## Senex releases 2021 Sustainability Report

**Senex Energy Limited (Senex, ASX:SXY) today released its 2021 Sustainability Report that details the company's environmental, social and corporate governance performance and its commitment to continuous improvement. Click [here](#) to view the report.**

Senex's first standalone sustainability report profiles the company's sustainability approach, priorities and performance for FY21 and highlights commitments for FY22.

In FY21, Senex achieved zero recordable injuries, doubled parental leave entitlements, spent more than \$16 million with local businesses and supported more than 30 community partnerships.

The report follows the release of Senex's [Decarbonisation Action Plan](#), which details the company's ambition to reduce greenhouse gas emissions across its operational footprint to net zero by 2040. The plan includes transparent and bold near-term emissions intensity reduction targets and a commitment to support customers in their emissions reduction efforts.

Each year Senex will transparently report on its sustainability progress in alignment with Global Reporting Initiative (GRI) Standards – the global benchmark for sustainability reporting.

Managing Director and CEO Ian Davies said the report represents another important step for Senex as it continues to proactively manage impacts safely and responsibly, maximising the benefits of its activities for all stakeholders.

"Natural gas is integral to meeting demand for reliable, affordable and sustainable energy and we are focused on being the natural gas supplier of choice through the transition to a low-carbon future.

"Senex is focused on achieving excellent environmental, social and corporate governance practices, and our standalone sustainability report is an opportunity to share the great stories about the work we do and our plans for the future.

"We are tremendously proud of this report, Senex's employees and our relationships with our customers, contractors and suppliers, communities, landholders, governments and shareholders that make it possible for us to help deliver a more sustainable future," Mr Davies said.

### About Senex

Senex is an established, rapidly growing and low-carbon Australian natural gas producer. Our long-life Surat Basin assets contribute around 20 petajoules of natural gas per year into the east coast gas market to support our customers. Senex is focused on sustainably delivering balance sheet strength, resilient cashflows, growing dividends to support Australia's energy needs as it transitions to a lower carbon future.
