

**ASX ANNOUNCEMENT**

2 February 2022

**Golden Grove - COVID-19 Update**

29Metals Limited ('29Metals' or, the 'Company') advises that a first case of COVID-19 has been confirmed at Golden Grove early this week, involving an underground services contractor on night shift at Golden Grove. The individual is currently in isolation on site in accordance with WA Health requirements.

There are currently 24 workers in isolation on site, comprising a small number of deemed close contacts of one confirmed case, with the balance being workers identified as attending exposure sites before mobilising to site. Under WA Health requirements, these persons are required to isolate on site for 14 days.

In accordance with site COVID-19 Management Plans and WA Health requirements, all *casual contacts* of the confirmed case were isolated and have undergone rapid antigen testing ('RAT') and PCR tests. All personnel have returned negative RAT results and returned to work in accordance with WA Health requirements.

**At this stage, the confirmed case, and testing and isolation requirements, have not had a material impact on production at Golden Grove.**

29Metals is managing the situation closely, including ongoing engagement with WA Health officials and enhanced communication with the workforce. The Company is closely monitoring the well-being of the workforce at site.

As noted in 29Metals' December 2021 quarterly report, COVID-19 Management Plans are in place at both 29Metals' operating sites, which plans have been successfully applied at Capricorn Copper to manage transmission risks and the same successful protocols are being applied at Golden Grove.
