

2 February 2023

CORPORATE PRESENTATION - TUMAS DEFINITIVE FEASIBILITY STUDY

We enclose the corporate presentation following the release of the results of the Tumas Definitive Feasibility Study.

JOHN BORSHOFF
Managing Director/CEO
Deep Yellow Limited

This ASX announcement was authorised for release by Mr John Borshoff, Managing Director/CEO, for and on behalf of the Board of Deep Yellow Limited.

Building a Global TIER-1
Uranium Company

Corporate Presentation with Tumas DFS Focus

2 February 2023

www.deepyellow.com.au

Disclaimer

Disclaimer

This presentation has been prepared by Deep Yellow Limited ABN 97 006 391 948 (Company or Deep Yellow) for general information purposes only. The presentation does not constitute a prospectus or equivalent document nor does it constitute financial product or investment advice. It does not take into account the investment objectives, financial situation or particular needs of any investor.

The presentation is not and should not be considered as an offer or invitation to subscribe for or purchase any securities in the Company, or as an inducement to make an offer or invitation with respect to those securities. No agreement to subscribe for securities in the Company will be entered into on the basis of this presentation.

The presentation has been prepared by the Company based on information available to it. Due care and attention has been taken in the preparation of this presentation, however the information contained in this presentation (other than as specifically stated) has not been independently verified for the Company or their respective directors and officers, nor has it been audited. Accordingly, the Company does not warrant or represent that the information contained in this presentation is accurate or complete. To the fullest extent permitted by law, no liability, however arising, will be accepted by the Company, or their respective subsidiaries, directors, officers or advisers, for the fairness, accuracy or completeness of the information contained in the presentation. No responsibility or liability is assumed by the Company or their respective subsidiaries, directors, officers or advisers for updating any information in this document or to inform any recipient of any new or more accurate information or any errors of mis-descriptions of which the Company or any of its respective directors, officers or advisers may become aware.

Financial information

All dollar values are in Australian dollars (A\$ or AUD) unless otherwise stated. Amounts, totals and change percentages are calculated on whole numbers and not the rounded amounts presented. This presentation includes certain historical financial information extracted from audited consolidated financial statements and information released to ASX (collectively, the Historical Financial Information). The Historical Financial Information is presented in an abbreviated form insofar as it does not include all the presentation and disclosures, statements or comparative information as required by the Australian Accounting Standards (AAS) and other mandatory professional reporting requirements applicable to general purpose financial reports prepared in accordance with the Corporations Act.

Past performance

Past performance metrics and figures (including past share price performance of the Company), as well as pro forma financial information, included in this Presentation are given for illustrative purposes only and should not be relied

upon as (and is not) an indication of the Company or any other party's views on the Company's future financial performance or condition or prospects. Investors should note that past performance of the Company, including in relation to the historical trading price of the Company's shares, mineral resources, costs and other historical financial information cannot be relied upon as an indicator of (and provides no guidance, assurance or guarantee as to) future performance, including the future trading price of shares in the Company. The historical information included in this Presentation is, or is based on, information that has previously been released to the market.

Forward looking statements

This presentation contains "forward-looking information" that is based on the Company's expectations, estimates and projections as of the date on which the statements were made. This forward-looking information includes, among other things, statements with respect to the pre-feasibility and any feasibility studies, the Company's business strategy, plan, development, objectives, performance, outlook, growth, cash flow, projections, targets and expectations, mineral resources, results of exploration and related expenses. Generally, this forward-looking information can be identified by the use of forward-looking terminology such as 'outlook', 'anticipate', 'project', 'target', 'likely', 'believe', 'estimate', 'expect', 'intend', 'may', 'would', 'could', 'should', 'scheduled', 'will', 'plan', 'forecast', 'evolve' and similar expressions. Persons reading this presentation are cautioned that such statements are only predictions, and that the Company's actual future results or performance may be materially different. There can be no assurance that actual outcomes will not differ materially from forward-looking statements. Forward-looking information is subject to known and unknown risks, uncertainties and other factors that may cause the Company's actual results, level of activity, performance or achievements to be materially different from those expressed or implied by such forward-looking information. Forward-looking information is developed based on assumptions about such risks, uncertainties and other factors which are subject to change, including but not limited to general business, economic, competitive, political and social uncertainties; the actual results of current exploration activities; conclusions of economic evaluations; changes in project parameters as plans continue to be refined; future prices of uranium; possible variations of ore grade or recovery rates; failure of plant, equipment or processes to operate as anticipated; accident, labour disputes and other risks of the mining industry; and delays in obtaining governmental approvals or financing or in the completion of development or construction activities. This list is not exhaustive of the factors that may affect the Company's forward-looking information. These and other factors should be considered carefully

and readers should not place undue reliance on such forward-looking information. The Company disclaim any intent or obligations to finalise, check, update or revise any forward-looking statements whether as a result of new information, estimates, or options, future events or results or otherwise, unless required to do so by law. Statements regarding plans with respect to the Company's mineral properties may contain forward-looking statements in relation to future matters that can be only made where the Company has a reasonable basis for making those statements. Competent Person Statements regarding plans with respect to the Company's mineral properties are forward looking statements. There can be no assurance that the Company's plans for development of its mineral properties will proceed as expected. There can be no assurance that the Company will be able to confirm the presence of mineral deposits, that any mineralisation will prove to be economic or that a mine will successfully be developed on any of the Company's mineral properties.

Previously reported information

Namibian Mineral Resources

This Presentation contains estimates of Mineral Resources, Ore Reserves, Production Targets and Exploration Results of the Company. The Company confirms that it is not aware of any new information or data that materially affects the information included in previous announcements and in particular that announcement released to the market on 2 February 2023 entitled 'Strong Results from Tumas Definitive Feasibility Study'. All material assumptions and technical parameters underpinning the Mineral Resource and Ore Reserve estimates continue to apply and have not materially changed.

Australian Mineral Resources

Where the Company references exploration results, Mineral Resource and Ore Reserve estimates and ASX Announcements made previously it confirms that the relevant JORC Table 1 disclosures are included with them and that it is not aware of any new information or data that materially affects the information included in those ASX Announcements and in the case of Mineral Resources and Ore Reserves, that all material assumptions and technical parameters underpinning the estimates in the Announcements continue to apply and have not materially changed.

Refer to <https://www.deeptyellow.com.au/> or www2.asx.com.au for all prior announcements referenced.

Rounding

A number of figures, amounts, percentages, estimates, calculations of value and fractions in this Presentation are subject to the effects of rounding. Accordingly, the actual calculation of these figures may differ from the figures set out in this Presentation.

01

Introduction

DFS Results Confirm World-Class Uranium Project

Experienced Board and management with a long history in Namibia and uranium development

Capital Structure

Enhanced financial strength and financing flexibility to fast-track funding and development timelines, once uranium prices reach incentive levels

A HIGHLY EXPERIENCED TEAM WITH A PROVEN TRACK RECORD

- Proven and successful track record of exploring, developing, financing and operating uranium projects
- Experienced team is led by John Borshoff (48 years uranium experience), with the Board chaired by Chris Salisbury (11 years uranium experience)
- Technical team led by Darryl Butcher (26 years uranium experience), who brings significant uranium development experience from Kayelekera Uranium Mine (Malawi) and Langer Heinrich Uranium Mine (Namibia)
- Dustin Garrow has more than 40 years professional experience in global commercial nuclear fuel markets,
- Collectively one of the largest and most experienced uranium teams on the ASX

Globally Diversified and Sizeable Portfolio

- Project portfolio provides diversity by asset, stage of development and geographic location
- Largest uranium resource base of any ASX-listed company
- Uniquely positioned as one of the few uranium companies globally able to execute to development and production, with credible multi-mine asset exposure

M&A Strategy Has Delivered Increased Global Scale

- Deep Yellow has the **largest uranium resource base** of any ASX-listed company, with an **attributable Mineral Resource base** of 389Mlb
- Once in production, Deep Yellow will be the **largest pure-play uranium producer on the ASX**
- Deep Yellow operates in **Tier-1 mining jurisdictions**, with minimal exposure to potential geopolitical disruptions
- **Balance sheet strength provides flexibility** to fund and execute dual-pillar (organic and inorganic) growth strategy

Global Uranium Listed Peers by Attributable Resources⁽¹⁾ (M+I+I) (Mlb)
 (As at August 2022 being date of Vimy Resources acquisition – refer Appendix)

Source: Public company information, websites, presentations; public feasibility studies; technical reports and drilling updates; Note 1: Attributable Resources sourced from the latest feasibility study, preliminary economic assessment, drilling update, and/or technical report; Note 2: Uranium Energy Corp includes deposits which have been acquired however the transaction may not yet have closed; Note 3: Analysis only includes key listed peers of Deep Yellow and Vimy i.e. excluding other companies such as Cameco or Kazatomprom; Note 4: Resource numbers include M+I+I (Measured, Indicated, and Inferred and historic resources); (1) Reflects resource base for each listed peer presented on a % ownership stake basis (rather than a 100% ownership basis), thus only reflecting the attributable interest in each deposit's respective resources; (2) Deep Yellow resource base assumes 100% ownership of Tumas, Tubas and Omahola and 85% ownership of Aussinanis. Oponona has an option to acquire 5% of the Reptile Project, however the option is yet to be exercised

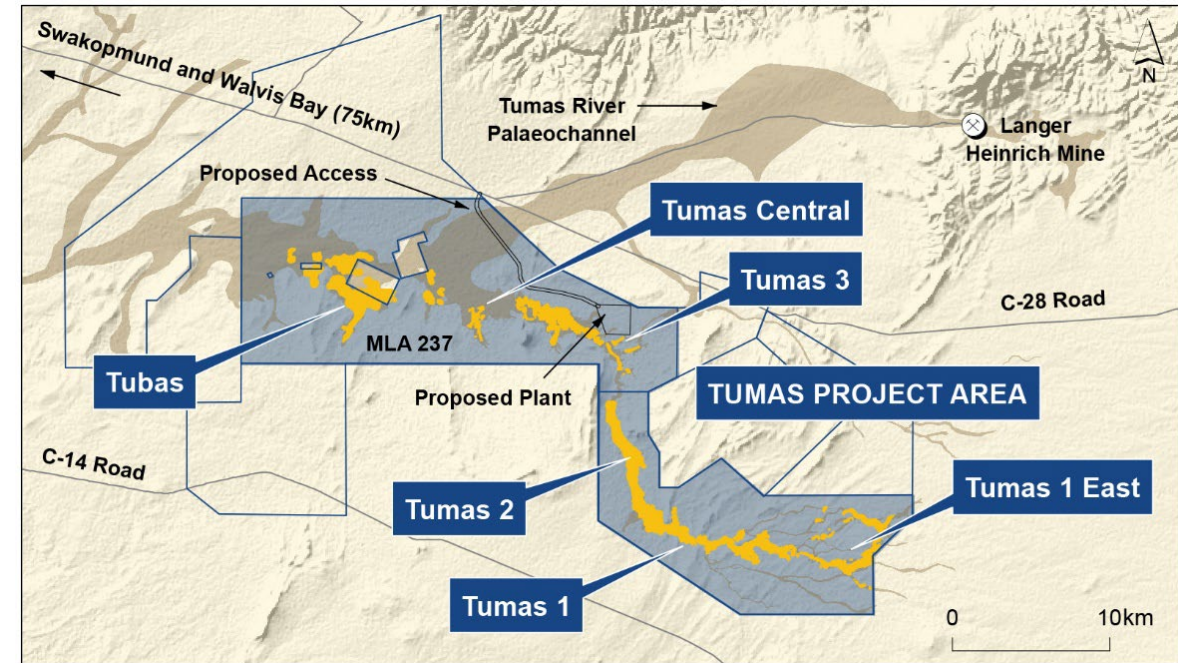

02

Tumas DFS Confirms Tier-1, Long-Life Operation

Flagship Tumas Project Overview

- Similar to Langer Heinrich deposit, an operation very well understood by the Deep Yellow team
- Exploration since early 2017 has increased the Mineral Resource fourfold
- Ore Reserves of 67.3Mlb increased by 120% in CY2021
- 22.5-year LOM achieved
- Inferred Resources of 49.5Mlb available to further expand Ore Reserve base, with potential to add a further 10+ years to LOM
- 40% of the prospective Tumas channel remains to be tested, providing significant scope for further increases to LOM
- Project supported by:
 - grid power
 - existing water supply
 - land (sealed road access, sea (Class 7 port) and air (international) transport infrastructure)

DFS Delivers Strong Results

The DFS builds on the Tumas PFS update released in Oct 2021 involving four years of comprehensive studies and engineering

Capex & Opex cost predicted accuracy range of -10% to +15% with a reference date of Q4 2022

DFS included extensive tendering process and cost validation

High standard utilising Ausenco FS protocols and engineering; and Deep Yellow in-house expertise

The improved results from the PFS to the DFS have been significant

- 20% increase in annual production rate to 3.6Mlbpa
- De-risking of capital and operating cost estimates

DFS results remain robust, despite the headwinds of a high mining inflation environment

Results represent a strong-investment case

Deep Yellow Board approve proceeding to Front End Engineering and Design (FEED)

Operational and Financial Growth from PFS

PARAMETERS	UNIT	DFS (Feb '23)	PFS Update (Oct '21)	Delta
Nameplate process throughput	Mtpa	4.15	3.75	+11%
Head Grade	ppm U ₃ O ₈	340	345	-1.5%
Initial LOM	Years	22.25	25.75	-14%
Total mineral resources	Mlbs	114	114	-
Total ore reserves	Mlbs	67.4	68.4	-1.5%
Annual production (U ₃ O ₈ max)	Mlbs pa	3.6	3.0	+20%
Annual production (V ₂ O ₅ max)	Mlbs pa	1.15	0.96	+20%
Initial CAPEX	US\$M	372	295	+26%
Capital cost per annual pound U ₃ O ₈	US\$	103	98	+5%
Capital estimate reference date		Q4 2022	Q3 2020	2.25y
Operating cost reference date		Q4 2022	Q3 2020	2.25y
Cash operating costs (C1)	US\$/lb U ₃ O ₈	34.68	28.39	+22%
LOM total operating costs (Real)	US\$/lb U ₃ O ₈	39.39	32.89	+20%
All-in Sustaining Costs (AISC)	US\$/lb U ₃ O ₈	38.72	31.76	+22%
NPV (ungeared) ²	US\$M	341	410	-17%
IRR (ungeared)	%	19.2	23.0	-16%

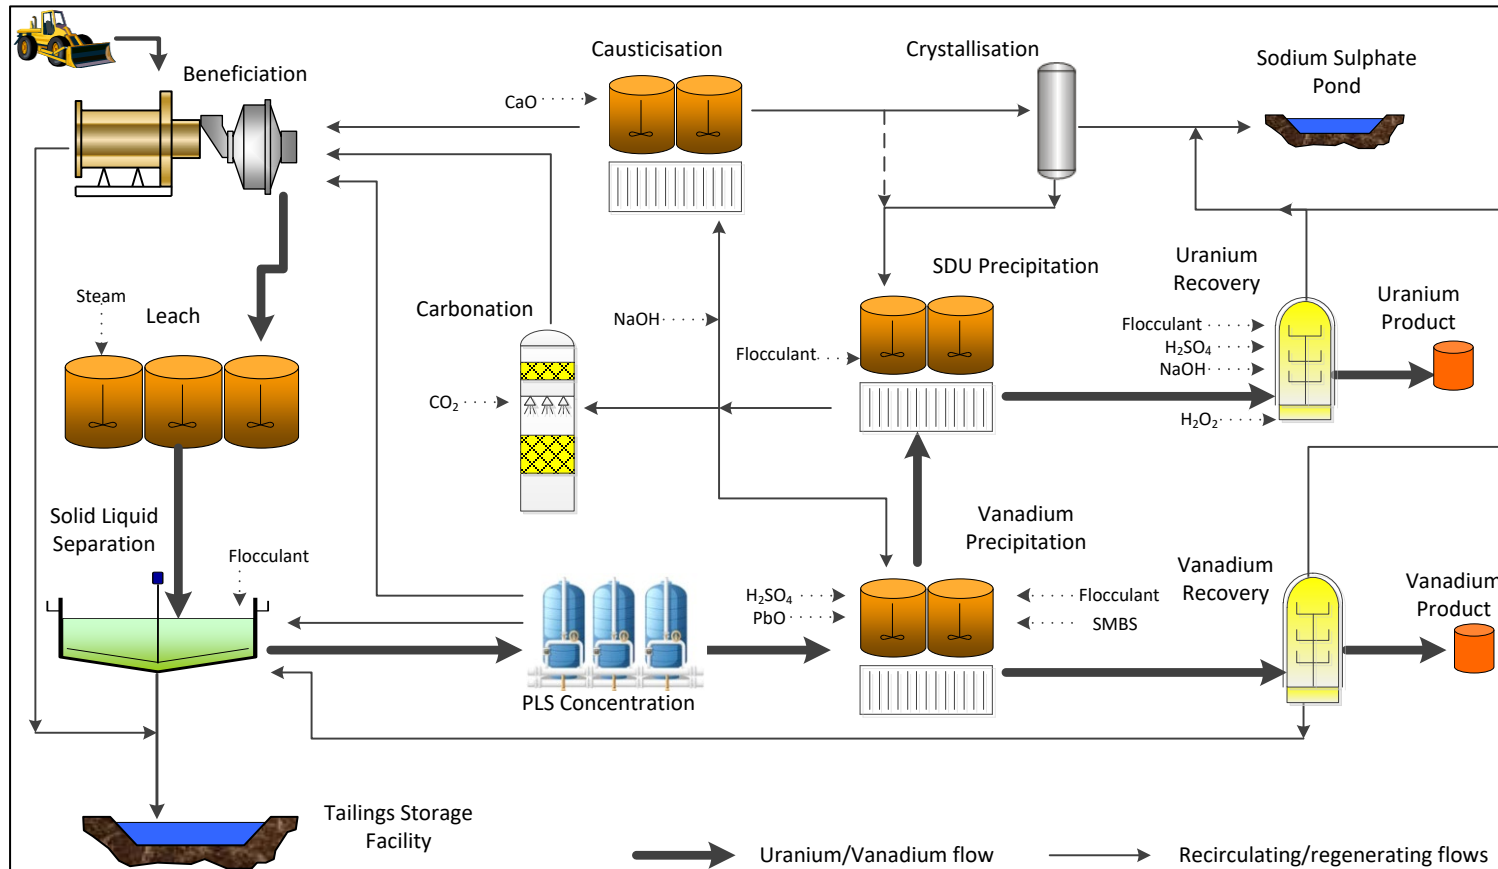

KEY FEATURES

- Production capacity increased from 3Mlbpa to 3.6Mlbpa
- Process throughput increased from 3.75Mtpa to 4.15Mtpa
- 4.15Mt & 3.6Mlbpa reduced LOM to 22.25 years – capacity to extend with remaining Inferred Resources and 40% of untested Tumas
- Vanadium production increased by 20% to 1.15Mlbpa
- Robust NPV and IRR

Optimised Processing Route

PROCESS CONSISTS OF:

- Beneficiation to reject 55% of ROM mass to a coarse tailing
- Atmospheric leach at 90°C to extract uranium and vanadium
- Counter current decantation (CCD) to wash leached metals and reagents to pregnant leach solution (PLS)
- Ultrafiltration (UF) and nanofiltration (NF) to concentrate the PLS
- A refinery section to first remove vanadium from the circuit as a value by-product and then uranium
- Vanadium packaging
- Uranium roast to U_3O_8 and packaging
- Reagent recycle
- Tailings disposal with tailings decant water recovery and recycle

Mine Production Schedule

KEY FEATURES

- Treating 4.15 Mtpa to produce up to 3.6Mlbp a U_3O_8 and 1.15Mlb V_2O_5 (vanadium by-product)
- Project LOM of 22.25 years based on existing ore reserves
- Schedule maintains 3.6Mlbp a for 10 Years after which it declines due to ore grade
- Additional resources likely to push to a +30-year operation and maintain 3.6Mlbp a production for an extended period

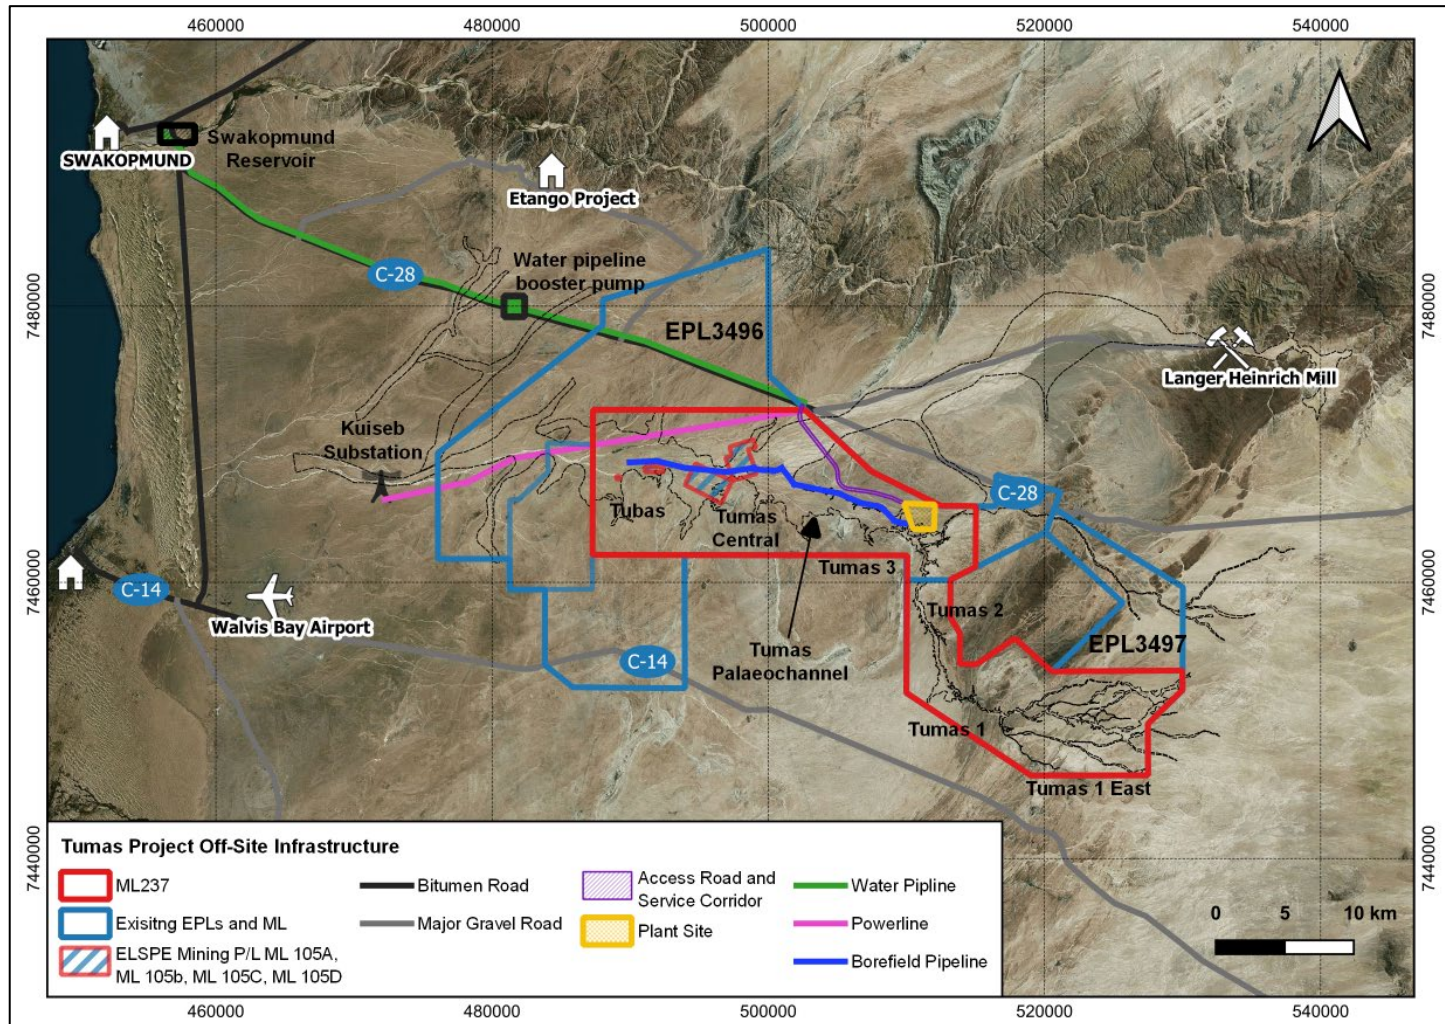

Operating Costs

Operating Costs US\$ (Real LOM)	LOM	Per t fed	Per lb
Converter Costs	23.44	0.26	0.37
Transport & Shipping	40.15	0.44	0.63
Mining as incurred during production	921.49	10.17	14.45
Processing	1,167.45	12.89	18.31
Maintenance & Engineering	60.54	0.67	0.95
Site Management and Administration	107.10	1.18	1.68
SHR	16.51	0.18	0.26
Environment	5.13	0.06	0.08
HR	1.88	0.02	0.03
Corporate & Marketing Costs (incl. Product Based Marketing Cost)	0.86	0.01	0.01
State Royalty	127.40	1.41	2.00
Export Levy	11.83	0.13	0.19
Total Operating Costs as incurred during Production	2,483.77	27.42	38.95
Pre-Production Mining Operating Cost transferred to Inventory	28.57	0.32	0.45
Total Operating Costs as Reported under Cash Costs	2,512.35	27.74	39.39

KEY POINTS

- Operating cost estimate reference date is the fourth quarter of 2022
- Estimate is considered to have an accuracy of -10%, +15%
- Mining costs - mining will be undertaken on a contract-mining basis
- Processing costs:
 - Labour and maintenance considered fixed cost
 - 50.5% of processing costs made up of reagents and consumables. Of these 31% is HFO, 18% Na₂CO₃, 26% water, 7% flocculant and 6% lime

Infrastructure

Existing

- Walvis Bay Port – Class 7 shipping located 80 km from site
- Walvis Bay International Airport located 75 km from site

During Construction

- Infrastructure for mining fleet provided by mining contractor
- 13.5 km site access road connects to the C28 (sealed road)
- Connected to the Namibian grid through a purpose-built dedicated 45.1 km 132 kV power line
- Power line supplemented by a 20 MW solar farm installed and operated by a third party under an independent power producer arrangement
- Water via 3GL/yr 65km pipeline

Project Upside

Significant Exploration Upside

49.5Mlb of Inferred Resources already exist for conversion to Reserves

40% of Tumas Palaeochannel untested

Potential to extend LOM beyond 30 years

Beneficiation

Reduce size and power consumption

TSF

Improve water recovery from TSF to further reduce purchased water consumption

CCD

Alternative flocculants to reduce dosage

PLS

Alternate nanofiltration membranes to improve recoveries

Adopting World Class ESG Initiatives

ENVIRONMENT

- Process plant to produce benign tailings stream – endorsed by CSIRO
- Solar farm to lower CO₂ emissions by 850,000t¹ over LOM
- Uranium produced over LOM will displace 34.2Mt of coal, resulting in reduction of CO₂ emissions of 89.3Mt² over LOM

SOCIAL

- 600+ jobs during construction
- Project will create ~520 direct jobs including site contractors and a further ~1,900 to 2,550 indirect jobs
- Strong community involvement over past 10 years focused on
 - educational support
 - empowering communities through sport
 - promoting a sustainable environment
 - health initiatives
- Community projects align with the UNSDG and the National Development Plans of Namibia

GOVERNANCE

- Experienced, independent and diverse Board
- Strong and effective governance framework
- Focus on accountability, risk management and ethical conduct
- Maiden Sustainability Report released in 2020
- ESG framework continues to develop

03

Uranium is Critical for a Clean Energy Future

Electricity – We Need More and More

The **bull market** for specific commodities is borne out of need **to produce cleaner electricity in ever-increasing amounts** over the long term

Growth without fossil fuel will be an enormous task – never mind replacing 70% of current global electricity with non-fossil origin in 28 years

This changeover already displaying ominous signs – commodity shortages, creation of a long term global energy crisis, significantly higher electricity prices

True **limitation of renewables** as the one-shot panacea **is being exposed and has limits**

Transition changes already resulting in a **8-fold increase in the price of thermal coal**

Electrical transport will place huge additional pressure for even more global electricity and the renewables industry as it stands will be unable to deliver very much beyond 6 hours a day

Price Indicators /lb*

Spot US\$51:00

Mid-Term US\$53.00

Long-Term US\$53.00

*TradeTech published prices as at
01 February '23*

Nuclear, Nuclear & More Nuclear

Nuclear is the clear winner and the uranium industry is well positioned for significant value uplift in global energy transition

Dozens of major economies aligning with their **governments demanding more nuclear**, to get back on track to grow energy availability and making electricity cheap again

Nuclear is the **only viable option in the mid to long term** to provide baseload power supply

Stark realities now facing the world on how to manage the enormous challenges ahead

Renewables only part of the solution – limited dispatch capability

Nuclear can do this easily, 24 hours a day:

- Lowest carbon footprint (UNECE³ analysis Sept 2021)
- Lowest material requirement
- Lowest land usage component
- Best safety record of all technologies
- The lowest cost per unit energy (IEA⁴ analysis 2020)

Looking Ahead – Key Workstreams for next 6-12 Months

TUMAS PROJECT	MULGA ROCK	ALLIGATOR RIVER	M&A
<ul style="list-style-type: none">• Further focused test work continuing to optimise Tumas Project – Q1/Q2 2023• Grant of MLA 237 – mid 2023• Resource upgrade drilling west of Tumas 3 deposit – mid 2023• Completion of FEED – Q3/Q4 2023• New resource statement – Q3 2023	<ul style="list-style-type: none">• 600-800 aircore drill program for variability testing and grade control test pattern – Q1/Q2 2023• Completion of test work for critical mineral and rare earth element analysis – Q3 2023• Commencement of engineering for revised DFS, incorporating new parameters for value uplift – mid 2023• New resource upgrade incorporating uranium, critical minerals and rare earths expanded mining footprint with approved area – Q3 2023	<ul style="list-style-type: none">• Desk top prospectivity appraisal to define regional exploration target corridor for concurrent investigations – Q1/Q2 2023• New resource estimate for Angularli Deposit – Q2 2023• New drilling program commencement – Q3 2023	<ul style="list-style-type: none">• Continued focus on consolidation to develop larger scale with high quality conventional mining assets – Ongoing

Emerging, Tier-1, Geographically Diverse Uranium Producer

Deep Yellow is successfully establishing the right building blocks to create a Tier-1 mining company:

- Tumas Project –approved to go ahead to FEED and commencement of project financing for FID decision H1 2024
- Mulga Rock Project currently 15-year LOM (3.5Mlbpa)with strong value uplift potential by inclusion of critical minerals, rare earth elements and additional uranium into a larger project with an extended LOM
- Extensive exploration portfolio (Omahola and Alligator River) available to increase production capacity
- Largest uranium resource base of any ASX-listed uranium company

Uranium market backdrop creates exceptional opportunities – growing recognition of nuclear power as a clean and reliable energy source – Deep Yellow very well-placed to supply this growing market

Continued focus on consolidation by leveraging newly-created platform and acquisition currency

Primary focus on developing a globally diversified, Tier-1 uranium platform producing 10+Mlb p.a.

Deep Yellow is on a pathway to becoming a reliable and long-term uranium producer, able to provide production optionality, security of supply and geographic diversity

Deep Yellow

Total Reserves (Global)	111.1	12.3	97.3	109.6	109.6

1. Deep Yellow currently owns 100% of Tumas. Oponona has an option to acquire 5% of the Project however the option is yet to be exercised.
2. Totals may not match area tonnes due to rounding.

Notes:

For the Namibian Resources / Reserves

- XRF chemical analysis unless annotated otherwise. eU₃O₈ – equivalent uranium grade as determined by downhole gamma logging.
- Where eU₃O₈ values are reported it relates to values attained from radiometrically logging boreholes.
- Gamma probes were calibrated at Pelindaba, South Africa in 2007. Recent calibrations were carried out at the Langer Heinrich Mine calibration facility in July 2018 and September 2019.
- During drilling, probes are checked daily against standard source.
- All metrics presented on a 100% ownership basis (apart from the “Attributable Resources” column)

For the Australian Resources Reserves

- Tonnes = metric dry tonnes; Appropriate rounding has been applied and rounding errors may occur.
- Using cut combined U₃O₈ composites (combined chemical and radiometric grades).
- Metallurgical plant recovery factors are not applied to total metal content.
- Using chemical U₃O₈ composites from drill core.
