

Emeco Holdings Limited

Operational & Trading Update

Canaccord Conference Perth

June 2023

SUMMARY

Our unique business model and strategy, continue to deliver solid earnings in challenging market conditions. Operating EBITDA guidance narrowed to \$248 – 252 million¹

Operational & Trading Update

- Demand for our equipment and services has driven strong half on half earnings growth
 - New and expansion projects secured during the period will drive strong momentum going into FY24
 - Revenue mix continues to evolve as we increase the number of fully maintained projects, adding tenure to the portfolio, creating value for our customers and differentiating our capability from our competitors
 - Strong workshop demand drove H2 earnings growth for our Force business
 - Solid H2 turnaround performance for PnP
- Solid H2 margin performance, with focus on repricing, equipment deployment and business improvement, to mitigate cost inflation (labour and parts)
- FY23 Operating EBITDA guidance narrowed to \$248 – 252 million¹
- Sustaining net capex is at lower end of guidance range
- Net leverage ratio (net debt / EBITDA) expected to be around target of 1x

Competitive Advantage and Business Improvement

- Our unique business model positions us well to meet inflation challenges and to deliver strong returns to our shareholders
 - Low-cost, self-reliant midlife rebuild model with shorter lead times, longer asset life, improving return on capital
 - Enhanced service offering, utilizing technology and our component rebuild capability as a key service differentiator
 - Business improvement opportunities pursued to increase our competitive advantage

¹ Non-IFRS disclosure: Operating EBITDA excludes credit loss allowance of \$22.9 million pre-tax, as reported in 1H23 ASX results release

Operational Update

OPERATIONAL UPDATE

Strong demand for our fleet and services continues to drive revenue and earnings growth, whilst our operational focus remains on delivering strong returns

Rental - Eastern Operations

- The Eastern region is performing well with half on half revenue and EBITDA growth, driven by high demand for our equipment and new projects
- New and expansion projects continued to ramp up during the half, driving increased utilisation, positioning us for further growth in FY24
- Increase in fully maintained EOS projects, in line with our strategy to maximise value to the customer and increase project tenure. Our maintenance capability provides guaranteed available hours, enabling customers to drive equipment utilisation and hit production targets
- Margins stable, against a backdrop of cost inflation and more fully maintained projects

Rental - Western Operations

- Western region expected to deliver half on half EBITDA and margin growth, driven by deployment of fleet on fully maintained EOS projects and the successful placement of equipment into new projects
- Margin improvement reflects repricing and cost management initiatives
- The business continues to drive ESG initiatives, partnering with First Nations mining contractors to service projects for major mining houses

OPERATIONAL UPDATE

Strong demand for our fleet and services continues to drive revenue and earnings growth, whilst our operational focus remains on delivering strong returns

Force

- The Force workshops have had an excellent half with very strong activity levels driven by both internal and retail demand
- Force expected to deliver half on half EBITDA and margin growth
- Productivity and business improvement initiatives remain a key focus

PNP

- Solid turnaround performance. Mincor production now ramping up, through strong collaboration focused on project execution and delivery
- Successful redeployment of equipment into new and existing projects
- Good progress by new leadership in building management depth and capability and driving operational improvement, contractual performance and commercial management

Competitive Advantage

COMPETITIVE ADVANTAGE

Our unique business model provides a competitive advantage while creating value for our customers.

- **Low-cost midlife rebuild model** – in-house, low-cost capability to perform major equipment and component rebuilds through our Force Workshops, provides a cost advantage that shields us from component price increases and crucially provides reliability of supply of key components that keep our fleet working
- **Longer asset life** - Force has the ability to extend the life of our existing open cut and underground rental assets, in a cost-efficient delivery model, improving our return on capital
- **Enhanced service offering** - Technology as a key service differentiator and competitive advantage, including equipment monitoring capability to enhance customer asset management, planning, component monitoring and maintenance needs, delivering cost advantages to our customers
- **Access to skilled labour** - We have access to a large and skilled workforce located in key mining markets enabling Emeco to provide fully maintained solutions
- **Emeco Operating System (EOS)** - a data driven solution to monitor and manage asset, shift and carbon emission performance for customers

LEVERAGING OUR COST AND QUALITY ADVANTAGE

Our asset management, maintenance and rebuild capability drives reliability, cost and capital efficiency

- Force provides a cost effective equipment and component rebuild capability, which provides value for our customers and a competitive cost advantage for our rental business
 - Using Force components creates an opex and capex advantage vs competitors
 - 30% increase in use of Force components over past two years to counter parts price inflation
- Emeco has expanded our asset management function to manage risk and drive our competitive advantage
 - Long term planning allows us to drive rebuild demand through Force, improving inventory management and reducing supply chain risks
 - Proactive management of fleet performance through real time information on machine telemetry
 - Asset uptime maximised
- Our highly skilled Force and site maintenance teams are critical to Emeco driving cost and capital efficiency and maximising the quality and availability of our assets to our customers

LEVERAGING TECHNOLOGY AS A COMPETITIVE ADVANTAGE

Using data driven solutions to improve equipment performance

- EOS is a customisable production operating technology platform that tracks equipment performance in real time
 - Providing managers with tools to improve payload, dig rates, efficiency and machine utilisation, allowing our customers to make rapid and informed decisions to drive productivity and optimise costs from operations
 - EOS carbon module provides real time carbon emission data by asset, shift and site
- Our data collection technology is the key enabler of our asset health and component condition monitoring program, increasing component life and reducing maintenance spend
- We continue to invest in technology installation to support EOS roll out and to further improve the coverage of our fleet with component condition monitoring capability
- EOS is currently deployed at 5 major projects which comprise ~10% of our assets with a further 4 projects to be rolled out taking EOS contracted fleet to 20%

IMPORTANT NOTICES AND DISCLAIMERS

Reliance on third party information

The information and views expressed in this Presentation were prepared by Emeco Holdings Ltd (the Company) and may contain information that has been derived from publicly available sources that have not been independently verified. No representation or warranty is made as to the accuracy, completeness or reliability of the information. No responsibility or liability is accepted by the Company, its officers, employees, agents or contractors for any errors, misstatements in or omissions from this Presentation.

Presentation is a summary only

This Presentation is information in a summary form only and does not purport to be complete. It should be read in conjunction with the Company's FY22 and 1H23 financial reports. Any information or opinions expressed in this Presentation are subject to change without notice and the Company is not under any obligation to update or keep current the information contained within this Presentation.

Not investment advice

This Presentation is not intended and should not be considered to be the giving of investment advice by the Company or any of its shareholders, directors, officers, agents, employees or advisers. The information provided in this Presentation has been prepared without taking into account the recipient's investment objectives, financial circumstances or particular needs. Each party to whom this Presentation is made available must make its own independent assessment of the Company after making such investigations and taking such advice as may be deemed necessary.

No offer of securities

Nothing in this Presentation should be construed as either an offer to sell or a solicitation of an offer to buy or sell Company securities in any jurisdiction.

Forward looking statements

This Presentation may include forward-looking statements. Although the Company believes the expectations expressed in such forward-looking statements are based on reasonable assumptions, these statements are not guarantees or predictions of future performance, and involve both known and unknown risks, uncertainties and other factors, many of which are beyond the Company's control. As a result, actual results or developments may differ materially from those expressed in the statements contained in this Presentation. Investors are cautioned that statements contained in the Presentation are not guarantees or projections of future performance and actual results or developments may differ materially from those projected in forward-looking statements.

No liability

To the maximum extent permitted by law, neither the Company nor its related bodies corporate, directors, employees or agents, nor any other person, accepts any liability, including without limitation any liability arising from fault or negligence, for any direct, indirect or consequential loss arising from the use of this Presentation or its contents or otherwise arising in connection with it.

Non-IFRS Financial Information

This Presentation may use non-IFRS financial information including Operating EBITDA, Operating EBITDA margin, Operating EBIT, Operating EBIT margin and Operating NPAT, net debt and return on capital (ROC). These measures are used to measure both group and operational performance. A reconciliation of non-IFRS financial information to IFRS financial information is included in the presentation. Non-IFRS measures have not been subject to audit or review. Certain of these measures may not be comparable to similarly titled measures of other companies and should not be construed as an alternative to other financial measures determined in accordance with Australian accounting standards.
