## **Update to the incident at Dugald River**

Further to our announcement yesterday, Perenti provides an update in relation to the incident at the Dugald River underground mine in Cloncurry, Queensland.

Rescue efforts continued overnight as Barmingo worked closely with MMG and relevant authorities to undertake and progress the search and rescue operation.

The rescue team have employed the use of drones, void scanning technology and video imagery and this has enabled them to locate the light vehicle that we believe the two missing employees were driving.

The rescue team have been working throughout the night including with the use of heavy underground mining equipment to gain access to the vehicle.

Managing Director & CEO of Perenti, Mr Norwell, said the highly skilled mine rescue team is focused on executing the rescue operation as quickly and safely as possible.

“While the situation is still evolving, we are in contact with the family members of our missing team members and Perenti is providing support to their colleagues and the rescue team.

“Everyone at Perenti is feeling the impact of this incident and whilst we hold deep concerns for the safety of our colleagues, we continue to be hopeful that a positive outcome can be achieved.”

We will provide further updates as relevant information becomes available.
