Directors' Report

30 June 2025

Rural Funds Group (RFF or the Group) comprises the stapled units in two Trusts, Rural Funds Trust (RFT) (ARSN 112 951 578) and RF Active (RFA) (ARSN 168 740 805) (collectively, the Trusts). The Directors of Rural Funds Management Limited (RFM) (ACN 077 492 838, AFSL 226701), the Responsible Entity of Rural Funds Group present their report on the Group for the year ended 30 June 2025.

In accordance with AASB 3 *Business Combinations*, the stapling arrangement referred to above is regarded as a business combination and Rural Funds Trust has been identified as the parent for the purpose of preparing the consolidated financial report.

The Directors' report is a combined report that covers both Trusts. The financial information for the Group is taken from the Consolidated Financial Statements and notes.

Directors

The following persons held office as Directors of the Responsible Entity during the period and up to the date of this report:

Guy Paynter
David Bryant
Michael Carroll
Julian Widdup
Andrea Lemmon
Non-Executive Chair
Managing Director
Non-Executive Director
Non-Executive Director

Principal activities and significant changes in state of affairs

The principal activity of the Group during the year was the development and leasing of agricultural properties. The Group is a lessor of agricultural property with revenue derived from leasing almond orchards, macadamia orchards, vineyards, cattle properties, cropping properties, agricultural plant and equipment, cattle and water rights. The Group also carries out farming operations on an interim basis for unleased properties and properties under development.

The Group also provides a guarantee to J&F Australia Pty Ltd (J&F), a wholly owned subsidiary of RFM, earning a return equivalent to an equity rate of return calculated on the amount of the guarantee during the year.

The following activities of the Group changed during the year:

During the year, the Group completed the sale of three Maryborough cropping properties previously contracted.

During the year, the Group made a \$7,803,000 investment in Inform Ag, an agriculture technology company which includes an upfront purchase of shares totalling \$5,000,000 and a convertible debt facility in two tranches totalling \$2,000,000. Repayment of the debt facility will be through the issue of additional equity to RFF with \$1,000,000 of debt converted at 30 June 2025. The Group also exercised options totalling \$803,000 to acquire shares in addition to the initial investment. The Group's ownership will increase to approximately 50% following the conversion of the remaining tranche of the \$1,000,000 debt facility.

In August 2024, the additional \$60,000,000 facility was drawn from The Rohatyn Group (TRG). Debt is repaid with interest to March 2030.

In October 2024, the Group entered into a 5-year lease with an established private farming enterprise for the Cerberus property.

In December 2024, the Group completed the sale of 50% interest in Mayneland and Baamba Plains to a company managed by The Rohatyn Group.

In December 2024, the Group completed the acquisition of a 50% shareholding in Cotton JV Pty Limited (Cotton JV) from Queensland Cotton Corporation Pty Limited. The Cotton JV lease of the Lynora Downs property remains in place.

In December 2024, the Group increased its available core debt to \$830,000,000 (2024: \$750,000,000). The facility limit on the \$340,000,000 tranche was increased to \$420,000,000 and extended to November 2027. The facility limit on the \$410,000,000 tranche was unchanged and expires in November 2026. The maximum Loan to Value Ratio was increased to 60% (2024: 55%) as part of the extension. The Wyseby debt facility was extended to September 2025.

In January 2025, the Group extended the lease on five Vineyard properties leased to Treasury Wine Estates Limited (ASX: TWE), The Group's six vineyards were leased until June 2026, and following the extension, the weighted lease expiry is now approximately 12.1 years.

Directors' Report

30 June 2025

In March 2025, the Group completed the sale of the Woodburn property for \$12,750,000.

In the opinion of the Directors, there were no other significant changes in the state of affairs of the Group during the year.

Operating results

The consolidated net profit after income tax of the Group for the year ended 30 June 2025 amounted to \$26,076,000 (2024: \$80,441,000). The consolidated total comprehensive income of the Group for year ended 30 June 2025 amounted to \$20,319,000 (2024: \$117,155,000).

The Group holds investment property, bearer plants, owner-occupied property and derivatives at fair value. The Group also reports adjusted funds from operations (AFFO) as a performance measure which adjusts profit for the effects of contracted rent, rental straight-lining, unrealised fair value adjustments, depreciation, impairments, noncash tax expense, one-off transaction costs and other transactions. AFFO for the year was \$44,708,000 (2024: \$42,373,000) and is reconciled to net profit before income tax below.

Adjusted funds from operations (AFFO)

The adjusted funds from operations (AFFO) calculated below effectively represents the underlying and recurring cash earnings from the Group's operations from which distributions are funded:

Directors' Report

30 June 2025

Financial position

The net assets of the consolidated Group have decreased to \$1,048,884,000 at 30 June 2025 from \$1,071,317,000 at 30 June 2024. At 30 June 2025, the Group had total assets of \$1,911,722,000 (2024: \$1,901,214,000).

At 30 June 2025, the Group held total water entitlements (including investments in Barossa Infrastructure Limited (BIL) and Coleambally Irrigation Co-operative Limited (CICL)) at a book value of \$210,987,000 (2024: \$213,708,000). Directors obtain independent valuations on RFF properties ensuring that each property will have been independently valued at least every two years or more often where appropriate, with the exception for Mayneland and Baamba Plains which were sold in part during the year. These valuations attribute a value to the water entitlements held by the Group. The Directors have taken into account the most recent valuations on each property and consider that they remain a reasonable estimate of fair value. On this basis the fair value of water entitlements at 30 June 2025 was \$361,228,000 (2024: \$360,150,000). The value of water entitlements is illustrated in the table below:

	2025	2024
	\$'000	\$'000
Intangible assets (water entitlements)	199,003	201,724
Investment in CICL	11,464	11,464
Investment in BIL	520	520
Total book value of water entitlements	210,987	213,708
Revaluation of intangible assets per valuation	150,241	146,442
Adjusted total water entitlements	361,228	360,150

Adjusted net asset value

The following depicts the net assets of the Group following the revaluation of water entitlements comprising intangible assets and investments in BIL and CICL per these valuations.

	2025	2024
	\$'000	\$'000
Net assets per Consolidated Statement of Financial Position	1,048,884	1,071,317
Revaluation of intangible assets per valuation	150,241	146,442
Adjusted net assets	1,199,125	1,217,759
Adjusted NAV per unit (\$)	3.08	3.14

Banking facilities

At 30 June 2025 the core debt facility available to the Group was \$830,000,000 (2024: \$750,000,000), with a drawn balance of \$703,606,000 (2024: \$724,606,000). The facility is split into two tranches with a \$410,000,000 tranche expiring in November 2026 and a \$420,000,000 tranche expiring in November 2027. At 30 June 2025, RFF had active interest swaps totalling 65.9% (2024: 68.5%) of the drawn balance on the floating debt facility to manage interest rate risk.

At 30 June 2025 the TRG loan balance was \$76,660,000 (2024: \$32,857,000). Debt is repaid with interest over 7 years to March 2030.

At 30 June 2025 a borrowing facility provided by Rabobank to the Group relating to the acquisition of Wyseby property was \$24,454,000. At balance date, the facility is due to expire on September 2025.

Units on issue

389,722,999 units in Rural Funds Trust were on issue at 30 June 2025 (2024: 388,243,046). During the year 1,479,953 units (2024: 3,386,488) were issued by the Trust and nil (2024: nil) were redeemed.

Property leasing

At 30 June 2025 the Group held 63 (2024: 67) properties as follows:

- 3 almond orchards (4,068 planted hectares).
- 6 vineyards (638 planted hectares).
- 14 macadamia orchards (2,183 planted hectares).
- 6 macadamia orchards currently being developed (1,566 planted and planned hectares) and other areas with the potential to be developed into macadamia orchards.
- 22 cattle properties made up of 17 breeding, backgrounding and finishing properties (716,372 hectares)* and 5 cattle feedlots with combined capacity of 150,000 head.
- 13 cropping properties (14,225 hectares).

During the year ended 30 June 2025, the properties held by the Group recorded fair value movements and deprecation as follows:

	2025	2024
	\$'000	\$'000
Change in fair value of investment property	6,003	58,057
Reversal of impairment / (impairment) of bearer plants	177	(128)
Revaluation (decrement) / increment - bearer plants	(7,121)	27,352
Depreciation - bearer plants	(12,043)	(11,271)

Total property revaluation through total comprehensive income	(11,018)	83,352
Revaluation of water entitlements per Directors' valuation	5,119	10,928
Total property revaluation	(5,899)	94,280

Almond orchards

The three fully established almond orchard properties (including water entitlements) are located in Hillston, NSW and Darlington Point, NSW and are leased to tenants who make regular rental payments. These encompass a planted area of 4,068 hectares (2024: 4,068 hectares):

- Yilgah 935 planted hectares (2024: 935 hectares).
- Tocabil 603 planted hectares (2024: 603 hectares).
- Kerarbury 2,530 planted hectares (2024: 2,530 hectares).

These properties are under lease to the following tenants:

- Select Harvests Limited (SHV) 935 planted hectares (2024: 935 hectares).
- Olam Orchards Australia Pty Limited (Olam) 3,133 planted hectares (2024: 3,133 hectares).

^{*} The Group's Area for Wyseby (held as tenant-in-common in the interest of 57.25%) included in the number of hectares.

Directors' Report

30 June 2025

Property leasing (continued)

Almond orchards (continued)

For its almond orchards the Group owns water entitlements of 55,525ML (2024: 55,525ML) comprising groundwater, high security river water, general security river water, supplementary river water, and domestic and stock river water. In addition, the Group owns 21,430ML (2024: 21,430ML) of water delivery entitlements that provide access to water delivery through CICL, with a low annual allocation expected to be provided.

Vineyards

The vineyard properties held by the Group include six vineyards, with five located in South Australia, in the Barossa Valley and Adelaide Hills regions, and one located in the Grampians in Victoria. For its vineyards, the Group owns 909ML of water entitlements (2024: 909ML). All vineyards are leased to Treasury Wine Estates Limited and produce premium quality grapes.

Macadamia orchards

Three established macadamia orchards are located near Bundaberg, Queensland:

- Swan Ridge and Moore Park, 234 hectares (2024: 234 hectares), currently operated by the Group.
- Bonmac, 27 hectares (2024: 27 hectares), currently leased to RFM Farming.

Beerwah and Bauple, 475 hectares (2024: 475 hectares) located in the Glass House Mountains and Wide Bay regions of Queensland are unleased and currently operated by the Group.

The following properties are leased to a company managed by The Rohatyn Group (TRG):

- Cygnet, located in Bundaberg, Queensland consists of 37 hectares (2024: 37 hectares) of newly established plantings.
- Nursery Farm, located in Bundaberg, Queensland consists of 41 hectares (2024: 41 hectares) of newly
 established plantings and a macadamia tree nursery, separately leased to another external party.
- Ten properties located in Maryborough, consisting of 1,394 hectares (2024: 933 hectares) of newly established macadamia plantings and 115 hectares (2024: 568 hectares) of planned macadamia plantings.
- Riverton, located in the Fitzroy region in Queensland consisting of 422 hectares (2024: 360 hectares) of newly
 established plantings.

The following properties under development are leased to a company managed by The Rohatyn Group:

• The Rookwood Farms aggregation, located in the Fitzroy region in Queensland with 843 hectares (2024: 411 hectares) of newly planted macadamia plantings and 161 hectares (2024: 615 hectares) of planned macadamia plantings totalling 1,004 hectares (2024: 1,026 hectares).

Cattle properties

Cattle properties held by the Group comprise of cattle breeding, backgrounding and finishing properties and cattle feedlots.

- Rewan located near Rolleston in central Queensland 17,479 hectares (2024: 17,479 hectares).
- Mutton Hole and Oakland Park located in far north Queensland 225.800 hectares (2024: 225.800 hectares).
- Natal aggregation located near Charters Towers in north Queensland 390,600 hectares (2024: 390,600 hectares).
- Comanche located in central Queensland 7,600 hectares (2024: 7,600 hectares).
- Cerberus located north west of Rockhampton in central Queensland 8,280 hectares (2024: 8,280 hectares).
- Dyamberin located in the New England region of New South Wales 1,728 hectares (2024: 1,728 hectares).
- Cobungra located in the East Gippsland region of Victoria 6,497 hectares (2024: 6,497 hectares).
- Petro, High Hill and Willara located in Western Australia 6,196 hectares (2024: 6,196 hectares).

Directors' Report

30 June 2025

Property leasing (continued)

Cattle properties (continued)

- Yarra located south west of Rockhampton in central Queensland 4,090 hectares (2024: 4,090 hectares).
- Homehill located north west of Rockhampton in central Queensland 4,925 hectares (2024: 4,925 hectares).
- Coolibah and River Block located south west of Rockhampton in central Queensland 724 hectares (2024: 724 hectares).
- Thirsty Creek located south west of Rockhampton in central Queensland 503 hectares (2024: 503 hectares).
- Prime City, Mungindi, Caroona, Beef City and Riverina, 5 cattle feedlots with a combined capacity of 150,000 head (2024:150,000 head).
- Kaiuroo, located north west of Rockhampton in central Queensland, 27,879 hectares (2024: 27,879 hectares).
- Wyseby, held as tenant-in-common arrangement (57.25% interest), located south-west of Rockhampton in Central Queensland adjoining Rewan 14,071 hectares (2024: 14,071 hectares).

The following cattle properties are leased to the following tenants:

- Australian Agricultural Company Limited, leasing Rewan, Comanche and Home Hill.
- Cattle JV Pty Limited, a wholly owned subsidiary of RFM, leasing Mutton Hole and Oakland Park.
- DA & JF Camm Pty Limited, a member of the Camm Agricultural Group, leasing the Natal aggregation.
- Stone Axe Pastoral Company Pty Limited, leasing Dyamberin, Cobungra, Petro, High Hill and Willara.
- Mort & Co Lot Feeder Pty Limited, leasing Coolibah, River Block and Thirsty Creek.
- Acton Cattle Company Pty Limited, leasing a portion of Cerberus.
- Clarke Creek Energy Pty Limited leasing a portion of Cerberus.
- · Caldwell Family (Milong) Pty Limited, leasing a portion of Wyseby.

In addition to this, JBS Australia Pty Limited (JBS) leases the Prime City, Mungindi, Caroona, Beef City and Riverina feedlots.

Yarra and Kaiuroo are currently being operated by the Group, allowing for capital development and improvement designed to improve the productivity of the properties while long-term lessees are being sought.

The lease arrangement for Natal aggregation includes a \$5,000,000 cattle leasing arrangement to fund the purchase of cattle. The balance has been fully repaid as at 30 June 2025 with a balance of nil (2024: \$1,871,000).

Cropping properties

Cropping properties held by the Group comprise of:

- Lynora Downs, a 4,963 hectare (2024: 4,963 hectare) cropping property located near Emerald, QLD is leased to Cotton JV Pty Limited (Cotton JV), a joint venture between RFM and the Group, until April 2027.
- 9 Maryborough properties located in Queensland totalling 2,059 hectares (2024: 2,200 hectares) which have potential to be developed into macadamia orchards. These properties are currently held for cropping purposes.
- Swan Ridge South, located in Bundaberg, Queensland totalling 123 hectares (2024: 123 hectares)
- Baamba Plains (50% share), a 4,130 hectare cropping property located in central Queensland leased to a company managed by The Rohatyn Group.
- Mayneland (50% share), a 2,942 hectare cropping property, located in central Queensland leased to a company managed by The Rohatyn Group.

Directors' Report

30 June 2025

Other activities

The Group provides a \$123,000,000 (2024: \$123,000,000) limited guarantee to J&F Australia Pty Ltd (J&F). The guarantee is currently used to support \$123,000,000 of J&F's debt facility which is used for cattle purchases, feed and other costs associated with finishing the cattle on the feedlots, enabling J&F to supply cattle to JBS Australia Pty Limited (JBS) for its grain fed business and the funding of grain in JBS' Rivalea business. The guarantee earns a return for RFF equivalent to an equity rate of return which is calculated on the amount of the guarantee during the year.

Breeder herd assets under finance lease of \$19,613,000 (2024: \$18,864,000) are leased to Cattle JV.

Agricultural plant and equipment with a net book value of \$1,092,000 (2024: \$400,000) is owned by the Group and leased to RFM Farming, RFM Macadamias and Cattle JV. Agricultural plant and equipment with a net book value of \$18,253,000 (2024: \$28,601,000) is used for the Group's farming operations and macadamia developments.

Risks and opportunities

Climate-related risk

As the Responsible Entity for the Group, RFM acknowledges the potential risk of climate change. RFM implements the Group's climate diversification strategy to mitigate these risks within the portfolio. In accordance with the Group's Sustainability Policy, RFM manages portfolio risk within its existing Risk Management Framework.

Extreme weather events have the potential to damage assets and disrupt operations. The majority of assets are subject to triple-net leases where the lessee is responsible for operations and insurance costs. RFM considers that climate change may present risks for the Group primarily in the form of residual risk of the Group's assets at the end of the lease term. These risks may be mitigated by how the assets are managed. External valuations consider these types of factors as well as other risks when determining the valuations of the assets.

The Group is working towards climate-related risk disclosure to align with the Australian Sustainability Reporting Standards. Based on current guidance, RFF is expected to be classified within Group 3 under AASB S2, with mandatory reporting set to commence from the 30 June 2028 reporting period. RFM monitors Scope 1 and Scope 2 emissions, focusing on carbon dioxide, methane, and nitrous oxide from assets operated by the Group.

The Group's assets produce these emissions through its agricultural infrastructure and machinery, cattle assets and through the application of fertiliser. RFM is enhancing internal systems to enable more transparent and comprehensive reporting in line with these disclosures. This approach will support the Group in managing climate related risks while improving asset management practices.

Capital and funding requirements

Volatility in capital markets and debt markets will impact on the Group's ability to access capital. RFM will continue to explore opportunities to diversify funding sources through capital partnering and by managing debt levels in line with the Group's internal target gearing of between 30-35%. The optimal capital structure is reviewed periodically with reference to prevailing market conditions.

Likely developments and expected results of operations

The Group expects to continue to derive its core future income from the holding and leasing of agricultural property and water entitlements. A key part of the Group's strategy is the continued development of macadamia orchards in Queensland in addition to identifying opportunities for the Group to enter into leases of the assets that the Group is currently operating. Management continues to look for growth opportunities in agricultural and related industries.

Environmental regulation

The Group operates under various Commonwealth and State-based environmental laws, including those which regulate water use and irrigation. Tenants who lease land and water assets from the Group must comply with legislation relating to their use of the asset. The Group also complies with broader environmental laws covering waste, emissions, and biodiversity. No environmental breaches have been recorded. The Group actively manages risks and monitors compliance to ensure ongoing adherence.

Directors' Report

30 June 2025

Indirect cost ratio

The indirect cost ratio (ICR) is the ratio of the Group's management costs over the Group's average net assets for the year, expressed as a percentage.

Management costs include management fees and other expenses such as corporate overheads in relation to the Group, but do not include transactional and operational costs such as brokerage. Management costs are not paid directly by the unitholders of the Group.

The ICR for the Group for the year ended 30 June 2025 is 1.72% (2024:1.71%).

Indemnity of Responsible Entity and Custodian

In accordance with its constitution, Rural Funds Group indemnifies the Directors, Company Secretary and all other officers of the Responsible Entity and Custodian when acting in those capacities, against costs and expenses incurred in defending certain proceedings.

Matters subsequent to the end of the year

In August 2025, the Group completed the sale of 2,254ML of High Security Murrumbidgee River water entitlements.

No other matter or circumstance has arisen since the end of the year that has significantly affected or could significantly affect the operations of the Group, the results of those operations or the state of affairs of the Group in future financial years.

Rounding of amounts

The Group is an entity to which ASIC Corporations (Rounding in Financial/Directors' Reports) Instrument 2016/191 applies and accordingly amounts in the consolidated financial statements and Directors' report have been rounded to the nearest thousand dollars.

Information on Directors of the Responsible Entity

Guy Paynter Non-Executive Chair

Qualifications Bachelor of Laws from The University of Melbourne

Experience Guy is a former director of broking firm JB Were. Guy brings to RFM more

than 30 years of experience in corporate finance. Guy is a former member of the Australian Securities Exchange (ASX) and a former associate of the Securities Institute of Australia (now known as the Financial Services Institute of Australasia). Guy's agricultural interests include cattle breeding in the Upper

Hunter region in New South Wales.

Special responsibilities Member of Remuneration Committee.

Directorships of other listed

entities in the last three years

Experience

None

David Bryant Managing Director

Qualifications Diploma of Financial Planning from the Royal Melbourne Institute of

Technology and Masters of Agribusiness from The University of Melbourne. David Bryant established RFM in February 1997 and leads the RFM team. David focuses on strategic planning, maintaining key commercial relationships

and sourcing new business opportunities.

David is currently a Director of Marquis Macadamias Limited, Marquis

Marketing Pty Limited and Inform Ag Pty Limited.

Notes to the Financial Statements 30 June 2025

A. REPORT OVERVIEW

General information

This financial report covers the consolidated financial statements and notes of Rural Funds Trust and its Controlled Entities including RF Active (Rural Funds Group, the Group or collectively the Trusts). Rural Funds Group is a for profit entity incorporated and domiciled in Australia. The Directors of the Responsible Entity authorised the Financial Report for issue on 22 August 2025 and have the power to amend and reissue the Financial Report.

Items included in the financial statements of each of the Group entities are measured using the currency of the primary economic environment in which the entity operates (functional currency). The consolidated financial statements are presented in Australian dollars which is the parent entity's functional and presentation currency.

The separate financial statements and notes of the parent entity, Rural Funds Trust, have not been presented within this financial report as permitted by amendments made to the *Corporations Act 2001*. Parent entity information is included in section G3.

Basis of preparation

The Trusts have common business objectives and operate collectively as an economic entity known as Rural Funds Group. The financial statements are general purpose financial statements that have been prepared in accordance with Australian Accounting Standards, Australian Accounting Interpretations, and other authoritative pronouncements of the Australian Accounting Standards Board, the *Corporations Act 2001* and the Trusts' Constitution. The report has been prepared on a going concern basis.

The material accounting policies used in the preparation and presentation of these financial statements are provided below and are consistent with prior reporting periods unless otherwise stated. The financial statements are based on historical cost, except for the measurement at fair value of selected non-current assets, financial assets and financial liabilities.

These financial statements are consolidated financial statements and accompanying notes of both Rural Funds Trust and RF Active.

Rounding of amounts

The Group is an entity to which ASIC Corporations (Rounding in Financial/Directors' Reports) Instrument 2016/191 applies and accordingly amounts in the consolidated financial statements and Directors' report have been rounded to the nearest thousand dollars.

Principles of consolidation

The consolidated financial statements include the financial position and performance of controlled entities from the date on which control is obtained until the date that control is lost.

Intragroup assets, liabilities, income, expenses and cash flows relating to transactions between entities in the consolidated Group have been eliminated in full for the purpose of these financial statements.

Appropriate adjustments have been made to the controlled entity's financial position, performance and cash flows where the accounting policies used by that entity were different from those adopted by the consolidated entity. All controlled entities have a 30 June financial year end.

Controlled entities

In accordance with AASB 3 *Business Combinations*, Rural Funds Trust is deemed to control RF Active from the stapling date of 16 October 2014. Rural Funds Trust is considered to be the acquirer of RF Active due to the size of the respective entities and as the stapling transaction and capitalisation of RF Active was funded by a distribution from Rural Funds Trust that was compulsorily used to subscribe for units in RF Active.

Notes to the Financial Statements

30 June 2025

Principles of consolidation (continued)

Significant accounting judgements, estimates and assumptions

The preparation of the financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts in the financial statements. Management continually evaluates its judgements, estimates and assumptions in relation to assets, liabilities, contingent liabilities, revenue and expenses.

Management bases its judgements, estimates and assumptions on historical experience and on other various factors it believes to be reasonable under the circumstances, the result of which form the basis of the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions and conditions and may materially affect financial results or the financial position reported in future periods.

The following are areas for which significant judgements, estimates or assumptions are made:

Valuation of property related assets

Independent valuations on the Group's properties are obtained, ensuring that each property will have been independently valued every two financial years or more often where appropriate, with the exception of Mayneland and Baamba Plains which were sold in part during the year. Independent valuation reports assess and provide value for properties in their entirety.

Significant judgement is applied in order to allocate the total property value, as disclosed in the independent valuation reports where applicable, to investment property, bearer plants and water entitlements. The allocation technique will vary depending on the nature of the lease arrangement.

Where information is available, each component of the property, meaning the land and infrastructure, the trees and any water assets, disclosed in the financial statements as investment property, bearer plants and water entitlements, will be allocated on an encumbered (subject to lease) basis.

If this information is not available, the valuation report may provide additional information, such as the summation basis of the unencumbered (vacant possession) value, evidence of other market transactions and the analysis of those component parts, which along with other sources, including the nature of capital expenditure on the property, is used to determine the encumbered allocation to components. Significant judgement is applied as part of these allocations, which vary from property to property, given the individual circumstances of the leasing arrangements. The allocation technique may change to reflect the best estimate of fair value attributable to each component at reporting date. Allocation techniques are disclosed in Note C1.

Estimation of useful lives of bearer plants

The useful lives of bearer plants have been estimated by assessing industry data. The useful lives of bearer plants are disclosed in Note C3.

Working capital

The deficiency in working capital at 30 June 2025 is due to the timing of distributions at balance date and the classification of the \$24,454,000 Wyseby debt facility due in September 2025. Based on the forecast cash flows, the Group believes it can pay all its debts as and when they fall due for at least a minimum period of 12 months from the date of these accounts. The Group has headroom in its syndicated bank facility of \$126,394,000 as at 30 June 2025 subject to compliance with the Group's bank covenants.

Comparative amounts

Comparative amounts have not been restated unless otherwise noted.

Notes to the Financial Statements

30 June 2025

B. RESULTS

B1 Segment information

The chief operating decision maker, who is responsible for allocating resources and assessing performance of the operating segments, has been identified as the Directors of the Responsible Entity. During the year ended 30 June 2025, the Group held property in agricultural sectors presented in five segments (2024: five segments) each holding and leasing agricultural property and equipment. Segment revenue includes rental income, finance income and interest income. Segment property assets include investment property, bearer plants, intangible assets, property – owner occupied, financial assets and plant and equipment. Revenue and property assets not categorised in these sectors are managed at a corporate level. Liabilities and direct or indirect expenses are not allocated to individual segments as these are reviewed by the chief operating decision maker on a consolidated basis.

^{*}Other rental revenue relates to lease of water entitlements.

^{**}Includes Rental revenue - prepaid rent (TRG).

Notes to the Financial Statements 30 June 2025

B1 Segment information (continued)

Segment revenue and revaluation movements (continued)

Revaluation for cropping segment relates to external valuation for Lynora Downs with market movements supported by comparable sales transactions.

Revaluation for macadamia segment largely relates to the external valuations for mature macadamia properties and macadamia properties under development that are leased to a company managed by The Rohatyn Group (TRG), with movements supported by rental increases as a result of capital expenditure deployment and comparable sales transactions.

Revaluation for almond segment relates to the external valuations for the Kerarbury, Tocabil and the Directors' valuation of Yilgah. In relation to Yilgah, the fair value adopted for statutory reporting is on an unencumbered (vacant possession) basis as the Group is in discussions with the tenant as part of the rent review process. This has resulted in a valuation decrement which has been offset by an increase to the Kerarbury and Tocabil valuations.

Revaluation for other segment relates to external valuations for water entitlements. Revaluation increment is due to market movements supported by comparable sales transactions.

Refer to section C1 for details on properties valued during the year.

B1 Segment information (continued)

Net asset value adjusted for water rights

The chief operating decision maker of RFF assesses the segments on property asset values adjusted for water rights. RFF owns permanent water rights and entitlements which are recorded at historical cost less accumulated impairment losses. Such rights have an indefinite life and are not depreciated. The carrying value is tested annually for impairment as well as for possible reversal of impairment. If events or changes in circumstances indicate impairment, or reversal of impairment, the carrying value is adjusted to take account of impairment losses.

The book value of the water rights (including investments in BIL and CICL recognised as financial assets) at 30 June 2025 is \$210,987,000 (2024: \$213,708,000).

Independent valuations on the Group's properties are obtained, ensuring that each property will have been independently valued every two years or more often where appropriate with the exception of Mayneland and Baamba Plains which were sold in part during the year. Independent valuation reports assess and provide value for properties in their entirety. The independent valuation reports contain information with which judgement is applied in order to allocate values to investment property, bearer plants and water entitlements. The Directors have taken into account the most recent valuations on each property and consider that they remain a reasonable estimate and, on this basis, the fair value of water entitlements before deferred tax adjustments at 30 June 2025 was \$361,228,000 (2024: \$360,150,000) representing the value of the water rights of \$150,241,000 (2024: \$146,442,000) above cost.

The following is a reconciliation of the book value at 30 June 2025 to an adjusted value based on the Directors' valuation of the water rights which are assessed by the chief operating decision maker.

	Per Statutory Consolidated Statement of Financial	Revaluation of water entitlements per Directors'	Directors' valuation

Revaluations from external valuations

All of the Group's properties have been valued by an independent valuer within the last 24 months with the exception of Mayneland and Baamba Plains which were sold in part during the year. Further information on the significant unobservable inputs adopted by the external valuer in the fair value measurement of the properties is described in note C1.

In relation to the Yilgah property, the fair value adopted for statutory reporting is based on an unencumbered (vacant possession) basis as the Group is in discussions with the tenant as part of the rent review process.

The Group's unleased macadamia properties have been valued on an unencumbered (vacant possession) basis.

Adjusted property values movements after the most recent independent valuation

Increases to the adjusted property value from the last valuation is primarily a result of new acquisitions or capital expenditure subsequent to the valuation, designed to improve an asset's productivity and value.

Decrease to adjusted property value from last valuation for properties is primarily a result of depreciation on owner occupied property and bearer plants (where relevant).

Notes to the Financial Statements

Notes to the Financial Statements

30 June 2025

B3 Revenue

	2025	2024
	\$'000	\$'000
Rental revenue	92,536	73,669
Sale of agricultural produce - farming operations	16,447	15,151
Sale of livestock and agistment income	4,837	6,240
Finance income	14,441	13,609
Interest received	554	1,094
Total	128,815	109,763

The Group's revenue is largely comprised of income under leases and finance income. All revenue is stated net of the amount of goods and services tax (GST).

Rental revenue primarily arises from the leasing of property assets at commencement and is accounted for on a straight-line basis over the period of the lease. The respective leased assets are included in the Consolidated Statement of Financial Position based on that nature.

Sale of agricultural produce and livestock is recognised when the performance obligation of passing control of agricultural produce and livestock at an agreed upon delivery point to the customer has been satisfied.

Finance income arises from the provision of financial guarantees and working capital loans, finance leases on cattle feedlots and cattle breeders and leased agricultural plant and equipment and recognised on an accrual basis using the effective interest rate method.

Other Income

	2025	2024
	\$'000	\$'000
Sale of temporary water allocations	2,084	1,811
Other income	1,567	929
Total	3,651	2,740

Lease and sale of temporary water allocations is recognised when the annual water allocations are received by the customer.

Expenses

Expenses such as Responsible Entity fees, property expenses and overheads are recognised on an accruals basis. Interest expenses are recognised on an accrual basis using the effective interest method.

B4 Earnings per unit

	2025	2024
Per stapled unit		
Net profit after income tax for the year (\$'000)	26,076	80,441
Weighted average number of units on issue during the year (thousands)	389,401	386,900
Basic and diluted earnings per unit (total) (cents)	6.70	20.79
Per unit of Rural Funds Trust		
Net profit after income tax for the year (\$'000)	31,456	83,247
Weighted average number of units on issue during the year (thousands)	389,401	386,900
Basic and diluted earnings per unit (total) (cents)	8.08	21.52
Per unit of RF Active		
Net loss after income tax for the year (\$'000)	(5,380)	(2,806)
Weighted average number of units on issue during the year (thousands)	389,401	386,900
Basic and diluted earnings per unit (total) (cents)	(1.38)	(0.73)

Notes to the Financial Statements

30 June 2025

B4 Earnings per unit (continued)

Basic earnings per unit are calculated on net profit attributable to unitholders of the Group divided by the weighted average number of issued units.

B5 Distributions

The Group paid and declared the following distributions during the year:

	Cents	Total
	per unit	\$
Distribution declared 3 June 2024, paid 31 July 2024	2.9325	11,385,227
Distribution declared 2 September 2024, paid 31 October 2024	2.9325	11,405,842
Distribution declared 2 December 2024, paid 31 January 2025	2.9325	11,428,627
Distribution declared 3 March 2025, paid 30 April 2025	2.9325	11,428,627
Distribution declared 2 June 2025, paid 31 July 2025	2.9325	11,428,627

Notes to the Financial Statements

30 June 2025

C. PROPERTY ASSETS

This section includes detailed information regarding RFF's properties, which are made up of multiple line items on the Consolidated Statement of Financial Position including Investment property, Plant and equipment – bearer plants, Financial assets – property related, Intangible assets, Property – owner occupied and Plant and equipment – other.

C1 RFF property assets

		2025	2024
		\$'000	\$'000
Investment property	C2	1,058,791	1,003,241
Plant and equipment - bearer plants	C3	247,330	248,842
Financial assets - property related	C4	122,233	103,790
Intangible assets	C5	199,003	201,724
Property - owner occupied	C6	164,808	169,796
Plant and equipment - other	C7	19,345	29,001
Asset held for sale	C8	13,806	48,876
Total		1,825,316	1,805,270

Leasing arrangements

Minimum lease payments receivable under non-cancellable operating leases of investment properties, bearer plants, water rights and plant and equipment not recognised in the financial statements, are receivable as follows:

	2025	2024
	\$'000	\$'000
Within 1 year	78,955	70,745
Between 1 and 2 years	70,843	71,942
Between 2 and 3 years	65,116	65,741
Between 3 and 4 years	61,438	61,646
Between 4 and 5 years	55,378	59,276
Later than 5 years	1,040,532	1,035,426
Total	1,372,262	1,364,776

Key changes to the property portfolio during the year:

- During the year, the Group completed the sale of three Maryborough cropping properties previously contracted.
- In December 2024, the Group completed the sale of 50% interest in Mayneland and Baamba Plains to a company managed by The Rohatyn Group.
- In March 2025, the Group completed the sale of the Woodburn property for \$12,750,000.

Macadamia development

The Group is developing macadamia orchards across a number of properties located in Queensland, Australia. As part of the development, costs relating to the acquisition, construction and development of macadamia orchards will be capitalised to the respective asset class that the cost relates to. The asset classes identified are investment property, bearer plants and water entitlements.

Investment Property

This includes costs associated with the acquisition for land, buildings, orchard and irrigation infrastructure and any costs directly attributable to bringing the asset to the condition necessary for it to be capable of operating in the manner intended by management.

Bearer Plants

This includes costs associated with the acquisition of macadamia trees, planting costs, growing costs incurred for the trees to reach maturity including fertiliser and watering costs and costs associated with establishing the macadamia trees in the orchard and bringing the asset to the condition necessary for it to be capable of operating in the manner intended by management.

Notes to the Financial Statements

30 June 2025

C1 RFF property assets (continued)

Macadamia development (continued)

Water entitlements

This includes costs associated with the purchase of water entitlements. Water entitlements are deemed ready for use on acquisition.

Borrowing costs

Borrowing costs may be capitalised on qualifying assets up until the property is deemed ready for use. Borrowing costs relating to the acquisition, construction and development of properties are capitalised to the respective asset classes up until the property is deemed ready for use. Properties could be deemed ready for use when the property has been leased or when the property is operating in a manner as intended by management, for example, a macadamia orchard may be deemed operational when the orchard is fully planted and the plantings have been established.

Total borrowing costs capitalised during the year ended 30 June 2025 was \$10,672,000 (2024: \$12,695,000).

Valuations

Independent valuations on the Group's properties are obtained, ensuring that each property will have been independently valued every two financial years or more often where appropriate with the exception of Mayneland and Baamba Plains which were sold in part during the year. Independent valuers engaged hold recognised and relevant professional qualifications with experience in agricultural properties.

The following existing properties had relevant independent valuations during the year ended 30 June 2025:

Almond properties	Kerarbury, Tocabil
Cattle properties	Rewan, Kaiuroo, Natal Aggregation, Oakland Park, Mutton Hole, Petro, High
	Hill, Willara, Wyseby
Macadamia properties	Swan Ridge, Moore Park, Bonmac, Cygnet, Nursery Farm, Riverton, Maryborough – TRG, Rookwood Farms – TRG, Rookwood Farms, Beerwah, Bauple
Cranning properties	· · · · · · · · · · · · · · · · · · ·
Cropping properties	Lynora Downs, Swan Ridge South
Water allocations	8,338ML Murrumbidgee Groundwater, 8,754ML Murrumbidgee Riverwater

The fair value adopted for the following property was updated based on information available to Directors as at 30 June 2025:

Almond properties	Yilgah
-------------------	--------

The Directors have considered independent valuations and market evidence where appropriate to determine the appropriate fair value to adopt. The Directors have adopted all valuations from independent valuers in the periods where valuations have been obtained. In relation to the Yilgah property, the Group is in discussions with the tenant as part of the rent review process, and as such, the valuation adopted for statutory reporting is an unencumbered valuation. The valuation adopted for this property has been calculated based on an estimate of the performance of the orchard and the underlying components of the orchard, including the land, infrastructure, water entitlements and the bearer plants.

The Directors have deemed that independent valuations were not required on the remaining properties as there have been no material changes to the industry, physical and geographical conditions of these properties in which the independent valuers have previously assessed. For these properties, the Directors have performed internal assessments, considering the latest valuation reports, that the carrying amount is still reflective of the fair value of the properties at reporting date.

The Group's properties, including those under development, are carried at fair value excluding the value of water rights. Water rights are treated as intangible assets, which are held at historical cost less accumulated impairment losses. Independent valuation reports assess and provide value for properties in its entirety. The independent valuation reports contain information with which judgement is applied in order to allocate values to investment property, bearer plants, property – owner occupied and water entitlements, where relevant.

Judgement is applied in order to allocate the total property value, as disclosed in the independent valuation reports, to each component; investment property, bearer plants and water entitlements. The allocation technique will vary depending on the nature of the underlying lease arrangement.

Notes to the Financial Statements

30 June 2025

C1 RFF property assets (continued)

Valuations (continued)

Where information is available, such as when provided by the external valuer, each component of the property, meaning the land and infrastructure, the trees and any water assets, disclosed in the financial statements as investment property, bearer plants and water entitlements, will be allocated on an encumbered (subject to lease) basis. Conditions associated with individual assets are considered as part of the valuation allocation.

If this information is not available, the valuation report may provide additional information, such as the summation basis of the unencumbered (vacant possession) value, which along with other sources, including the nature of capital expenditure on the property, is used to determine the encumbered allocation to components.

Judgement is applied as part of these allocations which vary from property to property given the individual circumstances of the leasing arrangements. The allocation technique may change to reflect the best estimate of fair value attributable to each component at reporting date.

Significant accounting judgements, estimates and assumptions in relation to valuation of property assets

At the end of each reporting period, the Directors update their assessment of fair value of each property, considering the most recent independent valuations. The Directors determine a property's value using reasonable fair value estimates from the most recent independent valuer's valuation reports.

Independent valuation reports assess and provide fair values for properties in their entirety. Judgement is applied in order to allocate the total property values as disclosed in the independent valuation reports, to investment property, bearer plants, property – owner occupied and water entitlements. The independent valuation reports contain information with which judgement is applied to allocate values to investment property, bearer plants, property – owner occupied and water entitlements.

Investment property, Bearer plants and Property – owner occupied

The main level 3 inputs used by the Group include discount rates, terminal capitalisation rates, rate per area of land, adult equivalent rates and carrying capacity estimated in the respective valuations based on comparable transactions and industry data.

At the end of each reporting period, the directors update their assessment of the fair value of each property. Changes in level 3 fair values are analysed at each reporting date and during discussions with the independent valuers.

Notes to the Financial Statements

30 June 2025

C1 RFF property assets (continued)

Valuations (continued)

The following table summarises the quantitative information about the significant unobservable inputs used in recurring level 3 fair value measurement:

Description	Fair value at		Primary valuation	Allocation	Unobservable inputs*	Range of inputs		
(excludes water assets)	2025	2024	technique	technique		2025	2024	
assets)	\$'000	\$'000				%	%	
Almond orchard property	284,975	293,233	Discounted Cash Flow (encumbered)	Rental base	Discount rate (%)	7.25 – 14.50	7.25 - 8.00	
			Discounted Cash Flow (unencumbered)	Component based	Terminal Capitalisation Rate (%) (encumbered)	7.75 – 8.00	7.75 - 10.00	
Cattle property and infrastructure	628,062	627,775	Summation assessment Productive unit	Component based	\$ per adult equivalent (AE) carrying capacity (Backgrounding properties)	\$6,128 - \$12,174	\$5,793 - \$11,829	
					\$ per adult equivalent (AE) carrying capacity (Breeder properties)	\$1,654 - \$3,509	\$1,630 - \$3,489

and the property			Summation assessment	Component based	Terminal Capitalisation rate (%)	6.50 - 6.75	6.50 - 7.00	
					Average \$ per planted hectare (Orchard > 5 years)	\$133,218	\$132,121	
					Average \$ per planted/plantable hectare (Orchard < 5 years)	\$95,992	\$89,291	
Total	1,484,735	1,464,511						

^{*}There were no significant inter-relationships between unobservable inputs that materially affect fair values. Unobservable inputs are based on assessments by external valuers.

Notes to the Financial Statements

30 June 2025

C1 RFF property assets (continued)

Valuations (continued)

Primary valuation technique

External valuations typically assess property values using different valuation techniques.

Discounted cash flow (encumbered)	Valuation based on future net rental cash flows discounted to the present value. The terminal value (as determined by the terminal capitalisation rate) is typically assessed and discounted in these types of valuations. The valuer may also use comparative sales as supporting information.
Discounted cash flow (unencumbered)	Valuation based on future net cash flows discounted to the present value. The terminal value (as determined by the terminal capitalisation rate) is typically assessed and discounted in these types of valuations.
Summation assessment	Assessment of the property on an asset-by-asset basis based on comparative sales evidence and typically driven by a rate per productive hectare and assessment of other components such as water and supporting buildings.
Productive unit	Assessment on the property driven by the value per adult equivalent head that is supported by the property and carrying capacity of the property.
Rent capitalisation	Valuation based on passing rent applied against a capitalisation rate.

Allocation technique

Independent valuation reports assess and provide value for properties in their entirety. Component allocation techniques are adopted to allocate the total property value to investment property, bearer plants, property – owner occupied and water entitlements. The component allocation technique applied is assessed on each external valuation to ensure that the allocation technique is consistent with the nature and characteristics of the property including any lease encumbrances. The allocation technique may change to reflect the best estimate of fair value attributable to each component at reporting date.

The following allocation techniques have been applied:

Rental base	Applied for properties with long term indexed leases by allocating value to component assets using the rental base. The rental base is identifiable and generally determined by the cost of the assets. The allocation by rental base reflects the encumbered nature of the assets where rental incomes are not affected by short term market fluctuations in the value of the assets due to lack of rental review mechanism.
Component based	The encumbered value is allocated based on information in the valuation report which enables the allocation by components on an encumbered basis. Conditions associated with individual assets are considered as part of the valuation allocation. To determine the allocation of components on an encumbered basis, the external valuer will assess various factors such as market indicators, comparable sales data of encumbered assets, comparable rental data and other
	relevant information such as replacement cost concepts.
Component based – Almonds and Macadamias	Applied for properties where leases include rental reviews. Information is provided in the valuation to allocate the encumbered value of the property to water assets, investment property and bearer plants on an encumbered basis.
	Firstly, the approach allocates value to water assets based on comparable encumbered rental data. The value of land is determined based on comparable sales data. Orchard infrastructure including irrigation is determined based on a replacement cost assumption adjusted for an estimate of the age of the assets. Bearer plants are identified as being the residual value of the total encumbered value of the property.

Notes to the Financial Statements

30 June 2025

C1 RFF property assets (continued)

Valuations (continued)

Unobservable inputs

Unobservable inputs are assumptions based on the assessments and determinations made by external valuers in their capacity as qualified experts which are key inputs in the valuation techniques utilised.

Discount rate (%)	The higher the discount rate the lower the fair value
Terminal capitalisation rate (%)	The higher the terminal capitalisation rate the lower the fair value
\$ per irrigated/planted hectare	The higher the value per irrigated/planted hectare, the higher the fair value
Average \$ per plantable hectare	The higher the value per plantable hectare, the higher the fair value
\$ per adult equivalent carrying capacity	The higher the value per adult equivalent carrying capacity, the higher the fair value

Notes to the Financial Statements

Investment properties comprise land, buildings and integral infrastructure including shedding, irrigation and trellising.

Macadamia properties under development during the year include Maryborough – Macadamias and Rookwood Farms. Development costs for these properties have been capitalised.

Investment properties are held for long-term rental yields and capital growth and are not occupied by the Group. RFF measures and recognises investment property at fair value where the valuation technique is based on unobservable inputs. Changes in fair value are presented through profit or loss in the Consolidated Statement of Comprehensive Income.

Capital expenditure that enhances the future economic benefits of the assets are capitalised to investment property. Incentives provided are capitalised to the investment property and amortised on a straight-line basis over the term of the lease as a reduction to rental revenue.

Notes to the Financial Statements

Closing net book amount	125,899	17,946	104,997	248,842

Bearer plants are solely used to grow produce over their productive lives and are accounted for under AASB 116 *Property, Plant and Equipment.*

RFF initially measures and recognises bearer plants at cost, including planting costs and direct costs associated with establishing these plants to maturity. After initial measurement, the Group adopts the revaluation model and bearer plants are carried at fair value less any accumulated depreciation and accumulated impairment losses.

Bearer plants are subject to revaluations based on the Group's valuation policies. Increases in the carrying amounts arising from revaluation of bearer plants are recognised in other comprehensive income and accumulated in net assets attributable to unitholders under asset revaluation reserve. Revaluation increases which reverse a decrease previously recognised in profit and loss are recognised in profit or loss. Revaluation decreases which offset previous increases are recognised in other comprehensive income in the asset revaluation reserve. Any other decreases are recognised in profit and loss.

Lease incentives relate to orchard establishment costs incurred by the Group subsequent to lease commencement. Lease incentives are capitalised to bearer plants and amortised on a straight-line basis over the term of the lease as a reduction of rental revenue.

Notes to the Financial Statements

30 June 2025

C3 Plant and equipment - bearer plants (continued)

Bearer plants are subject to depreciation over their respective useful lives calculated on a straight-line basis on the carrying amount. Depreciation commences when bearer plants are assumed ready for use which is considered to be when the trees reach maturity or on the commencement of lease. The useful lives and maturity assumptions used for each class of depreciable asset are shown below:

Fixed asset class:

Almond bearer plants

Vineyard bearer plants

Macadamia bearer plants

Useful life:
30 years
40 years
45 - 55 years

At the end of each annual reporting period, the useful life, maturity assumptions and carrying amount of each asset is reviewed. Any revisions are accounted for prospectively as a change in estimate.

Bearer plants as stated on a historical cost basis is as follows:

bearer plants as stated on a historical cost basis is as follows.

Investment - CICL	11,464	11,464
Finance Lease - Breeders	19,613	18,864
Finance Lease - Feedlots	66,733	65,160
Finance Lease - Equipment	10,498	130
Finance Lease - DA & JF Camm Pty Limited	-	2,381
Other receivables - straight-line asset	13,405	5,271
Total	122,233	103,790

Barossa Infrastructure Ltd (BIL) is an unlisted public Company supplying non-potable supplementary irrigation water for viticulture in the Barossa. The Group holds a minority interest in BIL.

Coleambally Irrigation Co-operative Limited (CICL) is one of Australia's major irrigation companies and is wholly owned by its farmer members. CICL's irrigation delivery system delivers water to 400,000 hectares of area across the Coleambally Irrigation District, in the Riverina, near Griffith, NSW. The Group holds a minority interest in CICL.

Finance Lease – Breeders is comprised of breeders owned by the Group which have been leased to Cattle JV, a wholly-owned subsidiary of Rural Funds Management Limited, for a term of ten years ending in 2028. As part of the arrangement, the lessee is required to maintain the breeder herd and maintain an active breeding program. The expected credit loss on the finance lease is assessed on the value of the breeder herd secured against the finance lease. This assessment involves the monitoring of the value of the breeder herd through a bi-annual mustering process conducted by the lessee, Cattle JV and an annual valuation process. There has been no expected credit loss recognised at 30 June 2025 (2024: nil).

Finance Lease – Feedlots is comprised of feedlots leased to JBS Australia Pty Limited (JBS) for a term of ten years ending in 2028 with a repurchase call option exercisable by JBS and a sale put option exercisable by the Group. The call option held by JBS can be exercised from year six but will incur a break fee if exercised before year ten.

Notes to the Financial Statements

30 June 2025

C4 Financial assets – property related (continued)

Finance Lease – DA & JF Camm Pty Limited is comprised of cattle owned by the Group and leased to DA & JF Camm Pty Limited, the lessee of the Natal aggregation, as part of a \$5,000,000 facility. The gross balance drawn as at 30 June 2025 was nil (2024: \$2,381,000). The balance drawn net of security deposits held is nil (2024: \$1,871,000). There has been no expected credit loss recognised at 30 June 2025 (2024: nil).

Finance Lease – Equipment largely comprises of plant and equipment leased to a company managed by TRG used for the operation of the leased macadamia orchards.

Other receivables relate to recognition of rental revenue on a straight-line basis in accordance with AASB 16 *Leases*.

Significant accounting judgements in the valuation of Coleambally Irrigation Co-operative and Barossa Infrastructure Limited shares

The investments in BIL and CICL are treated the same as water rights, that is, recorded at historical cost less accumulated impairment losses and not revalued.

Finance leases

Finance leases are measured at amortised cost. Each lease payment was allocated as a reduction to the finance lease receivable and as finance income. The finance income was charged to profit or loss over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the receivable for each period. These represent leases of property or biological assets where all the risks and benefits incidental to the ownership of the asset, but not the legal ownership, are substantially transferred from the lessor.

Minimum lease payments receivable under non-cancellable finance leases of feedlots, breeders and equipment not recognised in the financial statements, are receivable as follows:

	2025	2024
	\$'000	\$'000
Within 1 year	28,803	6,125
Between 1 and 2 years	6,911	24,882
Between 2 and 3 years	6,479	4,516
Between 3 and 4 years	67,545	4,490
Between 4 and 5 years	562	65,295
Later than 5 years	14	-
Total	110,314	105,308

C5 Intangible assets (continued)

Water rights

Permanent water rights and entitlements are recorded at historical cost less accumulated impairment losses. Such rights have an indefinite life and are not depreciated. The carrying value is tested annually for impairment as well as for possible reversal of impairment. If events or changes in circumstances indicate impairment, or reversal of impairment, the carrying value is adjusted to take account of impairment losses.

C6 Property - owner occupied

Property – owner occupied relates to owner occupied property that is being used to conduct farming operations by the Group and accounted for under AASB 116 *Property, Plant and Equipment*. Property – owner occupied are held under the revaluation model. As at 30 June 2025, this included properties that were operated by the Group including the Maryborough properties (cropping), Beerwah, Bauple, Swan Ridge, Moore Park (macadamias), Yarra (cattle and cropping) and Kaiuroo (cattle and cropping).

These assets are subject to revaluations based on the Group's valuation policies. Increases in the carrying amounts arising from revaluation of Property are recognised in other comprehensive income and accumulated in net assets attributable to unitholders under asset revaluation reserve. Revaluation increases which reverse a decrease previously recognised in profit and loss are recognised in profit or loss. Revaluation decreases which offset previous increases are recognised in other comprehensive income in the asset revaluation reserve. Any other decreases are recognised in profit and loss.

Notes to the Financial Statements

30 June 2025

C6 Property – owner occupied (continued)

Elements of Property – owner occupied are subject to depreciation over their respective useful lives calculated on a straight-line basis on the carrying amount. The useful lives and for each class of depreciable asset are shown below:

Fixed asset class:
Land
Buildings
Useful life:
Not applicable
20 years
Irrigation
40 years

At the end of each annual reporting period, the useful life of each asset is reviewed. Any revisions are accounted for prospectively as a change in estimate.

Property – owner occupied as stated on a historical cost basis is as follows:

2025	Land	Building	Irrigation	Total
	\$'000	\$'000	\$'000	\$'000
Cost	125,702	18,400	12,404	156,506
Accumulated depreciation and impairment	(2,219)	(2,808)	(345)	(5,372)
Net book amount	123,483	15,592	12,059	151,134
2024	Land	Building	Irrigation	Total
2024	\$'000	\$'000	\$'000	\$'000
Cost	132,311	14,585	17,662	164,558
	•	,	,	*
Accumulated depreciation and impairment	(527)	(2,324)	(4,340)	(7,191)
Net book amount	131,784	12,261	13,322	157,367
C7 Plant and equipment – other				
or i min and oquipmon			2025	2024
			\$'000	\$'000
Opening net book amount			29,001	27,045
Additions			5,368	12,877
Transfers to financial assets – property related			(8,636)	-
Disposals			(2,530)	(153)
Classified as held for sale			-	(6,244)
Depreciation			(2,724)	(3,456)
Depreciation capitalised to developments			(1,134)	(1,068)
Closing net book amount			19,345	29,001
Cost			37,390	45,534
Accumulated depreciation			(16,723)	(15,211)
Accumulated impairment			(1,322)	(1,322)
Net book amount			19,345	29,001

Classes of plant and equipment other than bearer plants are measured using the cost model as specified below. The asset is carried at its cost less any accumulated depreciation and any impairment losses. Costs include purchase price, other directly attributable costs and the initial estimate of the costs of dismantling and removing the asset, where applicable.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. The carrying amount of any component accounted for as a separate asset is derecognised when replaced. All other repairs and maintenance are charged to profit or loss during the reporting period in which they are incurred.

Notes to the Financial Statements

30 June 2025

C7 Plant and equipment – other (continued)

The Group manages and monitors its leased assets and physically attends to properties where assets are located on a regular basis.

The useful lives and for each class of depreciable asset are shown below:

Fixed asset class:

Capital works in progress

Plant and equipment

Farm vehicles and equipment

Useful life:
Not applicable
2-16 years
2-16 years

At the end of each annual reporting period, the depreciation method, useful life and residual value of each asset is reviewed. Any revisions are accounted for prospectively as a change in estimate.

Gains and losses on disposals are determined by comparing proceeds with carrying amount. These are included in profit and loss.

C8 Assets held for sale

	Note		
		2025	2024
		\$'000	\$'000
Investment property	C2	5,679	17,136
Intangible assets	C5	8,127	3,110
Property - owner occupied	C6	-	22,386
Plant and equipment - other	C7	-	6,244
Total		13,806	48,876

At 30 June 2025, the Group was actively marketing two Maryborough cropping properties and was in the process of selling 2,254ML of High Security Murrumbidgee River water.

C9 Capital commitments

Capital expenditure across all properties largely relates to macadamia developments, cropping property developments and cattle property developments. These commitments are contracted for but not recognised as liabilities.

Total	138,242	94,170
Plant and equipment	803	-
Intangible assets	-	2,243

	\$'000	\$'000
	2025	2024

Notes to the Financial Statements

30 June 2025

D. TAX

Since 1 July 2014, Rural Funds Trust (a subsidiary of Rural Funds Trust at the time) became a flow through trust for tax purposes. As a result, it is no longer probable that a tax liability will be incurred in these entities in relation to future sale of assets for a gain or through trading. Rural Funds Trust is an attribution managed investment trust (AMIT). RFM Australian Wine Fund (a subsidiary of Rural Funds Trust) is the head of a separate tax consolidated group, taxed in its own right. RF Active (a subsidiary of Rural Funds Trust) is a public trading trust and is taxed as a company. All entities within the Group are tax residents in Australia.

D1 Income tax expense

The charge for current income tax expense is based on the profit adjusted for any non-assessable or disallowed items. It is calculated using the tax rates that have been enacted or are substantially enacted by the balance sheet date.

Deferred tax is accounted for using the balance sheet method in respect of temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements.

No deferred income tax will be recognised from the initial recognition of an asset or liability, excluding in a business combination, where there is no effect on accounting or taxable profit or loss.

Deferred tax is calculated at the tax rates that are expected to apply to the period when the asset is realised or liability is settled. Deferred tax is charged/credited in the Consolidated Statement of Comprehensive Income except where it relates to items that may be credited directly to net assets attributable to unitholders, in which case the deferred tax is adjusted directly against net assets attributable to unitholders.

Deferred income tax assets are recognised to the extent that it is probable that future tax profits will be available against which deductible temporary differences can be utilised.

The amount of benefits brought to account or which may be realised in the future is based on management's judgement, the assumption that no adverse change will occur in income taxation legislation and the anticipation that the consolidated group will derive sufficient future assessable income to enable the benefit to be realised and comply with the conditions of deductibility imposed by the law.

The major components of income tax expense comprise:

	2025	2024
	\$'000	\$'000
Current tax	692	705
Deferred tax	41	414
Adjustments in respect of deferred income tax of previous years	314	-
Income tax expense reported in the Statement of Comprehensive Income	1,047	1,119
Income tax expense is attributable to:		
Profit from continuing operations	1,047	1,119
Total	1,047	1,119
Deferred income tax expense included in income tax expense comprises:		
Decrease in deferred tax assets	-	918
Increase/(decrease) in deferred tax liabilities	355	(420)
Total	355	498
Amounts charged or credited directly to equity		
Change in fair value taken through asset revaluation reserve	-	84
Total	-	84

Notes to the Financial Statements

30 June 2025

D1 Income tax expense (continued)

Numerical reconciliation of income tax expense to prima facie tax payable

	2025	2024
	\$'000	\$'000
Net profit before income tax	27,123	81,560
At the statutory income tax rate of 30% (2024: 30%)	8,137	24,468
Tax effect of amounts that are not taxable in determining taxable income	(8,704)	(24,833)
Derecognition of tax losses	1,300	1,484
Adjustments in respect of tax of previous years	314	-
Total	1,047	1,119
Tax losses		
	2025	2024
	\$'000	\$'000
Unused tax losses for which no deferred tax asset has been recognised	22,563	18,230
Potential tax benefit @ 30%	6,769	5,469

The unused tax losses relate to RF Active and can be carried forward indefinitely.

Franking credits

At 30 June 2025 there were \$2,227,000 of franking credits available to apply to future income distributions (2024: \$1,277,000).

D2 Deferred tax and current tax

	2025	2024
	\$'000	\$'000
Deferred tax liabilities		
Bearer plants	2,779	3,041
Plant and equipment	1,132	1,131
Fair value investment property	4,820	4,834
Other assets	1,786	1,674
Gross deferred tax liabilities	10,517	10,680
Set off of deferred tax assets	(2,248)	(2,766)
Net deferred tax liabilities	8,269	7,914
Deferred tax assets		
Investments	(222)	(175)

Notes to the Financial Statements 30 June 2025

E. CAPITAL STRUCTURE AND FINANCIAL RISK MANAGEMENT

RFM, the Responsible Entity of RFF, is responsible for managing the policies designed to optimise RFF's capital structure. This is primarily monitored through an internal gearing ratio target range of 30-35% calculated as interest bearing liabilities as a proportion of adjusted total assets. The optimal capital structure is reviewed periodically, although this may be impacted by market conditions which may result in an actual position which may differ from the desired position.

E1 Interest bearing liabilities

•	2025	2024
	\$'000	\$'000
Current		
Equipment loans (ANZ)	6,145	5,641
Wyseby facility	24,454	24,454
TRG loan	16,192	5,714
J&F Guarantee - Borrowing loss provision	185	185
Total	46,976	35,994
Non-current		_
Borrowings (ANZ)	283,372	290,159
Borrowings (Rabobank)	280,422	286,397
Borrowings (NAB)	139,812	148,050
TRG loan	60,468	27,143
Total	764,074	751,749

Interest bearing liabilities are initially recognised at fair value less any related transaction costs. Subsequent to initial recognition, interest bearing liabilities are stated at amortised cost. Any difference between cost and redemption value is recognised in the Consolidated Statement of Comprehensive Income over the entire period of the borrowings on an effective interest basis. Interest-bearing liabilities are classified as current liabilities unless the Group has an unconditional right to defer the settlement of the liability for at least twelve months from the balance sheet date.

J&F Guarantee

Subsequent to initial recognition, financial guarantee contracts are measured as financial liabilities at the higher of any loss allowance calculated and the amount initially recognised. A loss allowance is recognised for expected credit losses on a financial guarantee contract. The expected credit loss is assessed based on the probability of default and whether there has been a significant increase in credit risk on an ongoing basis throughout each reporting period. To assess whether there is a significant increase in credit risk, the risk of default at the reporting date is compared to the risk of default at the date of initial recognition. Consideration is made to factors that could impact the financial guarantee such as actual or expected significant adverse changes in business, financial or economic conditions, and any material / adverse changes to the operating results of the associated parties of the financial guarantee.

The J&F Guarantee is a \$123.0 million (2024: \$123.0 million) limited guarantee provided by the Group to J&F Australia Pty Ltd (J&F), a wholly owned subsidiary of Rural Funds Management Limited, for a period of ten years from August 2018. From the provision of this guarantee, the Group earns a guarantee fee classified as finance income as noted in B3, paid on a monthly basis. The guarantee is currently used to support \$123,000,000 of J&F's debt facility which is used for cattle purchases, feed and other costs associated with finishing the cattle on the feedlots, enabling J&F to supply cattle to JBS Australia Pty Limited (JBS) for its grain fed business and the funding of grain in JBS' Rivalea business. Given J&F's primary source of income is from payments from JBS, a J&F default is only likely to occur in the event of a JBS default. In the event of a JBS default, J&F would cease buying cattle and commence selling cattle in the feedlots. As cattle are sold, J&F bank loans would be repaid. Given that lot-fed cattle can gain up to 2kgs per day, and are sold on a per kg basis, a material fall in the cattle price would be required for there to be a shortfall. The guarantee would be called to cover any shortfall between J&F borrowings and cattle sales but limited to \$123.0 million.

Notes to the Financial Statements 30 June 2025

E1 Interest bearing liabilities (continued)

J&F Guarantee (continued)

The guarantee fee received from J&F during the year was \$5,750,000 (2024: \$5,215,000). The net return to the Group relating to the guarantee fee arrangement for the year was approximately 4.7% (2024: 4.0%). There was no event of default during the year, and as a result, the guarantee has not been called.

The financial guarantee was recognised at fair value at inception, which was nil. Subsequently, it is carried at the value of the expected credit loss. The credit loss has been calculated considering the likelihood of the financial guarantee being triggered and its financial impact on the Group. In calculating the allowance, consideration is given to counterparty risk associated with the arrangement, with JBS being the ultimate counterparty. The credit risk of JBS was determined not to have increased significantly since initial recognition, therefore the loss allowance for the guarantee has been recognised at an amount equal to 12-month expected credit losses. Consideration is also given to the value of cattle in assessing any potential shortfall should the guarantee be called by the Group. There was no change to the credit loss provision recognised during the year (2024: \$13,000).

As part of the JBS transaction, the Group purchased five feedlots from JBS Australia Pty Limited (JBS) and leased them back to JBS. The feedlots are classified as a finance lease with a repurchase call option exercisable by JBS and a sale put option exercisable by the Group as noted in C4. The call option held by JBS can be exercised from year six but will incur a break fee if exercised before year ten in 2028.

Borrowings

At 30 June 2025 the syndicated debt facility available to the Group was \$830,000,000 (2024: \$750,000,000), with a drawn balance of \$703,606,000 (2024: \$724,606,000). The facility is split into two tranches, with a \$410,000,000 tranche expiring in November 2026 and a \$420,000,000 tranche expiring in November 2027.

As at 30 June 2025 RFF had active interest rate swaps totalling 65.9% (2024: 68.5%) of the drawn balance on the floating debt facility to manage interest rate risk. Hedging requirements under the terms of the borrowing facility may vary with bank consent.

As at 30 June 2025 the TRG loan balance was \$76,660,000 (2024: \$32,857,000). A \$40,000,000 loan was provided to the Group on commencement of the initial lease with an additional \$60,000,000 provided in August 2024. Debt is repaid with interest over 7 years to March 2030.

As at 30 June 2025 a borrowing facility provided by Rabobank to the Group relating to the acquisition of Wyseby property was \$24,455,000. At balance date, the facility is due to expire in September 2025.

Loan covenants

Under the terms of the updated borrowing facility, the Group was required to comply with the following financial covenants for the year ended 30 June 2025:

- maintain a maximum Loan to Value Ratio of 60% (2024: 55%);
- maintain Net Tangible Assets (including water entitlements) in excess of \$400,000,000; and
- an Interest Cover Ratio for the Group not less than 1.50:1.00 (2024: 1.50:1.00) with distributions permitted if the Interest Cover Ratio is not less than 1.65:1.00 (2024: 1.65:1.00).

The loan to value ratio calculation includes the actual amount guaranteed under the J&F guarantee of an amount of up to \$123.0 million (2024: \$123.0 million).

Rural Funds Group has complied with the financial covenants of its borrowing facilities during the year.

The Group has received approval from the banking syndicate to reduce the Interest Cover Ratio financial covenant to 1.50:1.00 with distributions permitted if the Interest Cover Ratio is not less than 1.65:1.00 from 1 July 2023 to 30 June 2026.

Loan amounts are provided at the Bankers' floating rate, plus a margin. For bank reporting purposes, the Group's property assets are valued at market value based on the latest external valuation report. Refer to section B1 for Directors' valuation of water rights and entitlements.

Notes to the Financial Statements

30 June 2025

E1 Interest bearing liabilities (continued)

Borrowings with Australian and New Zealand Banking Group (ANZ), Cooperatieve Rabobank UA (Rabobank) and National Australia Bank (NAB) are secured by:

- a fixed and floating charge over the assets held by Certane CT Pty Limited (Certane) as custodians for Rural Funds Trust, RFM Australian Wine Fund (a subsidiary of Rural Funds Trust) and RF Active; and
- registered mortgages over all property owned by the Rural Funds Trust and its subsidiaries provided by Certane as custodians for Rural Funds Trust and its subsidiaries.

The following assets are pledged as security over the loans:

2025	Investment property	Water licences	Plant and equipment - Bearer Plants	Financial assets	Property - owner occupied	Assets held for sale	Total

Liabilities		
Non-current		
Interest rate swaps	1,982	-
Total other liabilities	1,982	-

The Group's derivative financial instruments are held at fair value (level 2 - see section E4).

E4 Fair value measurement of assets and liabilities

This note explains the judgements and estimates made in determining fair values of Investment property, Plant and equipment – bearer plants and financial assets and liabilities that are recognised and measured at fair value in the financial statements. To provide an indication about the reliability of the inputs used in determining fair value, the Group has classified each item into the three levels prescribed under Australian Accounting Standards as mentioned above.

- Level 1 Fair value based on unadjusted quoted prices in active markets for identical assets or liabilities that the entity can access at the measurement date (such as publicly traded equities).
- Level 2 Fair value based on inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly or indirectly.
- Level 3 One or more significant inputs to the determination of fair value is based on unobservable inputs for the asset or liability.

RFF's financial assets and liabilities relating to interest rate swap derivatives are level 2.

At 30 June 2025, cattle biological assets are level 2, and all other non-financial assets are level 3.

RFF's unlisted equity investments, BIL, CICL, Marquis Macadamias Ltd and Almondco are level 3.

The Group's policy is to recognise transfers into and out of fair value hierarchy levels at the end of the reporting period. There were no transfers in the current year (2024: nil).

Valuation techniques used to determine fair values

Specific valuation techniques used to value financial instruments via level 2 inputs include:

- the use of quoted market prices or dealer quotes for similar instruments;
- the fair value of interest rate swaps is calculated as the present value of estimated future cash flows based on observable yield curves

Specific valuation techniques used to value financial assets, investment property and bearer plants via level 3 are discussed in section C1.

Notes to the Financial Statements

30 June 2025

E5 Financial instruments

Financial instruments are recognised initially using trade date accounting, i.e. on the date that the Group becomes party to the contractual provisions of the instrument.

On initial recognition, all financial instruments are measured at fair value plus transaction costs (except for instruments measured at fair value through profit or loss where transaction costs are expensed as incurred).

a. Financial assets

Financial assets are divided into the following categories which are described in detail below:

- · financial assets at amortised cost; and
- financial assets at fair value through profit or loss.

Financial assets are assigned to the different categories on initial recognition, depending on the characteristics of the instrument and its purpose. A financial instrument's category is relevant to the way it is measured and whether any resulting income and expenses are recognised in profit or loss or in other comprehensive income.

b. Financial assets at amortised cost

Financial assets held with the objective of collecting contractual cash flows are recognised at amortised cost. After initial recognition these are measured using the effective interest method, less provision for expected credit loss. Any change in their value is recognised in profit or loss.

Discounting is omitted where the effect of discounting is considered immaterial.

For trade receivables, finance lease receivables and loans receivables, impairment provisions are recorded in a separate allowance account with the loss being recognised in profit or loss. Subsequent recoveries of amounts previously written off are credited against other income in profit or loss.

c. Financial assets at fair value through profit or loss

The group classifies the following financial assets at fair value through profit or loss:

- debt investments that do not qualify for measurement at either amortised cost
- equity investments for which the entity has not elected to recognise fair value gains and losses through other comprehensive income

The Group's derivatives, investments in Marquis Macadamias Ltd and Almondco are held at fair value through profit or loss.

Assets included within this category are carried in the Consolidated Statement of Financial Position at fair value with changes in fair value recognised in profit or loss.

Any gain or loss arising from derivative financial instruments is based on changes in fair value, which is determined by direct reference to active market transactions or using a valuation technique where no active market exists.

d. Financial liabilities

Financial liabilities are recognised when the Group becomes a party to the contractual agreements of the instrument. All interest-related charges are reported in profit or loss and are included in the Consolidated Statement of Comprehensive Income line item titled "finance costs".

Financial liabilities that are measured at fair value through profit or loss include the Group's derivatives. All other financial liabilities are measured at amortised cost.

Notes to the Financial Statements

30 June 2025

E6 Financial risk management

The Group is exposed to a variety of financial risks through its use of financial instruments. The Group's overall risk management plan seeks to minimise potential adverse effects due to the unpredictability of financial markets. The Group does not speculate in financial assets.

The most significant financial risks which the Group is exposed to are described below:

- Market risk interest rate risk
- Credit risk
- Liquidity risk

The principal categories of financial instrument used by the Group are:

- · Loans and receivables
- Finance lease receivables
- Cash at bank
- Bank overdraft
- Trade and other payables
- Floating rate bank loans
- Interest rate swaps

a. Financial risk management policies

Risks arising from holding financial instruments are inherent in the Group's activities and are managed through a process of ongoing identification, measurement and monitoring. The Responsible Entity is responsible for identifying and controlling risks that arise from these financial instruments.

The risks are measured using a method that reflects the expected impact on the results and net assets attributable to unitholders of the Group from changes in the relevant risk variables. Information about these risk exposures at the reporting date, measured on this basis, is disclosed below.

Concentrations of risk arise where a number of financial instruments or contracts are entered into with the same counterparty, or where a number of counterparties are engaged in similar business activities that would cause their ability to meet contractual obligations to be similarly affected by changes in economic, political or other conditions.

Interest rate risk and swaps held for hedging

Interest rate risk is managed by using a floating rate debt and through the use of interest rate swap contracts. The Group does not speculate in the trading of derivative instruments.

Interest rate swap transactions are entered into by the Group to exchange variable to fixed interest payment obligations to protect long-term borrowings from the risk of increasing interest rates. The economic entity has variable interest rate debt and enters into swap contracts to receive interest at variable rates and pay interest at fixed rates.

The notional principal amounts of the swap contracts approximate 65.9% (2024: 68.5%) of the Group's floating rate debt at 30 June 2025.

At balance date, the details of the effective interest rate swap contracts are:

	Effective average interest rate payable		Balance	•
	2025	2024	2025	2024
	%	%	\$'000	\$'000
Maturity of notional amounts				
Settlement - between 0 to 3 years	3.37	2.91	338,000	351,000
Settlement - 3 to 5 years	3.11	3.08	77,000	52,000
Settlement - greater than 5 years	2.39	2.50	65,000	110,000
Total			480,000	513,000

Notes to the Financial Statements

30 June 2025

E6 Financial risk management (continued)

b. Interest rate risk and swaps held for hedging (continued)

The following interest rate swap contracts that have been entered into but are not yet effective as at 30 June 2025 are:

	Effective average interest rate payable		Balance	
	2025	2024	2025	2024
	%	%	\$'000	\$'000
Maturity of notional amounts				
Settlement - 3 to 5 years	3.26	-	90,000	-
Settlement - greater than 5 years	2.17	2.17	165,000	165,000
Total			255,000	165,000

The net loss recognised on the swap derivative instruments for the year ended 30 June 2025 was \$20,274,000 (2024: \$3,297,000 loss).

At 30 June 2025 the Group had the following mix of financial assets and liabilities exposed to variable interest rates:

	2025	2024
	\$'000	\$'000
Cash	7,914	7,243
Interest bearing liabilities (current)	(24,454)	(24,454)
Interest bearing liabilities (non-current)	(703,606)	(724,606)
Total	(720,146)	(741,817)

At 30 June 2025, 10.21% (2024: 4.89%) of the Group's debt is fixed, excluding the impact of interest rate swaps.

c. Interest rate risk (sensitivity analysis)

At 30 June 2025, the effect on profit before tax and net assets attributable to unitholders as a result of changes in the interest rate, including the effect of interest rate swaps, finance income and revaluation of derivatives, with all other variables remaining constant, would be as follows:

	2025	2024
	\$'000	\$'000
Change in profit before income tax:		
Increase in interest rate by 1%	16,145	17,570
Decrease in interest rate by 1%	(16,196)	(18,973)
Change in equity:		
Increase in interest rate by 1%	16,145	17,570
Decrease in interest rate by 1%	(16,196)	(18,973)

Notes to the Financial Statements 30 June 2025

E6 Financial risk management (continued)

d. Credit risk

The maximum exposure to credit risk (excluding the value of any collateral or other security) at balance date to recognised financial assets is the carrying amount, net of any provisions for impairment of those assets. This has been disclosed in the Consolidated Statement of Financial Position and notes to the financial statements.

Credit risk and associated impacts are also managed through security, in the form of guarantees, security deposits and property security in favour of the group. Counterparty credit risk for finance leases and term loans have also been assessed and accounted for through the recognition of credit loss provisions.

All the entity's debt investments at amortised cost are considered to have low credit risk and the loss allowance recognised during the year was therefore limited to 12 months' expected losses. Management considers the credit risk to be low where the counterparty does not have material outstanding repayments and has capacity to meet its contractual debt obligations. Debt investments are secured against collateral which is monitored by management. In recognising any potential credit loss provisions, management also assesses the collateral held. Where the fair value of such collateral is greater than the debt investment, a lower loss allowance amount is recognised.

Notes to the Financial Statements 30 June 2025

E6 Financial risk management (continued)

e. Liquidity risk and capital management

The Responsible Entity of the Group defines capital as net assets attributable to unitholders. The Group's objectives when managing capital are to safeguard the going concern of the Group and to maintain an optimal capital structure. The Group manages liquidity risk by monitoring forecast cash flows and ensuring that adequate headroom on borrowing facilities are maintained. The Group is able to maintain or adjust its capital by divesting assets to reduce debt or adjusting the amount of distributions paid to unitholders.

The table below reflects all contractually fixed repayments and interest resulting from recognised financial liabilities as at 30 June 2025. The amounts disclosed in the table are the contractual undiscounted cash flows which have been estimated using interest rates applicable at the reporting date. For interest rate swaps, the undiscounted cash flows have been estimated using forward interest rates applicable at the end of the reporting period.

Units on issue at the beginning of the period	388,243,046	431,496	384,856,558	465,912	
Units issued during the year	1,479,953	2,940	3,386,488	6,421	
Distributions to unitholders	-	(18,412)	-	(40,837)	
Units on issue	389,722,999	416,024	388,243,046	431,496	

The holders of ordinary units are entitled to participate in distributions and the proceeds on winding up of the Group. On a show of hands at meetings of the Group, each holder of ordinary units has one vote in person or by proxy, and upon a poll each unit is entitled to one vote. Voting is determined based on the closing market value of each unit.

The Group does not have authorised capital or par value in respect of its units.

Distributions totalling \$45,692,000 were declared during the year. Distributions are allocated to the components of equity which is comprised of issued units and retained earnings.

Cash at bank	7,914	7,243
	\$'000	\$'000
	2025	2024

Reconciliation of cash

Cash and cash equivalents reported in the Consolidated Statement of Cash Flows are reconciled to the equivalent items in the Consolidated Statement of Financial Position as follows:

	2025	2024 \$'000 7,243	
	\$'000		
Cash and cash equivalents	7,914		
F2 Trade and other receivables			
	2025	2024	
	\$'000	\$'000	
Current			
Trade receivables	11,957	14,763	
Sundry receivables	5,158	2,340	
Receivables from related parties	1,938	3,435	
Total	19,053	20,538	

Trade receivables are initially recognised at fair value and subsequently measured at amortised cost using the effective interest method, less any allowance for expected credit losses. Trade receivables are generally due for settlement within 30 days.

The Group has applied the simplified approach to measuring expected credit losses, which uses a lifetime expected loss allowance. To measure the expected credit losses, trade receivables have been grouped based on days overdue with no significant overdue amounts.

During the year, the Group paid \$2,440,000 to acquire a 50% joint venture shareholding in Cotton JV Pty Limited (Cotton JV) from Queensland Cotton Corporation Pty Limited. The carrying amount of the investment at 30 June 2025 in Cotton JV was \$2,450,000.

The Group also made a \$7,803,000 investment in Inform Ag Pty Limited (Inform Ag) which includes an upfront purchase of shares totalling \$5,000,000 (35% of shares at acquisition), a convertible debt facility totalling \$2,000,000 and options exercised totalling \$803,000 (8% of shares at acquisition). Following the conversion of \$1,000,000 of debt to equity in June 2025, the ownership interest in Inform Ag was 46.7%. This is expected to increase to approximately 50% following the conversion of the remaining tranche of the \$1,000,000 debt facility (refer to E2 – Financial assets – other (non-property related)). The investment in Inform Ag is treated as an associate. The carrying amount of the investment in Inform Ag at 30 June 2025 was \$6,477,000.

Joint ventures

Interests in joint ventures are accounted for using the equity method after initially being recognised at cost in the consolidated statement of financial position.

Associates

Associates are all entities over which the group has significant influence but not control or joint control. This is generally the case where the group holds between 20% and 50% of the voting rights. Investments in associates are accounted for using the equity method of accounting after initially being recognised at cost.

Closing net book amount	1,808	2,149	2,489	6,461	12,907

Biological assets relate to the Group's farming operations. In accordance with AASB 141 *Agriculture*. The Group's cropping biological assets have been recognised at fair value as determined based on the present value of expected net cash flows from the crops.

Cattle biological assets relates to livestock recognised at fair value as determined based on sales for similar cattle in active markets.

Fair value has been based on expected net cash flows from the crops discounted from the time of harvest. The main level 3 inputs used by the Group includes estimates based on production costs (including input and harvest costs) and the estimated time of harvest adjusted for the risks of the cash flows.

Significant estimates used in determining the expected net cash flows:

Sugar from cane planted (tonnes per ha)	The higher the sugar from cane planted, the higher the fair value
Yield	The higher the yield, the higher the fair value
Price (\$ per tonne)	The higher the net price, the higher the fair value

Changes in the fair value of biological assets are recognised in the Consolidated Statement of Comprehensive Income in the year they arise.

Judgements and estimates are made in determining the fair values of the biological assets that are recognised and measured at fair value in the financial statements. To provide an indication about the reliability of the inputs used in determining fair value, the Group has classified its biological assets into three levels prescribed under the accounting standards.

G. ADDITIONAL INFORMATION

G1 Key management personnel

Related parties are persons or entities that are related to the Group as defined by AASB 124 *Related Party Disclosures*. These include directors and other key management personnel and their close family members and any entities they control as well as subsidiaries and associates of the Group. The following provides information about transactions with related parties during the year as well as balances owed to or from related parties as at 30 June 2025.

Directors

The Directors of RFM are considered to be key management personnel of the Group. The Directors of the Responsible Entity in office during the year and up to the date of this report are:

Guy Paynter David Bryant Michael Carroll Julian Widdup Andrea Lemmon

Interests of Directors of the Responsible Entity

Units in the Group held by Directors of RFM or related entities controlled by Directors of RFM as at 30 June 2025 are:

	Guy Paynter	David Bryant*	Michael Carroll	Julian Widdup	Andrea Lemmon
	Units	Units	Units	Units	Units
Balance at 30 June 2023	1,744,710	16,944,462	267,408	141,740	183,357

Balance at 30 June 2025	2,044,710	16,944,462	350,604	148,481	183,357

^{*}Includes interests held by Rural Funds Management Limited as the Responsibly Entity.

Other key management personnel

In addition to the Directors noted above, RFM, as Responsible Entity of the Group is considered to be key management personnel with the authority for the strategic direction and management of the Group.

The constitutions of Rural Funds Trust and RF Active (the stapled entities forming the Group) are legally binding documents between the unitholders of the Group and RFM as Responsible Entity. Under the constitutions, RFM is entitled to the following remuneration:

- Management fee: 0.6% per annum (2024: 0.6%) of adjusted total assets; and,
- Asset management fee: 0.45% per annum (2024: 0.45%) of adjusted total assets.

Compensation of key management personnel

No amount is paid by the Group directly to the Directors of the Responsible Entity. Consequently, no compensation as defined in AASB 124 *Related Party Disclosures* is paid by the Group to the Directors as key management personnel. Fees paid and payable to RFM as Responsible Entity are disclosed in note G2.

Notes to the Financial Statements

Total amounts received from RFM and related entities	12,902	12,653

The terms and nature of the historical transactions between the Group and related parties have not changed during the year ended 30 June 2025. Transactions entered between related parties during the year have been reviewed.

Expenses reimbursed to RFM relates to expenses incurred or paid by RFM on behalf of the Group which are subsequently reimbursed by the Group. Examples of these expenses include corporate overheads, professional service fees such as legal, audit and tax matter costs, and regulatory fees and charges.

RFM Macadamias and RFM Farming perform management activities, including capital development, farming operations and farm management on behalf of the Group. Expenses include service recharge cost recoveries, costs relating to farm management and capital development costs. These costs incurred by RFM Macadamias and RFM Farming are subsequently reimbursed by the Group. Additional costs were incurred by RFM Macadamias and RFM Farming on behalf of the Group as a result of the ongoing macadamia developments and the Group's farming operations.

Rental income from RFM Farming largely relates to rental income from the Bonmac property.

Rental income from Cattle JV largely relates to rental income from Mutton Hole and Oakland Park properties.

Rental income from Cotton JV relates to rental income from Lynora Downs property.

Finance income from Cattle JV relates to breeder herds under finance.

Finance income from J&F Australia Pty Limited (J&F) relates to the \$123.0 million (2024: \$123.0 million) limited guarantee provided to J&F, a wholly owned subsidiary of Rural Funds Management Limited. From the provision of this guarantee, the Group earns a guarantee fee classified as finance income.

Expenses charged to RFM Macadamias, RFM Farming, Cattle JV and Cotton JV relate to farm management operating costs and property rates that are incurred by the Group and subsequently reimbursed to the Group.

Financial Guarantee

The Group provides a \$123,000,000 (2024: \$123,000,000) limited guarantee to J&F Australia Pty Ltd (J&F). The guarantee is currently used to support \$123,000,000 of J&F's debt facility which is used for cattle purchases, feed and other costs associated with finishing the cattle on the feedlots, enabling J&F to supply cattle to JBS Australia Pty Limited (JBS) for its grain fed business and the funding of grain in JBS' Rivalea business. The guarantee earns a return for RFF equivalent to an equity rate of return which is calculated on the amount of the guarantee during the period.

	Units	%	Units	%
Rural Funds Management	13,157,659	3.38	13,157,659	3.39

Other

David Bryant is a director of Marquis Macadamias Limited. Marquis Macadamias Limited provides processing and selling services for the Group's macadamia operations on the Beerwah, Bauple, Swan Ridge and Moore Park properties. The Group also holds shares in Marquis Macadamias Limited. Marquis Macadamias Limited is not a related party as defined by AASB 124 *Related Party Disclosure*. Procedures are in place to manage any potential conflicts of interest.

Notes to the Financial Statements

30 June 2025

G3 Parent entity information

The Group was formed by the stapling of the units in two trusts, Rural Funds Trust and RF Active. In accordance with Accounting Standard AASB 3 *Business Combinations*, the stapling arrangement referred to above is regarded as a business combination and the Rural Funds Trust has been identified as the parent for preparing Consolidated Financial Reports. RFM Australian Wine Fund and Agricultural Income Trust Fund 1, holding the Group's vineyard assets, are wholly owned subsidiaries of Rural Funds Trust. The financial information of the parent entity, Rural Funds Trust has been prepared on the same basis as the consolidated financial statements, except as set out below.

Investments in subsidiaries and associates

Investments in subsidiaries and associates are accounted for at historical cost less any accumulated impairment. Distributions received from equity investments are recognised in the parent entity's profit or loss when its right to receive the distribution is established.

The individual financial statements of the parent entity, Rural Funds Trust, show the following aggregate amounts:

Gross debt - variable interest rates	(728,060)	(749,060)
Net debt	(802,951)	(780,315)

Notes to the Financial Statements

30 June 2025

G5 Remuneration of auditors

During the year the following fees were paid or payable for services provided by the auditor of the Group:

	2025 \$	2024 \$
PricewaterhouseCoopers Australia:	·	·
Audit and review of financial statements	621,379	589,553
Compliance audit	53,501	50,931
Total	674,880	640,484

G6 Other accounting policies

Cash and cash equivalents

Cash and cash equivalents comprise cash on hand, demand deposits and short-term investments with less than 3 months of original maturity which are readily convertible to known amounts of cash and which are subject to an insignificant risk of change in value.

Bank overdrafts also form part of cash equivalents for the purpose of the Consolidated Statement of Cash Flows and are presented within current liabilities on the Consolidated Statement of Financial Position.

Goods and services tax (GST)

Revenue, expenses and assets are recognised net of the amount of goods and services tax (GST), except where the amount of GST incurred is not recoverable from the Australian Taxation Office (ATO).

Receivables and payables are stated inclusive of GST.

The net amount of GST recoverable from, or payable to, the ATO is included as part of trade and other receivables or payables in the Consolidated Statement of Financial Position.

Cash flows in the Consolidated Statement of Cash Flows are included on a gross basis and the GST component of cash flows arising from investing and financing activities which is recoverable from, or payable to, the taxation authority is classified as operating cash flows.

Leases

Leases of fixed assets or biological assets where substantially all the risks and benefits incidental to the ownership of the asset, but not the legal ownership, are transferred from the lessor, are classified as finance leases.

Lease payments for operating leases, where substantially all of the risks and benefits have not been transferred from the lessor, are charged as expenses on a straight-line basis over the life of the lease term.

Lease incentives under operating leases are recognised as part of the property assets and amortised on a straight-line basis over the life of the lease term.

Provisions

Provisions are recognised when the Group has a legal or constructive obligation, as a result of past events, for which it is probable that an outflow of economic benefits will result, and that outflow can be reliably measured.

Provisions are measured at the present value of management's best estimate of the outflow required to settle the obligation at the end of the reporting period. The discount rate used is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. The increase in the provision due to the unwinding of the discount is taken to finance costs in the Consolidated Statement of Comprehensive Income.

Provisions for distributions

Provision is made for the amount of any distribution declared, being appropriately authorised and no longer at the discretion of the Group, on or before the end of the reporting period but not distributed at the end of the reporting period.

Notes to the Financial Statements 30 June 2025

G7 Limited guarantee - Wyseby

In June 2023, the Group acquired a property adjoining the Rewan Cattle Property, Wyseby, as a tenant-in-common arrangement (57.25%). A borrowing facility was provided by Cooperatieve Rabobank relating to the acquisition of the property. In addition, the Group has provided a limited guarantee to Rabobank Australia Limited in respect of the other purchasing party's debt obligations relating to their share of Wyseby. The parties will seek to subdivide the property, in their respective ownership portions, after which the guarantee will no longer be required.

G8 Events after the reporting date

In August 2025, the Group completed the sale of 2,254ML of High Security Murrumbidgee River water entitlements.

No other matter or circumstance has arisen since the end of the year that has significantly affected or could significantly affect the operations of the Group, the results of those operations or the state of affairs of the Group in future financial years.

G9 Contingent liabilities

In June 2023, a civil claim was filed in the Supreme Court of Queensland against Certane CT Pty Limited as custodian of the Rural Funds Group, RFM Farming Pty Ltd (RFMF) and an employee of RFMF relating to alleged spray drift from the Baamba Plains property in Queensland. RFM was added as a defendant in October 2024. RFM is defending this claim and based on the relevant facts and an indemnity provided by RFM Farming to the Rural Funds Group, there is no material exposure expected to the Group.

Other than what has been disclosed, there are no contingent liabilities as at 30 June 2025.

Directors' Declaration 30 June 2025

In the Directors of the Responsible Entity's opinion:

7-4

- 1 The financial statements and notes of Rural Funds Group set out on pages 14 to 71 are in accordance with the *Corporations Act 2001*, including:
 - a. complying with Accounting Standards, the *Corporations Regulations 2001* and other mandatory professional reporting requirements; and
 - b. giving a true and fair view of the Group's financial position as at 30 June 2025 and of its performance for the year ended on that date; and
- There are reasonable grounds to believe that the Group will be able to pay its debts as and when they become due and payable.

The Directors have been given the declarations by the persons performing the chief executive officer and chief financial officer functions as required by section 295A of the *Corporations Act 2001*.

This declaration is made in accordance with a resolution of the Board of the Directors of Rural Funds Management Limited.

David Bryant Director

22 August 2025

Independent auditor's report

To the stapled security holders of Rural Funds Group

Report on the audit of the financial report

Our opinion

In our opinion:

The accompanying financial report of Rural Funds Trust (RFT) and its controlled entities, which includes RF Active (RFA), (together the Group) is in accordance with the *Corporations Act 2001*, including:

- a. giving a true and fair view of the Group's financial position as at 30 June 2025 and of its financial performance for the year then ended
- b. complying with Australian Accounting Standards and the Corporations Regulations 2001.

What we have audited

For the purpose of consolidation accounting, RFT is the deemed parent entity and acquirer of RFA. The financial report represents the consolidation financial results of RFT and includes RFT and its controlled entities and RFA.

The financial report comprises:

- the consolidated statement of financial position as at 30 June 2025
- the consolidated statement of comprehensive income for the year then ended
- the consolidated statement of changes in net assets attributable to unitholders for the year then ended
- the consolidated statement of cash flows for the year then ended
- the notes to the consolidated financial statements, including material accounting policy information and other explanatory information
- the directors' declaration.

Basis for opinion

We conducted our audit in accordance with Australian Auditing Standards. Our responsibilities under those standards are further described in the *Auditor's responsibilities for the audit of the financial report* section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We are independent of the Group in accordance with the auditor independence requirements of the *Corporations Act 2001* and the ethical requirements of the Accounting Professional & Ethical Standards Board's APES 110 *Code of Ethics for Professional Accountants (including Independence Standards)* (the Code) that are relevant to our audit of the financial report in Australia. We have also fulfilled our other ethical responsibilities in accordance with the Code.

Our audit approach

An audit is designed to provide reasonable assurance about whether the financial report is free from material misstatement. Misstatements may arise due to fraud or error. They are considered material if individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the financial report.

We tailored the scope of our audit to ensure that we performed enough work to be able to give an opinion on the financial report as a whole, taking into account the geographic and management structure of the Group, its accounting processes and controls and the industry in which it operates.

The structure of Rural Funds Group is commonly referred to as a "stapled group". In a stapled group the securities of two or more entities are 'stapled' together and cannot be traded separately. In the case of the Group, the units in RFT have been stapled to the units in RFA. For the purposes of consolidation accounting, RFT is 'deemed' the parent and the Group financial report reflects the consolidation of RFT and its controlled entities, including RFA.

Audit scope

Our audit focused on where the Group made subjective judgements; for example, significant accounting estimates involving

Key audit matters

- Amongst other relevant topics, we communicated the following key audit matters to the Audit and Risk Committee:
 - Valuation of agricultural properties; and

Audit scope

assumptions and inherently uncertain future events.

 The audit of the Group was performed by a team which included individuals with industry expertise, as well as property valuation experts, who assisted in our assessment of the reasonableness of some of these subjective judgements.

Key audit matters

- Related party transactions.
- These are further described in the *Key audit matters* section of our report.

Key audit matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the financial report for the current period. The key audit matters were addressed in the context of our audit of the financial report as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. Further, any commentary on the outcomes of a particular audit procedure is made in that context.

Key audit matter

Valuation of agricultural properties, which comprise: Investment property, Bearer plants, Intangibles (water entitlements) and Property – owner occupied (Refer to notes C2, C3, C5 and C6)

The Group holds agricultural properties for longterm leasing or for further development.

Each agricultural property held for leasing or development comprises one or more of the following three components:

- investment property (including land and infrastructure attached to land)
- bearer plants (including almond trees, macadamia trees and wine grape vines)
- water entitlements.

Agriculture properties on which cropping operations are currently conducted by the Group are classified as property owner occupied.

How our audit addressed the key audit matter

For a selection of external valuations obtained by the Group, together with PwC real estate property valuation experts we performed the following procedures, amongst others:

- assessed the competency, qualifications, experience and objectivity of the external valuers
- read the external valuers' terms of engagement to identify any terms that might affect their objectivity or impose limitations on their work relevant to the valuation
- interviewed external valuers in relation to properties subject to valuation and on the rationale behind the chosen allocation techniques and key assumptions
- compared inputs used in the valuation and allocation models, such as rental income and lease terms, to the relevant lease agreements and/or other supporting documents

Key audit matter

External valuations provide an aggregate value for each agricultural property. Key variables and considerations in the valuations can include discount rates, terminal capitalisation rate, market rent, cattle carrying capacity. Factors such as associated lease agreements, comparable sales, prevailing market conditions, and the individual nature, condition and location of these properties impact these variables, and overall valuations.

The aggregate value of each agricultural property is allocated across the components of investment property (carried at fair value), bearer plants (carried under revaluation model), water entitlements (carried at cost less accumulated impairment), and property – owner occupied (carried under revaluation model).

The directors, or external valuers where appropriate, determined the suitable allocation technique to be applied to each agricultural property, considering the nature and characteristics of the property including any lease encumbrances.

This was a key audit matter because:

- agricultural properties are fundamental to the Group's business model. Investment properties, bearer plants and water entitlements, and property owner occupied form the majority of the Group's assets in the consolidated statement of financial position
- by nature the agricultural property valuations are inherently subjective due to the use of assumptions and estimates in the valuation model
- the selection and application of allocation techniques are inherently subjective due to the unique characteristics of each property
- the valuations and allocation outcomes are sensitive to key inputs/assumptions in the model such as the discount rate and terminal capitalisation rates, the utilisation of comparable sales data and to allocation techniques.

How our audit addressed the key audit matter

- assessed the appropriateness of certain inputs including, where applicable, comparable sales, market rents, discount rate, terminal capitalisation rate, \$ per irrigated or planted hectare, average \$ per plantable hectare, \$ per adult equivalent (AE) carrying capacity used in the valuation and allocation models, for a sample of properties based on benchmark market data.
- inspected the final valuation reports and compared the fair value as per the valuation to the value recorded in the Group's accounting records.

For properties not subject to external valuations in the current year, we evaluated the directors' internal assessment of the fair value of the properties. This included assessing the valuation methodologies and key assumptions; or the assertion that the properties are carried at fair value as per the latest external valuation report, adding any capital expenditure made during the intervening period.

We assessed the reasonableness of the disclosures in Notes C1, C2, C3, C5 and C6 of investment property, bearer plants, water entitlements and property-owner occupied considering the requirements of Australian Accounting Standards.

Key audit matter

How our audit addressed the key audit matter

Related party transactions (refer to note G2)

The Group's Responsible Entity, along with other funds for which it is the Responsible Entity, are considered related parties of the Group.

Key transactions with these parties include:
• rental income from the lease of agricultural properties

- finance income from the lease of cattle
- management fees and asset management fees paid
- distributions from investments
- reimbursement of operating expenses and capital expenditure
- provision of a limited financial guarantee and receipt of associated finance income.

Related party transactions were a key audit matter due to the significant impact of these transactions on the results of the Group.

Additionally, because of their nature, they are pervasive and material to the presentation of and disclosures within the financial report.

We performed the following procedures over related party transactions, amongst others:

Developed an understanding of the Group's relevant controls and processes for identifying related parties and related party transactions. For significant contracts entered into during the year, we verified that the transactions were approved.

For a sample of lease income recorded during the year, we compared the lease income to the relevant supporting documents including the lease agreements and bank statements.

For a sample of cropping expenses/macadamia development costs recharged, we obtained and agreed to relevant supporting documents including invoices.

For management fees and asset management fees, we compared the rates used to determine fees to the rates disclosed in the explanatory memorandum issued on formation of the Group.

We inquired with management to develop an understanding of the business rationale for the related party transactions.

In relation to the financial guarantee, we developed an understanding of the arrangement from reading the historic Explanatory memorandum, subsequent amendments and from discussions with management and others of the purpose, terms and conditions, and substance of the arrangement. For a sample of guarantee income recorded we agreed to relevant supporting documents including invoices and bank statements.

We assessed the reasonableness of the disclosures in Note G2, of related party relationships and transactions considering the requirements of Australian Accounting Standards.

Other information

The directors of the Responsible Entity are responsible for the other information. The other information comprises the information included in the annual report for the year ended 30 June 2025, but does not include the financial report and our auditor's report thereon. Prior to the date of this auditor's report, the other information we obtained included the Directors' Report, Additional Information for Listed Public Entities, and the Corporate Directory. We expect the remaining other information to be made available to us after the date of this auditor's report.

Our opinion on the financial report does not cover the other information and we do not and will not express an opinion or any form of assurance conclusion thereon through our opinion on the financial report.

In connection with our audit of the financial report, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial report or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

If, based on the work we have performed on the other information that we obtained prior to the date of this auditor's report, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

When we read the other information not yet received, if we conclude that there is a material misstatement therein, we are required to communicate the matter to the directors of the Responsible Entity and use our professional judgement to determine the appropriate action to take.

Responsibilities of the directors of the Responsible Entity for the financial report

The directors of the Responsible Entity are responsible for the preparation of the financial report in accordance with Australian Accounting Standards and the *Corporations Act 2001*, including giving a true and fair view, and for such internal control as the directors of the Responsible Entity determine is necessary to enable the preparation of the financial report that is free from material misstatement, whether due to fraud or error.

In preparing the financial report, the directors of the Responsible Entity are responsible for assessing the ability of the Group to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors of the Responsible Entity either intend to liquidate the Group or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial report

Our objectives are to obtain reasonable assurance about whether the financial report as a whole is free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Australian Auditing Standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the financial report.

A further description of our responsibilities for the audit of the financial report is located at the Auditing and Assurance Standards Board website at: https://auasb.gov.au/media/bwvjcgre/ar1_2024.pdf. This description forms part of our auditor's report.
