

4 March 2025

ASX:14D

Section 708A Notice - Share Issue

1414 Degrees Ltd (ASX: 14D) (**Company**) hereby provides notice to the ASX for the purpose of section 708A(5)(e) of the *Corporations Act 2001* (Cth) that it has issued 2,777,778 fully paid ordinary shares in the Company (**Shares**) without disclosure to investors under Part 6D.2 of the *Corporations Act 2001* (Cth).

The Company states that as at the date of this notice it:

- has complied with the provisions of Chapter 2M of the *Corporations Act 2001* (Cth) as they apply to the Company;
- has complied with sections 674 and 674A of the *Corporations Act 2001* (Cth);
- the Company is in the process of negotiating an agreement for the installation and sale of a SiBox® thermal energy storage system to an industrial customer. The negotiations are incomplete, non-binding and confidential and there can be no certainty that any agreement will be reached, or that any transaction will eventuate. The Company will keep the market informed in accordance with its continuous disclosure obligations;
- with the exception of the paragraph above, as at the date of this notice the Company is not aware of any excluded information within the meaning of sections 708A(7) and 708A(8) of the *Corporations Act* (Cth).

An Appendix 2A with respect to the issue of Shares was lodged by the Company with the ASX on 4 March 2025.

This announcement has been authorised by the Board of the Company.

AUTHORISED BY:

Dr Kevin Moriarty, Executive Chairman on behalf of the Board of Directors

ABOUT 1414 DEGREES LIMITED

1414 Degrees is a leader in industrial decarbonisation with its cutting-edge silicon-based solutions, enabling the alignment of energy supply with demand, fostering the widespread adoption of renewable energy. Our key technologies include:

SiBrick®: thermal energy storage technology safely and efficiently stores renewable electricity as latent heat, available for use on demand.

SiBox®: facilitates the transition to sustainable industrial processes, SiBox delivers consistent, high-temperature heat. It can be seamlessly retrofitted into heavy industry processes, offering a viable alternative to conventional energy sources.

SiPHYR™: methane pyrolysis reactor with integrated storage. SiPHYR will produce low-emission hydrogen and solid carbon using renewable energy sources.

1414 Degrees has showcased its capabilities through successful pilot projects that highlight the reliability and effectiveness of its solutions. SiBox has proven its ability to deliver high-temperature air or steam on demand from stored heat. The development of SiPHYR underscores our commitment to innovation and sustainability.

In 2019 the Company made the strategic purchase of the Aurora Energy Project (AEP) located near Port Augusta, South Australia. The project is a long-term renewable energy initiative to deliver reliable electricity to the region and National Electricity Market. The AEP has approval for 14D to pilot and demonstrate a large commercial scale version of the SiBox technology.
