Flooding in Victoria

Noumi Limited (**ASX: NOU**) provides the following update on the ongoing flooding in and around its operations in Northern Victoria.

The Company's Shepparton site is continuing to operate at a reduced capacity, as road closures in the area have limited the ability of staff to access the premises. Inventory and raw materials in flood threatened areas have been moved to other sites or relocated to higher positions to the extent that it is practical to do so and at this stage there has not been any confirmed damage as a result of the flooding.

Thankfully all of our employees are safe and we are providing support to those employees who may have been personally impacted.

Management is working with customers and key suppliers to ensure supply chain continuity and to seek to mitigate any financial impact of the flooding. We are working closely with our dairy suppliers in particular who have also been impacted with floods to varying degrees in the region.

At this stage, the financial implications of the flooding on the Company are unknown, with any impact dependent on the extent and duration of the flooding. The Company will update the market as the situation evolves and more information becomes known.
