## 2022 AGM CEO UPDATE

Delivering and growing value in 2022 and beyond

ASX: OEL

## Disclaimer and important notices

#### **Forward Looking Statements**

This presentation contains "forward-looking statements" that are subject to risk factors that are associated with oil and gas businesses. It is believed that the targets reflected in these statements are reasonable, but they may be affected by a variety of variables and changes in underlying assumptions which could cause actuals to differ materially, including but not limited to: results or trends for future operations, drilling results, projections, intentions, or beliefs about future events may, and often do, vary from actual results and the differences can be material. Some of the key factors which could cause actual results to vary from those Otto expects include changes in natural gas and oil prices, the timing of planned capital expenditures, availability of resources, uncertainties in estimating proved reserves and resource potential and forecasting drilling and production results, operational factors affecting the commencement or maintenance of producing wells, the condition of the capital markets generally, as well as the Company's ability to access them, and uncertainties regarding environmental regulations or litigation and other legal or regulatory developments affecting Otto's business. Statements regarding future production are subject to all of the risks and uncertainties normally incident to the exploration for and development and production of oil and gas.

#### **Disclaimer**

This presentation includes certain estimates of proved, probable and possible reserves that have been prepared by the Company and are by their nature more speculative than estimates of proved reserves and accordingly are subject to substantially greater risk of being actually realized by the Company. The information in this presentation that relates to oil and gas reserves was compiled by Mr Ed Buckle, B.S. Chemical Engineer(Magna Cum Laude), a full-time contractor of the Company. Mr Buckle has more than 30 years relevant experience in the petroleum industry and is a member of The Society of Petroleum Engineers (SPE). The reserves included in this presentation have been prepared using definitions and guidelines consistent with the 2007 Society of Petroleum Engineers (SPE) / World Petroleum Council (WPC) / American Association of Petroleum Geologists (AAPG) / Society of Petroleum Evaluation Engineers (SPEE) / and Petroleum Resources Management System (PRMS). The reserves information included in this presentation are based on, and fairly represents, information and supporting documentation reviewed by Mr Buckle (ASX Listing Rule 5.42). Mr Buckle is qualified in accordance with the requirements of ASX Listing Rule 5.41 and consents to the inclusion of the information in this presentation of the matters based on this information in the form and context in which it appears.

We cannot assure you that all of our prospects will ultimately be prospective in all or any of the targeted zones, or that such acreage will ultimately be drilled or included in drilling units. Type curve metrics described herein refer to the Company's internal estimates of average per well hydrocarbon quantities and production profiles that may be potentially recovered from a hypothetical future well developed generally from the most analogous information available based on the average offset well performance of third-party operator wells. These quantities do not necessarily constitute or represent reserves. There is no assurance that the Company will achieve comparable results on its acreage and individual well results will vary.

Further, Otto expresses no view as to whether its joint venture participants will agree with, and support Otto's assessment of these opportunities presented within this presentation.

#### Terms used

## Otto Energy: delivering value

1 Experienced management

A mature, opportunity-rich environment

2 Maximizing our base

A diverse, high-margin portfolio

3 Fiscal discipline

Leveraging a strong balance sheet to deliver both inorganic and organic growth

4 Phased growth

Creating growth access through rigorous inorganic opportunities evaluation

5 Greater shareholder returns

Build company size and scale through a highly disciplined approach to capital management

## Otto – Balance Sheet Strong - Debt Free Enterprise

**LEADING KPI'S** 

LAGGING KPI'S

# PILLAR 01 Maximize

#### Maximize Base Business Delivery

Optimize production delivery from the existing assets within our portfolio safely and sustainably. Simplify our business through the continued targeting of cost reductions and efficiencies in order to drive lowest operating costs and breakeven costs of supply and deliver highest viable margin returns.

# PILLAR **02**

# Optimize Organic Growth in Existing Assets

Commercialize the resources-to-reserves-to-production progression of lower risk and cost opportunities, resulting in higher margin returns in the existing base business.

## PILLAR

Deliver Inorganic Growth

Identify and capture growth in value returns through any or all three lenses:

**A:** Further lower risk, higher margin infrastructure-led prospect participation.

**B:** Value accretive acquisitions, sales or mergers.

C: Direct potential to return to shareholders via dividend, stock buybacks or distributions.

#### **DRIVEN BY**

## TRANSFORM OEL TO BUILD SCALE Capture future value initiatives

 Otto to leverage fiscal and operating portfolio to position itself to create industry scale

2024

2023

#### **BUILD THE COMPANY**

Maximising inorganic and organic growth opportunities

· Develop/deliver on existing field growth

• Leverage technical and commercial access to 4-6 drilling options

Pursue/capture PDP acquisitions

· Sell/merge assets or companies

2022

#### **REBASE THE COMPANY**

Drive performance excellence and transparency in our delivery

· Strengthen balance sheet

· Establish disciplined low cost operating model

Overhaul processes and practices to enhance transparency

2021

2020

#### EFFICIENT PROCESSES AND PRACTICES

PEOPLE AND ORGANIZATION

## **OEL – Disciplined Capital Management**

Our Disciplined Technical and Operating Model provides framework for sustainably creating value

#### **Exploration**

Lower risk infrastructure led

#### Development

Prioritize on Gulf conventional gas and oil

#### **Production**

Target lower carbon intensity gas and liquids operations

#### Marketing

Maximize netback pricing on assets

#### **Build diversification of Gulf portfolio via:**

- A. PDP Acquisitions,
- B. Drill Participation (4 6) quality wells/yr
- C. Portfolio management

#### TO DELIVER:

- 1. Increasing Production and 100+% RRR
- Portfolio Free Cash Breakeven at US\$15 US\$20/BOE
- 3. Gearing at 20-30% through the cycle, pre-major growth and up to 50% including major growth
- 4. Debt to Equity Ratio < 50%
- 5. ROACE > 15%
- 6. DROI(15) > 25%

#### Returns to Shareholders

Distributions via sale, special dividends or buybacks

#### Debt repayments

Leverage sources of capital to fund

#### Grow Reserves / Resources

Target 4-6 key play concepts per year as well as strategic PDP acquisitions

#### Fund major growth to achieve scale

Buy / Sell / Merge

## FY 22 Highlights

Set against the backdrop of the past year's complexities, Otto's strategy, with together its excellent operational results, and strong oil and gas pricing environment has enabled us to deliver one of the best financial results in our company's history. Post release of these financials, further have announced we are now debt free and hedge free from October 1

# Capital Allocation Framework Clear Target Investment Criteria

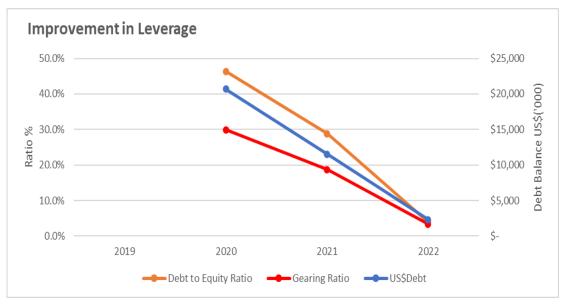

Our capital allocation framework sets clear target investment criteria for oil and gas investments we are targeting. Using these criteria while maintaining balance sheet and financial discipline allows us to build a diversified folder which is robust against changes in pricing and demand.

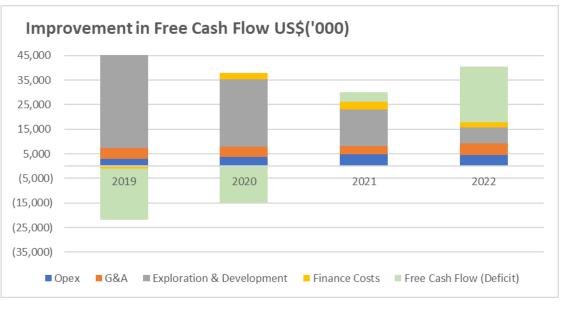

OIL AND GAS ONSHORE AND OFFSHORE GULF OF MEXICO	KEY ATTRIBUTES
INVESTMENT FOCUS	<ul> <li>Generate high returns to continue funding growth from existing cash flows</li> <li>Leverage existing infrastructure to lower costs of development and reduce risks</li> </ul>
TARGETED CHARACTERISTICS	<ul> <li>High cash flow generation</li> <li>Shorter payback periods</li> <li>Quick to tie-in to markets</li> <li>Multiple market access potentials</li> <li>Resilient to commodity pricing</li> <li>Upside potential</li> </ul>

#### Focused on maintaining strong liquidity and competitive finance costs

- Organic growth funded by Balance Sheet and
- Leveraging debt capital as appropriate
   (Tranche A2 of US\$10 MM and Tranche B of US\$20MM+)

# FY 2023 guidance ranges for performance Compared to FY 2022 actual delivery

	Performance category	FY 22 (act.)	FY 23 guidance range
Metrics to deliver fiscally	- Production (WI)(MMBOE)	0.845	0.90 - 1.05
disciplined performance	- Capex spend (US\$MM)	6.5	15.0 – 20.0 *
	- Opex FLC spend (US\$MM)	3.1	5.5 - 7.0
	- NFLC spend (US\$MM)	5.5	5.0 - 6.0
