Explanation of results

For an explanation on the figures reported above please refer to the 30 June 2021 Annual Report and the results announcement and presentation dated 23 August 2021.

The 30 June 2021 financial results were materially impacted by outcomes from the African Mining Services' strategic review. This resulted in impairment charges of \$62.5 million mainly related to exiting two underperforming West African projects, Yanfolila and Boungou. In addition, a review of the BTP business resulted in impairment charges of \$8.1 million and inventory provisions of \$9.9 million recorded at 30 June 2021. Impairments charges for the year totalled \$70.6 million (30 June 2020: \$59.6 million).

Despite the impairment charges detailed above and external headwinds from the persistence of COVID-19, labour shortages and foreign exchange pressures, the underlying business remains robust, buoyed by strong and profitable growth from the underground mining business and improving profitability of the African surface mining business. These factors should be taken into account when analysing comparative figures between the financial years ended 30 June 2021 and 30 June 2020.

The Annual General Meeting will be held as a virtual online meeting via a live webcast.
