ELC Operating Environment

Strong social and macroeconomic drivers continue to support early learning sector

- Strong macroeconomic drivers continue to support the Australian early childhood education and care (ECEC) sector. Rising female workforce participation continues to drive demand for services and increases in long day care (LDC) participation rates^{1,2}.
- The ECEC sector is designed to provide improved lifelong learning prospects for Australian children, increase workforce participation, improve gender equality, including women's financial security, and stimulate economic activity over the medium to long term³.
- Federal government investment into the ECEC sector has historical bipartisan support; the Federal Coalition Government introduced the CCS in July 2018 followed by an increase in CCS funding in July 2022⁴, the Federal Labor Government further improved CCS funding in July 2023⁵ and provided additional funding to support a wage increase for ECEC workers during 2024⁶.
- ECEC labour supply constraints show signs of easing following the 2024 Federal Labor Government funding to support a wage increase for ECEC workers⁷.
- Net new ELC supply for the 12 months to 31 December 2024 was +3.7%⁸.

- During the period Arena acquired a key health worker accommodation property in Bendigo, Victoria for approximately \$35 million on a passing yield of 6.2%¹ with 19 years term remaining on the lease. The property is fully leased to the Victorian State Government entity, Bendigo Health Care Group (Bendigo Health), the public sector provider of healthcare services to the Bendigo region. The property was purpose-built for Bendigo Health in 2014, under a 30-year triple-net lease arrangement and comprises a 120-apartment residential village on a site which is located 500 metres from the main Bendigo Hospital site.
