New Hope Corporation Limited (**ASX:NHC**) (the **Company** or **New Hope**) has today released its full year results for the 2025 financial year, confirming another strong increase in saleable coal production as the Company continues to execute its organic growth plans.

During the year, Bengalla Mine delivered 7.9Mt in coal sales (2024: 7.8Mt) and reduced its unit cost of production despite being impacted by significant weather events and logistics constraints in the Hunter Valley.

New Acland Mine delivered another increase in saleable coal production as the ramp-up of Stage 3 continues. In addition, the conclusion of the Oakey Coal Action Alliance's legal challenge provides certainty for the community and a pathway to reach production of ~5Mtpa.

¹ Figures reflect New Hope Group equity interest basis.

² Free on Board cash cost (excluding state royalties and trade coal) per sales tonne.

³ Underlying earnings before interest, tax and depreciation and amortisation (EBITDA) is a non-IFRS measure.

During the year, New Hope increased its equity interest in Malabar Resources Limited by 3.00 per cent to 22.98 per cent, further growing exposure to high-quality metallurgical coal in alignment with the Company's strategy of investing in low-cost coal assets with long-life approvals.

Despite external operating challenges and a lower coal price environment, the Company's increased coal production and disciplined cost control has enabled the Board to declare a fully franked final dividend of 15.0 cents per ordinary share.

Comments from New Hope Group Chief Executive Officer Rob Bishop:

"Despite navigating logistics constraints, periods of wet weather and a lower coal pricing environment, we've delivered a strong performance for the 2025 financial year."

"The continued execution of our organic growth plans has provided another considerable increase in saleable coal production, which has underpinned the reduction in our unit costs."

"In a low coal price environment, our assets remain resilient and continue to generate solid margins through the cycle, allowing us to provide continued returns to our shareholders."

"As a result of our performance, we are able to reward shareholders with a fully franked final dividend of 15.0 cents per ordinary share. In addition, we are pleased to announce the introduction of a Dividend Reinvestment Plan that provides shareholders additional optionality regarding the payment of dividends."

"Looking forward, we are focused on remaining a resilient, low-cost coal producer and continuing to execute our organic growth plans, which will enable us to continue to deliver shareholder value."
