

CATAPULT BUILDS ON THREE-YEAR RELATIONSHIP WITH **NRL IN EXPANDED LEAGUE-WIDE DEAL**

- For the first time all 16 NRL and all 6 NRLW teams as well as Australia's National teams and match officials will use Catapult's performance technology
- Catapult continues to provide data for live broadcast commitments via the Telstra Tracker

APRIL 7, 2022

Catapult Group International Limited (ASX:CAT, 'Catapult' or the 'Company'), the global performance technology leader in elite sports, today announces an expanded relationship with The National Rugby League (NRL), in an exclusive deal to utilize performance technologies across all functions of the league, including match officials.

For the first time, all 16 teams in the NRL and six NRLW teams, in addition to the Australian National teams and NRL referees, will use Catapult's Vector SaaS technology to empower data-driven decisions to improve player performance, quantify decisions to help prevent injuries, and inform return to play. Catapult continues to provide live game data to support the NRL's broadcast commitments via their partnership with Telstra. This data is captured from Catapult's proprietary ClearSky Local Positioning System, installed across NRL's network of stadiums and will be used by the NRL to deepen fan engagement during games.

Catapult's Vector SaaS technology delivers next level accuracy, usability, and efficiency to empower critical sports science and tactical decisions. Vector's SaaS technology provides an integrated and comprehensive view of performance, in real time, leveraging the latest data science to help players and teams find answers to complex performance questions.

"We are immensely proud to continue our longstanding relationship with the NRL," said Will Lopes, CEO of Catapult. "It's an honor to continue working with them and see expanded use of our technology across the entire league. The NRL has been at the forefront of research and development in sports for decades and we believe the decision to continue partnering with us is a testament to the power of our performance technology."

Catapult has been the performance technology supplier to the NRL since 2019. The NRL has long been a leader in technology adoption, and Catapult has played a pivotal role in allowing the teams to stay at the forefront of innovation and adopt leading-edge technology to optimize and drive continuous improvement in player and team performance.

"Catapult's solutions are a trusted part of our league and fan experience," said Graham Annesley, Executive General Manager - Elite Football. "We're growing our work with

Catapult into new parts of the league because their innovations allow us to track and improve the performance of our players and ultimately improve the game for our fans.”

This Sunday, Catapult will provide live match data via Telstra for the NRLW Grand Final to highlight the impressive athleticism of the players and bring fans watching at home closer to the game. Data such as Max Speed and Distance Covered will be shared live on the April 10 broadcast.

The NRL deal follows recent similar league-wide deals with the Australian Football League (AFL) and German Football Association.

Catapult empowers more than 3,425 elite teams around the world with its integrated SaaS platform, providing athletes and teams with a comprehensive view of performance.

Authorized for release to ASX by the Catapult CEO, Mr Will Lopes.
