NEARMAP FILES ADDITIONAL CHALLENGE TO VALIDITY OF EAGLEVIEW/PICTOMETRY PATENTS

Nearmap has filed an additional inter partes review (IPR) against an EagleView/Pictometry (EagleView) patent that EagleView asserted in the current litigation it lodged against Nearmap. Following the three IPR's that Nearmap filed against EagleView in March 2022, this latest filing brings the current total to four EagleView patents that Nearmap seeks to have invalidated. An IPR is a legal procedure that challenges the validity of patents before the U.S. Patent Trial and Appeal Board and continues Nearmap's vigorous challenge of what it considers to be EagleView's meritless claims.

Nearmap takes very seriously the subject of intellectual property rights and patent protections. The historical allegations do not affect the Company's core proprietary technology, the surveying of imagery or the delivery of content. Nearmap continues to deliver strong growth from the North American business and recently announced it expected its Group Annual Contract Value (ACV) portfolio to close FY22 at the upper end of a refined \$155m-\$160m range (previously the upper end of \$150m-\$160m range (FY21: \$128.2m)).

About Nearmap | nearmap.com

Nearmap (ASX:NEA) provides easy, instant access to high resolution aerial imagery, city-scale 3D content, AI data sets, and geospatial tools. Using its own patented camera systems and processing software, Nearmap captures wide-scale urban areas in Australia, New Zealand, the United States and Canada several times each year, making current content instantly available in the cloud via web app or API integration. Every day, Nearmap helps thousands of users conduct virtual site visits for deep, data driven insights—enabling informed decisions, streamlined operations and better financial performance. Nearmap was founded in Australia in 2007 and is one of the largest aerial survey companies in the world.
