Corporate

In conjunction with majority shareholder Rich Mark Development Group and Xingang Resources (HK) Limited the Company continues to assess investment opportunities and projects for acquisition or development.

Magnetite Range Project (Accent Resources NL 100%)

The Company's wholly owned Magnetite Range Project is located 350 km north of Perth and 250 km east of Geraldton in the Mid-West region of Western Australia (Figure 1). The tenements comprising the project straddle the boundary between Perenjori and Yalgoo shires.

The project contains a magnetite mineral resource of 523.3Mt grading 31.3% Fe (JORC2012).

Figure 1: Magnetite Range Project location plan.

An 18-hole geometallurgical diamond core drilling programme was completed during the second quarter of 2024 (Figure 2). During the third quarter, a downhole geophysical logging unit was mobilised to site to collect downhole logs of the 18 drill holes. The logging suite comprised magnetic susceptibility, dual spaced density, three arm calliper, optical televiewer and acoustic televiewer logging tools. The downhole geophysical log data has been loaded into Accents drillhole database for integration with other datasets.

The diamond drillhole collars were surveyed by a contract surveying company using a Trimble RTK DGPS.

Figure 2: Magnetite Range Project Diamond Drill hole location plan.

Once all of the diamond drill core had been received by Bureau Veritas laboratory in Perth, core was laid out for inspection and to enable the sampling and metallurgical testwork programme designs to be finalised. The programme has commenced with core cutting and preparation for head grade analysis. Davis Tube Recovery testwork will commence in the coming month along with compositing of samples for a suite of metallurgical tests.

Desktop prospectivity reviews of exploration licences E59/2719 and E59/2879 were completed during the reporting period. The reviews leveraged publicly available information from sources including company published reports (WAMEX), Geological Survey of Western Australia (GSWA) published geological mapping, company surface geochemical sampling and drillhole data available through openfile, aeromagnetics and Google Earth satellite imagery. The reviews form part of a regional target generation exercise that Accent is completing over the Magnetite Range tenement portfolio.

Planning and budgeting of exploration programmes in 2025 has commenced. It is envisaged that an additional RCP drilling program will be completed over the main magnetite banded iron formation as well as regional target testing and geological field reconnaissance. Environmental and heritage surveys to enable the next round of drilling have been scoped and are scheduled to commence early in the next quarter.

Norseman Gold Project (Accent Resources NL 100%)

The Norseman Gold Project occurs within a strongly mineralised portion of the southern Norseman-Wiluna greenstone belt and is located 5km south of the Norseman town site.

A JORC 2004 Code Mineral Resource for Iron Duke and Surprise deposits of **1,039,400 tonnes @ 1.8 g/t Au for 59,500 ounces** (99 percentile upper cut, 1.0 g/t Au lower cut off) was announced to the ASX on 26 November 2012. Over 70-80% of the resource is shallow, within 50m of surface.

An Aboriginal Ethnographic and Anthropological survey of tenements P63/2200 and P63/2154 and preliminary review of DPLH Place ID 2920 Munguni over the company's Norseman Gold Project including M63/657, M63/229, P63/1997, P63/2052, P63/2200 and P63/2153 was conducted during August 2023.

The aim of the investigation was to ascertain the impact of proposed exploration work and identify and consider any potential impacts to any archaeological and ethnographic sites located on tenements P63/2200 and P63/2154 identified on the survey.

Investigations found P63/2200 and P63/2154 do not contain any known Aboriginal Cultural Heritage (ACH). DPLH Site ID 2920 Munguni is a registered site with a footprint overlapping the entire Norseman project area. Advice has been sought concerning the management of this site, consultation with Ngadju and DBCA has commenced and is ongoing.

A mining lease application has been submitted to consolidate one mining lease (M63/657) and 4 prospecting licences (P63/1997; P63/2200; P63/2154 and P63/2052) together into one mining lease application. The mining lease application 'M63/682' was submitted on 1 July 2024 and is currently pending grant process.

Financial

Accent Resources held cash at bank of \$8,820,000 (as at 30th September 2024).
Exploration expenditure cash outflow for the quarter was \$527,000.
