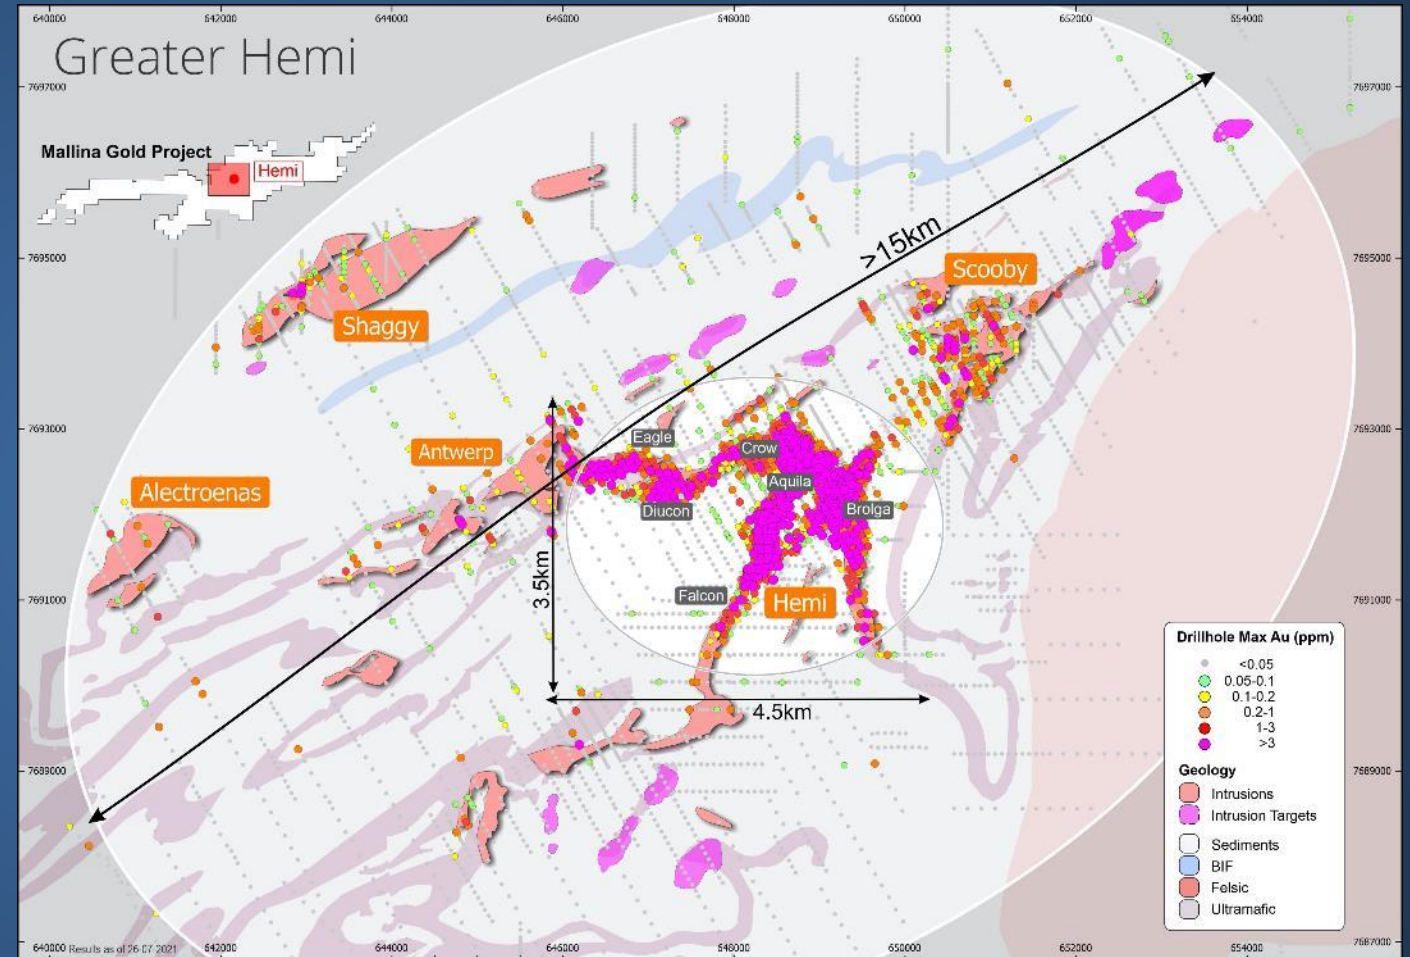

EXTENDING THE HEMI RESOURCE

- All Hemi deposits remain open
- Multiple rigs currently operating at Hemi to extend/upgrade resources:
- Only drilling to the start of May at Diucon/Eagle included in the MRE
- Recent diamond drilling at Diucon has intersected broad zones of mineralisation outside the resource:
 - 173.7m @ 1.5g/t Au from 271.3m
 - 99m @ 1.1g/t Au from XXX.Xm and
 - 173m @ 1.6g/t Au from XXX.Xm

THE HUNT FOR THE NEXT HEMI

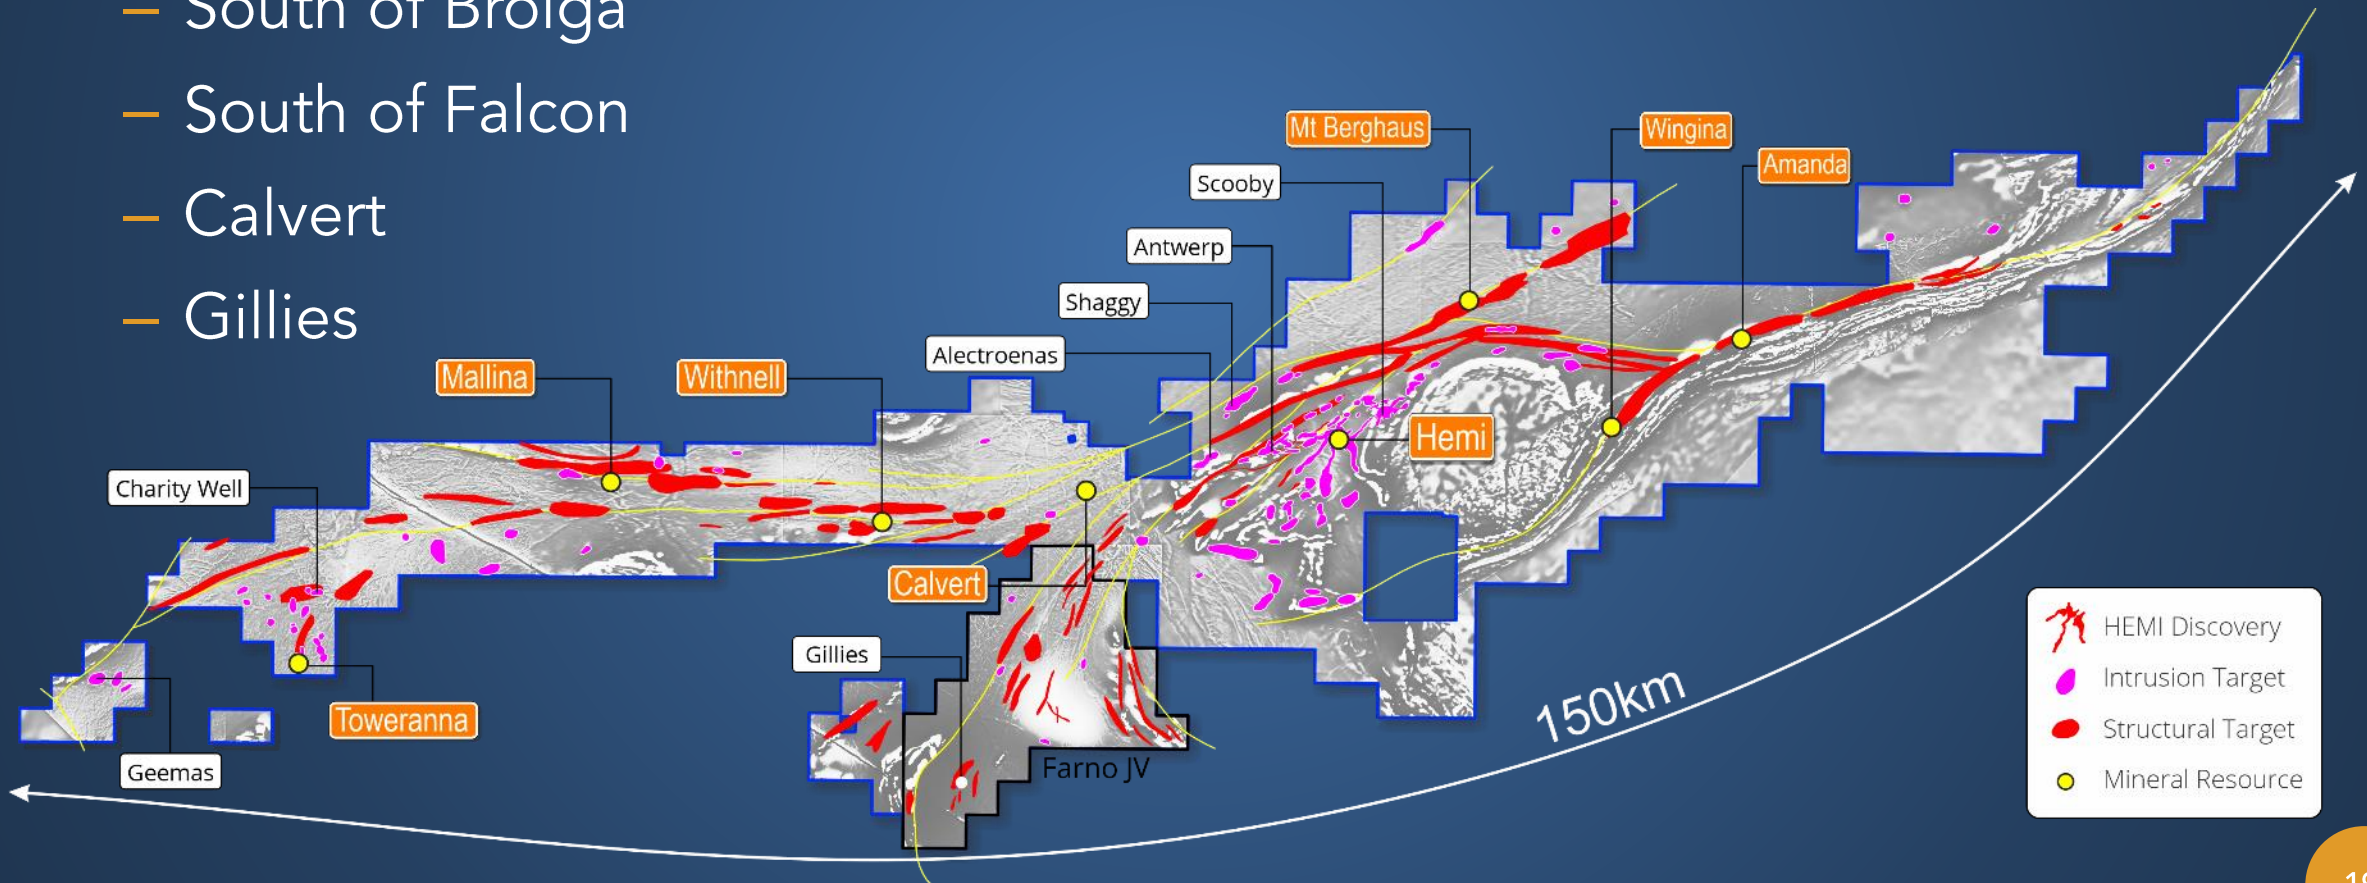

- Applying the learnings of Hemi throughout the project:
 - Identify new intrusives with wide-spaced aircore
 - Test prospective areas with RC and diamond drilling
 - Step out and test down dip of mineralisation
 - Large deposits can still exist below sediments with minimal anomalism
 - Geophysics utilised to target prospective areas

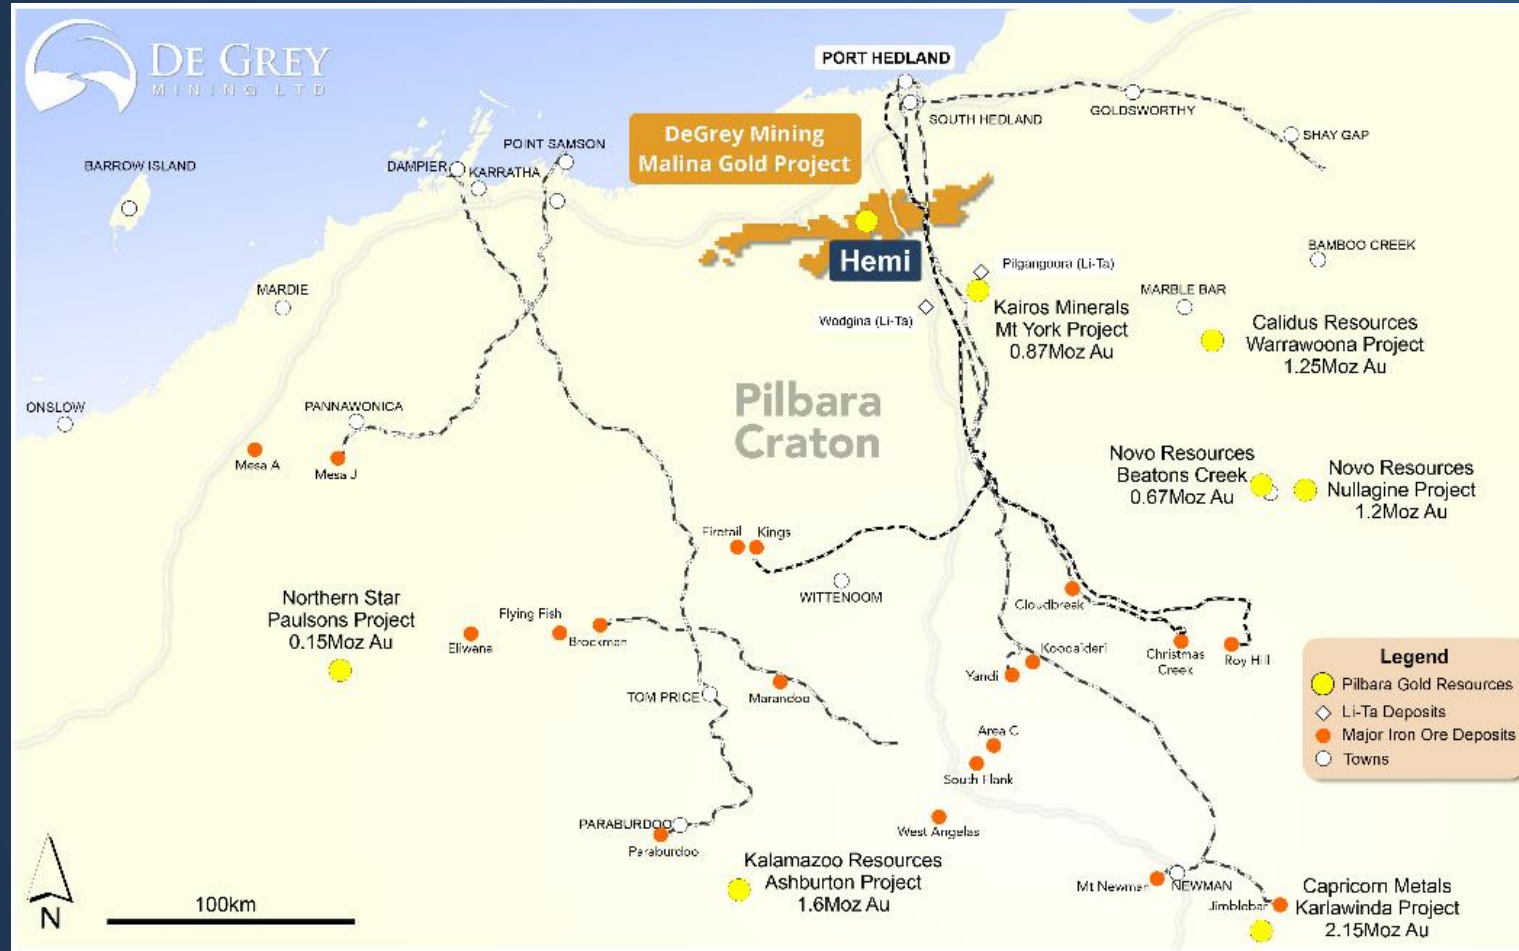

THE HUNT FOR THE NEXT HEMI

- Ten rigs currently drilling outside the Hemi deposit:

- Scooby
- South of Brolga
- South of Falcon
- Calvert
- Gillies

A TIER 1 MINING REGION

- Hemi is ideally located 60km south of Port Hedland, a major mining service centre
- Existing infrastructure located within 20km of Hemi:
 - Two major sealed highways
 - Two gas pipelines
 - 220kV transmission line
- 100 person camp and large core processing facility established 20km from the Hemi
- Plentiful good quality water

PROJECT STUDIES

- Long lead time de-risking studies underway:
 - Environment, hydrogeology, geochemistry, geotechnical, energy, infrastructure corridors, heritage
- Metallurgical testwork at Brolga and Aquila showing:
 - High recoveries (93% - 95%) of oxide mineralisation using carbon in leach (CIL)
 - High overall recoveries (94% - 96%) of primary mineralisation using flotation, POX and CIL
 - High gold recovery into concentrate at low mass pull
 - Oxidation circuit ~15x smaller than plant front end
 - Gravity gold recovery >10%
 - Variability testwork continuing at Crow and Falcon
- Hydrometallurgical processes being assessed include:
 - Pressure oxidation, Albion and biological oxidation

FOCUS FOR REMAINDER OF 2021

Hemi

- RC/diamond drilling to extend deposits and upgrade Inferred Resources to Indicated level
- All deposits remain open at depth and some along strike
- Potential for new zones and higher grade lodes to be identified

Greater Hemi

- Continued aircore drilling of known intrusions
- Anomalous gold mineralisation and prospective geochemical targets will continue to be followed up with RC drilling

Regional

- Aircore drilling expanding to test known regional intrusions outside Greater Hemi:
 - Charity Well
 - Calvert
 - Geemas
 - Others
- RC/diamond drilling to extend existing shear hosted deposits

Development

- Mining and processing studies
- More detailed metallurgical testwork on wider Hemi ore types
- Heritage surveys
- Environmental surveys
- Completion of scoping study in September quarter

LONG-TERM GROWTH STRATEGY

Demonstrate Tier 1 scale resource and production potential at Hemi

Continue to grow resources at a discovery cost below industry average of A\$20/oz

Build organisational capability and progress development studies

Ultimate objective to become a Tier 1 gold producer at Hemi
