HARVEST DEFENCE DEPLOYMENT CONTINUES WITH 25 MORE NSI UNITS TO DEFENCE

5 August, 2024: Harvest Technology Group Limited (ASX:HTG) (**Company, Harvest, Group**) announces today the deployment of a further 25 NSI (Nodestream™ Integrated device) units to a defence partner.

This order follows the previous order for 30 NSI units announced on 27 June 2024, with a total order value of \$673,000 since January.

Our Nodestream Integrated (NSI) units are expertly engineered to perform exceptionally well in extreme conditions and offer our most compact interface. They feature low power consumption, adaptability, and high-performance computing, making them ideal for space-constrained environments where reliable operation is crucial. Equipped with Nodestream™ software, these devices can transmit high-quality video, audio, and control data even over communication links with bandwidths as low as 100 kbps, including contested networks. Weighing just 160g, each NSI unit includes 384-bit encryption to keep critical data secure while maintaining portability and performance.

Harvest Technology Group's CEO, Ilario Faenza, stated:

"We are thrilled to grow our relationships with our specialised partners to deliver market leading critical solutions to end customers in sectors such as defence. This underscores our unwavering commitment and capability to deliver Tier-1 solutions to one of the most demanding and critical sectors."
