ABx Group Managing Director and CEO Mark Cooksey will provide an overview of the Company's recent announcement, with a 100 kg sample of ionic adsorption clay (IAC) rare earth material being delivered to the Australian Nuclear Science and Technology Organisation (ANSTO) to produce a high purity mixed rare carbonate (MREC) sample¹.

The MREC is likely to be high grade (high magnet rare earth oxide (MREO) and low impurities). Potential customers are keenly anticipating these results and have requested samples for their own testing.

Following the presentation, Dr Cooksey will participate in a moderated Q&A session which will allow investors to put questions directly to management.

To access further details of the event and to register at no cost, please follow the supplied Zoom link.

A recorded copy of the webinar will be made available following the event.

This announcement is approved for release by Managing Director and CEO Mark Cooksey.
