

ASX Announcement: 11 February 2025

TasFoods Limited (TasFoods, ASX:TFL)

BIOSECURITY UPDATE

TasFoods Limited (**TasFoods, ASX:TFL, the Company**) notes the recent detection of avian influenza virus, otherwise known as bird flu at a layer egg farm in Victoria.

Agriculture Victoria has confirmed that the strain H7N8, which is a different strain that affected Victoria farms in 2024. This is the same strain that was found in New South Wales and The Australian Capital Territory in 2024.

This new outbreak has currently no direct impact at any Nichols Poultry broiler growing site or processing plant and hatchery in Tasmania. The company continues to supply the local and mainland markets as usual.

We continue to follow our bio security policy together with continued monitoring by the Tasmanian Government (Department of Primary Industries and Water) and have proactively increased bio security measures across all poultry sites.

Authorised for ASX release by the Board of Directors of TasFoods Ltd (ASX:TFL).
