Chrysos Signs First PhotonAssay™ Unit Contract, Enters MSA With Newmont Corporation

Chrysos Corporation Ltd (ASX:C79) (“Chrysos” or the “Company”) is pleased to announce that it has entered into a Master Services Agreement (MSA) with Newmont Corporation (“Newmont”) for Newmont to use Chrysos’ PhotonAssay™ technology for its gold mining projects. Newmont and Chrysos also entered into a contract for an initial PhotonAssay™ unit to be installed at its Ahafo mine in Ghana, with deployment expected in 1H FY26. The MSA with Newmont adheres to Chrysos’ general terms of an optional renewable five-year term, a fee per sample, and a minimum monthly assay payment.

Chrysos Managing Director and CEO Dirk Treasure commented: “We are proud to have secured both a Master Services Agreement and an initial lease contract with the industry’s leading gold miner. It is a testament not only to Newmont’s approach to operational and environmental excellence, but also reinforcing the significance of PhotonAssay itself.”

Chrysos PhotonAssay™ delivers faster, safer, more accurate and environmentally-friendly analysis of gold, silver, copper and other elements in as little as two minutes.

Newmont Corporation is the world’s leading gold company and a producer of copper, silver, zinc and lead. The company’s world-class portfolio of assets, prospects and talent is anchored in favourable mining jurisdictions across Africa, Australia, Latin America & Caribbean, North America and Papua New Guinea.

In summary Mr Treasure stated, “We are continuing our strategy of converting the world’s biggest gold miners to PhotonAssay. We are pleased to see top- and mid-tier producers adopting our technology at their projects, a trend that will only accelerate as we continue to penetrate the global mining market.”
