Data#3 Managing Director and Chief Executive Officer Mr Colledge said: "Our outlook remains positive. While we expect Software Solutions growth to be under pressure in the short term as we manage through the Microsoft channel incentive transitions, we should see continued growth in our Infrastructure Solutions and Services businesses.

"There is opportunity across end user compute, the network and server and storage. Our managed service offerings continue to mature, providing the opportunity for more recurring revenue and all our offerings, across all lines of business, will benefit from the evolution and growth of AI."

Mr Colledge said: "Consistent with previous practice, we are not providing specific FY26 guidance at this stage. In line with previous years, we expect a sales peak in the months of May and June, and to continue to deliver sustainable earnings growth for our shareholders."
