ASX:14D

DIRECTORS SUBSCRIBE TO SPP

1414 Degrees Ltd (ASX: 14D) ("1414 Degrees" the "Company") is pleased to announce the Board of Directors have once again shown their confidence in the future of 1414 Degrees by subscribing a total of \$75,000 to the Share Purchase Plan (SPP) announced by the Company on 16 August 2024. This SPP presents an opportunity for eligible shareholders to extend their investment in 1414 Degrees.

Executive Chairman of 1414 Degrees, Dr Kevin Moriarty, commented:

"The Directors' involvement in the Share Purchase Plan highlights their confidence in 1414 Degrees' ability to realise near-term earnings potential, expedite hydrogen reactor development, decarbonise high-temperature industrial heat, as well as their commitment to enhancing shareholder value."

We would like to remind all eligible shareholders that the SPP is scheduled to close at 4:30pm (ACST) on September 13, 2024 (unless varied by the Directors in accordance with the Listing Rules and applicable law). We encourage all eligible shareholders to carefully consider this opportunity to join us in our renewed mission to decarbonise high-temperature industrial heat and contribute to global net-zero targets.

Eligible shareholders are able to view the documents and apply online by visiting www.computersharecas.com.au/14dspp.

Your continued support and participation remains vital to your Company's future.

AUTHORISED BY:

Dr Kevin Moriarty, Executive Chairman on behalf of the Board of Directors

ABOUT 1414 DEGREES LIMITED

1414 Degrees is a leader in industrial decarbonisation with its cutting-edge silicon-based solutions, enabling the alignment of energy supply with demand, fostering the widespread adoption of renewable energy. Our key technologies include:

SiBrick®: thermal energy storage technology safely and efficiently stores renewable electricity as latent heat, available for use on demand.

SiBox®: facilitates the transition to sustainable industrial processes, SiBox delivers consistent, high-temperature heat. It can be seamlessly retrofitted into heavy industry processes, offering a viable alternative to conventional energy sources.

SiPHyR™: methane pyrolysis reactor with integrated storage. SiPHyR will produce low-emission hydrogen and solid carbon using renewable energy sources.

1414 Degrees has showcased its capabilities through successful pilot projects that highlight the reliability and effectiveness of its solutions. SiBox has proven its ability to deliver high-temperature air or steam on demand from stored heat. The development of SiPHyR underscores our commitment to innovation and sustainability.

In 2019 the Company made the strategic purchase of the Aurora Energy Project (AEP) located near Port Augusta, South Australia. The project is a long-term renewable energy initiative to deliver reliable electricity to the region and National Electricity Market. The AEP has approval for 14D to pilot and demonstrate a large commercial scale version of the SiBox technology.
