

MARKET RELEASE

21 October 2024

NZX: GNE / ASX: GNE

FY25 Q1 Performance Report

The Huntly Portfolio demonstrated its flexibility during the period, with a third Rankine unit made available to the market and coal, gas and to a lesser extent, diesel utilised. Thermal generation of 1,281 GWh was up 52% on the prior comparable period (pcp)¹.

Chief Executive Malcolm Johns said, "The winter period demonstrated that the Huntly Portfolio is critical to New Zealand's energy security and the broader New Zealand economy. Now is the time for us to be working with the sector on long term energy flexibility and security products to ensure the potential for energy shortages is effectively managed. Genesis is fully focused on our part in this."

Despite heavy coal consumption during the period, stockpile levels increased as 11 shipments were delivered to Auckland and more recently Tauranga ports, before being transported by road and rail to our Huntly site. As at 30 September, there was 243 kt stored, including 11 kt equivalent for Security Product² counterparties.

During periods of price volatility Genesis was able to flex generation to align with wholesale prices. In periods of intra-day volatility, over a 1000 MW of generation flexibility was achieved.

Customer numbers increased moderately, up 0.4% across Q1 FY25. Fuels netback was strong, as higher wholesale gas and LPG prices were reflected in retail sales.

Gen35 strategy update

Genesis purchased 65% of New Zealand's leading EV charging infrastructure operator, Chargenet. The investment is a key enabler to secure a 30% share of the emerging EV value pool under the Gen35 strategy. Genesis is targeting an IRR of around 15% from the investment.

Construction at Lauriston solar farm continued, with the first, or golden row, installed, along with the main transformer. First generation remains on track for December 2024.

Development and delivery of the Huntly 100 MW/200 MWh battery and the Edgecumbe solar farm continued in line with expectations.

David Binnie joined Genesis Energy as Business Development Manager – Biomass on a 12 month assignment to lead the development of a biomass supply chain for electricity generation at Huntly Power Station, with a target of securing an annual supply of 300 kt by FY28.

Genesis' new customer billing platform is making good progress with the Frank build complete and on track for go-live in Q4 FY25.

¹ pcp refers to Q1 FY24.

² Security Products refer to Huntly Firming Options (HFO) and Market Security Option (MSO) contracts.

About Genesis Energy

Genesis Energy (NZX: GNE, ASX: GNE) is a diversified New Zealand energy company. Genesis sells electricity, reticulated natural gas and LPG through its retail brands of Genesis and Frank and is one of New Zealand's largest energy retailers with approximately 500,000 customers. The Company generates electricity from a diverse portfolio of thermal and renewable generation assets located in different parts of the country. Genesis also has a 46% interest in the Kupe Joint Venture, which owns the Kupe Oil and Gas Field offshore of Taranaki, New Zealand. Genesis had revenue of \$NZ3.0 billion during the 12 months ended 30 June 2024. More information can be found at www.genesisenergy.co.nz

Performance Highlights

- The Huntly Portfolio demonstrated its flexibility during the period, with a third Rankine unit made available to the market and coal, gas and to a lesser extent, diesel utilised. Thermal generation of 1,281 GWh was up 52% on the prior comparable period (pcp).
- Despite heavy coal consumption during the period, stockpile levels increased as 11 shipments were delivered to Auckland and more recently Tauranga ports, before being transported by road and rail to our Huntly site. As at 30 September, there was 243 kt stored, including 11 kt equivalent for Security Product ¹ counterparties.
- During periods of price volatility Genesis was able to flex generation to align with wholesale prices. In periods of intra-day volatility, over a 1000 MW of generation flexibility was achieved.
- Customer numbers increased moderately, up 0.4% across Q1 FY25. Fuels netback was strong, as higher wholesale gas and LPG prices were reflected in retail sales.

Gen35 strategy update

- Genesis purchased 65% of New Zealand's leading EV charging infrastructure operator, Chargenet. The investment is a key enabler to secure a 30% share of the emerging EV value pool under the Gen35 strategy. Genesis is targeting an IRR of around 15% from the investment.
- Construction at Lauriston solar farm continued, with the first, or golden row, installed, along
 with the main transformer. First generation remains on track for December 2024.
- Development and delivery of the Huntly 100MW/200MWh battery and the Edgecumbe solar farm continued in line with expectations.
- David Binnie joined Genesis Energy as Business Development Manager Biomass on a 12 month assignment to lead the development of a biomass supply chain for electricity generation at Huntly Power Station, with a target of securing an annual supply of 300 kt by FY28.
- Genesis' new customer billing platform is making good progress with the Frank build complete and on track for go-live in Q4 FY25.
 - 1. Security Products refer to Huntly Firming Options (HFO) and Market Security Option (MSO) contracts.

Glossary – Performance

Electricity	
Retail Sales Residential	Sales of electricity to residential customers
Retail Sales SME	Sales of electricity to small business customers
Retail Sales C&I	Sales of electricity to commercial and industrial customers
Wholesale Sales	Sale of generated electricity onto the spot market, excluding PPA settlements and ancillary revenue
Generation Costs	Direct generation costs, inclusive of fuels and carbon
Retail Purchases	Purchases of electricity on spot market for retail customers
Transmission and Distribution Costs	Total electricity transmission and distribution costs, connection charges, electricity market levies and meter leasing
Gas	
Retail Sales Residential	Sales of gas to residential customers
Retail Sales SME	Sales of gas to small business customers
Retail Sales C&I	Sales of gas to commercial and industrial customers
Wholesale Sales	Sales of gas to wholesale customers
Gas Cost	Purchase of gas for sale (excludes gas used in electricity generation)
Transmission and Distribution Costs	Total gas transmission and distribution costs, gas levies and meter leasing
LPG	
Bottled LPG Sales	Represents 45kg LPG bottle sales
SME & Other Bulk LPG sales	Represents SME and other bulk and third party distributors
Wholesale LPG Sales	Sales of LPG to wholesale customers
LPG Cost	Purchase of LPG for sale
Kupe	
Oil Sales	Sale of crude oil
Gas Sales	Sale of gas
LPG Sales	Sale of LPG

Glossary – Operational Metrics

5 / "	
Retail	
Brand Net Promoter Score	Based on survey question "How likely would you be to recommend Genesis/ Frank Energy to your friends or family?" Calculated on 3 month rolling basis.
Interaction Net Promoter Score	Based on survey question "Based on your recent interaction with Genesis/Frank, how likely would you be to recommend Genesis/Frank to your family/friends?"
	Calculated on 3 month rolling basis.
Customers	Electricity and gas customers are defined by single customer view, regardless of number of connections (ICP's)
Single Customer View	Represents unique customers which may have multiple ICPs
ICP	Installation Connection Point, a connection point that is both occupied and has not been disconnected (Active-Occupied)
LPG Customer Connections	Defined as number of customers
Gross Customer Churn	Defined as residential customers instigating a trader switch or home move
Net Customer Churn	Defined as percentage of residential customers that finalise in a period.
Resi, SME, C&I	Residential, small and medium enterprises and commercial & industrial customers
B2B	Business to Business, including both SME and C&I
Netback (\$/MWh, \$/GJ, \$/tonne)	Customer EBITDAF by fuel type plus respective fuel purchase cost divided by total fuel sales volumes, stated in native fuel units (excluding corporate allocation costs and Technology & Digital cost centre)
