

ASX RELEASE

11 December 2024

Mobile Phone & Seatbelt Technology Contract Expansion in QLD

Highlights

- Queensland Department of Transport and Main Roads has expanded its contract with Acusensus, close to doubling the number of trailer-based mobile phone and seatbelt enforcement units
- New trailer units to be progressively deployed over the next approximately 18 months, with each new unit to be utilised for an initial term of five years
- The incremental contract value associated with this contract variation is expected to total approximately \$27.4 million (excluding GST)

Acusensus Limited (ASX:ACE) (**Acusensus**), a technology company designing and developing artificial intelligence enabled road safety solutions, is pleased to announce an expansion to its existing Mobile Phone & Seatbelt Technology Agreement (**Agreement**) with the Queensland Department of Transport and Main Roads (**TMR**) for additional Heads-Up transportable solutions, which are used for mobile phone and seatbelt enforcement.

The transportable solutions are expected to commence deployment on 'go live' dates in batches between February 2025 and July 2026 at differing dates and finishing five years from each initial batch start date, unless TMR elects to extend the service timeframe under the two optional extensions of one year each.

The additional contract value is expected to total approximately \$27.4 million (excluding GST).

Acusensus Founder and Managing Director, Alexandar Jannink, said:

"We are pleased to be continuing our life-saving program with Queensland's Department of Transport and Main Roads, which has contributed to improved road safety outcomes across the state. We are proud to further support the Queensland Government in its efforts to enhance road safety for the community."

About Acusensus

Acusensus is a technology company that was founded in 2018 with a mission to design and develop artificial intelligence enabled road safety solutions. Collaborating with governments and commercial stakeholders to tackle distracted driving globally is Acusensus' first priority.

Acusensus has pioneered intelligent solutions that provide anywhere, anytime digital evidence that can be used in conjunction with law enforcement to drive behavioural change and improve road safety. Acusensus technology is used to detect and provide prosecutable evidence of distracted driving (mobile phone use), seatbelt compliance, speeding, railway crossing compliance and the monitoring of vehicles of interest.

Acusensus listed on the Australian Securities Exchange in January 2023. Acusensus is headquartered in Melbourne, Australia, with offices also in Sydney, Brisbane, London (UK) and Las Vegas (United States).
