

## DISRUPTION TO HEALTH SERVICES OPERATIONS IN VICTORIA

Cleanaway Waste Management Limited (“Cleanaway”) ASX:CWY announces that a fire at its medical waste processing facility in Dandenong, Victoria yesterday has caused significant damage to the equipment at the site. As a result, the operations of the Health Services business unit in Victoria will be disrupted for a period of time.

No Cleanaway staff or contractors at the site were injured in the fire. We understand that there has not been any environmental damage from the fire and all firewater was contained on the site.

Cleanaway is currently exploring alternative disposal pathways to treat and dispose of the medical waste that would otherwise be processed at the site, including temporary licence approvals to treat and dispose of waste at other Cleanaway facilities and disposal with third parties. Cleanaway will work with affected customers to minimise disruption to their service.

Cleanaway’s preliminary estimate of the impact of the disruption to service is a reduction in EBITDA for the Health Services business unit of approximately \$2-3m per month. Further information in relation to the financial impact of the disruption, including its expected duration, will be provided in due course.

This announcement has been authorised for release by the Chairman and Chief Executive Officer of Cleanaway.
