Praemium today provided its financial results for the half year ending 31 December 2022. Strong net inflows of \$1.0 billion (up 35% on the half year to 30 June 2022), positive equity market valuations and improved cash administration fee contribution provided strong top line momentum. Continuing business revenue grew 17% to \$35.4 million. This was augmented by disciplined cost constraint in a highly inflationary environment, exacerbated by tight labour availability and high workforce mobility. Costs were held to \$24.1 million, up 6% on the prior comparative period (pcp – half year to 31 December 2021).

### Key financial results for the year

Divestment of Praemium's International operations was successfully completed on 30 June 2022. Praemium's continuing business is its Australian segment and the sole focus of this release.
