BSA Secures multi-year (2 + 1 + 1) Building Management Control System roll out agreement with ALDI Australia

Sydney, 21 March 2022: BSA Limited (ASX:BSA) is pleased to announce it has secured a significant agreement with ALDI Australia for the roll out of Building Management Control Systems for 2 years with potential 1 + 1 years, extension at ALDI's discretion.

BSA will be integrating Building Management Control Systems (BMCS) across the ALDI portfolio covering New South Wales, Victoria, Queensland, South Australia and Western Australia. The works will deliver aggregation of data and control of hard assets across ALDI stores into a centralised location. The contract is expected to generate approximately \$20m of revenue for BSA in the first 2 years of the program with ongoing revenues expected as more ALDI stores are added to the program

BSA Managing Director Tim Harris said "BSA is excited to be delivering this landmark project for ALDI, rarely seen at such scale in the Australian market. It provides the opportunity to further build on our relationship with one of our key clients and support their goals in optimising their assets and operating costs"

This announcement is made on behalf of the board
