HARVEST TECHNOLOGY EXPANDS DEPLOYMENT WITH 30 MORE NSI UNITS TO DEFENCE CONTRACTOR

June 27, 2024: Harvest Technology Group Limited (ASX:HTG) (**Company, Harvest, Group**) is proud to announce the deployment of an additional 30 NSI (Nodestream™ Integrated device) units to our defence partner, Guerrilla Technologies.

Continuing orders from Guerrilla Technologies highlight the growing collaboration and trust between our companies. The new units will further bolster Guerrilla Technologies' network and semi-autonomous field assets, enhancing their capability to manage sensitive operations in remote and challenging environments with unparalleled secure communications.

Our NSI units are crafted to excel under extreme conditions, featuring a compact single board computer design that ensures low power consumption, adaptability, and high-performance computing. With Nodestream™ software, these devices can transmit high-quality video, audio, and control data even on communication links with bandwidths as low as 100kbps even on contested networks. Weighing only 160g, each NSI unit incorporates 384-bit encryption, ensuring that critical data remains protected without compromising on portability or performance.

These additional NSI units exemplify Harvest Technology's commitment to delivering state-of-the-art communication solutions that address the strategic needs of the global defence sector.

Harvest Technology Group's CEO, Ilario Faenza, stated:

"We are very focused on growing our revenue via strong partners such as Guerrilla Technologies and supporting their Mission, which is "to design and build cost effective technologies in support of our clients specific needs. In doing so we aim to reduce harm to persons and or the environment through the eradication of Dirty, Dull or Dangerous jobs and work practices."."
