

ASX RELEASE

15 August 2023

Mobile phone and seatbelt contract in QLD extended to include additional Acusensus 'Heads-Up' solutions

Highlights

- Variation of existing contract with the Queensland Department of Transport & Main Roads
- Addition of further Acusensus 'Heads-Up' solutions to support various regional locations in Queensland
- Additional solutions expected to commence operations by 1 December 2023 for a five-year period
- Revenue from contract variation to total approximately \$10.2m (inc. GST)

Acusensus Limited (ASX:ACE) (**Acusensus**), a technology company designing and developing artificial intelligence enabled road safety solutions, is pleased to announce an extension to its existing Mobile Phone & Seatbelt Safety Technology Enforcement Framework contract with the Queensland Department of Transport & Main Roads (DTMR). The revised contract between DTMR and Acusensus Australia Pty Ltd, a wholly owned subsidiary of Acusensus, will include additional Acusensus 'Heads-Up' solutions to support various regional locations in Queensland.

The initial Mobile Phone & Seatbelt Safety Technology Enforcement Framework contract was for a term of five years from 7 June 2021, with an option for DTMR to renew the Agreement for two further 12-month periods. The additional solutions are expected to commence by 1 December 2023 (following acceptance by DTMR) for a five-year period.

Revenue as a result of the variation to the contract is approximately \$10.2m (inc. GST) over the five-year period, resulting in total revenue over the lifetime of the contract with DTMR of approximately \$31m (inc. GST).

Acusensus Founder and Managing Director, Alexander Jannink, said, "We are very pleased to be extending upon the success of the program with the Queensland Department of Transport & Main Roads. This contract has resulted in reductions in mobile phone use across the Queensland road network, and increases in seatbelt compliance. These outcomes resulted in a reduction in crashes, and a reduction in road fatalities, as evidenced by the improving road casualty trends in Queensland in comparison to other jurisdictions in Australia. We look forward to further supporting the Queensland Government in its efforts to improve road safety in the state."

About Acusensus

Acusensus is a technology company that was founded in 2018 with a mission to design and develop artificial intelligence enabled road safety solutions. Collaborating with governments and commercial stakeholders to tackle distracted driving globally is Acusensus' first priority.

Acusensus has pioneered intelligent solutions that provide anywhere, anytime digital evidence that can be used in conjunction with law enforcement to drive behavioural change and improve road safety. Acusensus technology is used to detect and provide prosecutable evidence of distracted driving (mobile phone use), seatbelt compliance, speeding, railway crossing compliance and the monitoring of vehicles of interest.

Acusensus listed on the Australian Securities Exchange in January 2023. Acusensus is headquartered in Melbourne, Australia, with offices also in Sydney, Brisbane, London (UK) and Las Vegas (United States).
