The Key Unique Benefits of an Investment in AMCIL

The key unique benefits of AMCIL are the combination of:

Focused portfolio invested in quality companies where holding size is not determined by the index weighting

Alignment of interests

- ✓ Comparatively low management cost
- √ No performance fees
- ✓ Equity ownership by directors and staff

Tax effectiveness from a low turnover, long term investment approach

A Closer Look at AMCIL's Investment Approach

Attributes of a high-quality company that we seek:

- Unique assets that are hard to replicate or have an Industry leadership position (or developing one)
- Sustainability of competitive advantage
- Not unduly burdened by external risk factors
- · Conservative balance sheets (low debt)
- Consistency of earnings
- Run by effective, passionate management with ownership alignment

Why this matters:

- The presence of these factors drives a competitive advantage
- Which leads to a high return on capital
- And allows for reinvestment opportunities to drive growth
- Which allows for market share capture and further enhancement of leadership position
- Which combines to deliver long term shareholder value creation

We seek to buy these companies when we identify long term value and reduce or exit when they no longer meet these characteristics.

Key Drivers Of Recent Underperformance

Recent Underperformance of Key Holdings

Drifting Share Prices

- Pull back in our larger holdings - CSL, Macquarie Technology, Mainfreight
- These moves are based largely off short-term changes in sentiment
- The long-term thesis for these companies is unchanged

Cyclical Headwinds

- Softness in the US housing market impacted James Hardie and Reece
- These business have dominant market positions
- Long term market opportunity unchanged

Index Winners

- Significant underweight across all four banks has impacted relative performance
- Sector is trading at record valuation multiples and the earnings growth outlook remains limited

Gold

- The gold price has reached all-time highs
- History shows these cycles tend to be extreme in both directions
- Gold mining companies are typically lower quality, with complex operations

Share Prices Have Drifted In Our Larger Holdings

- · Recent update was disappointing
- Solid earnings outlook (9-10% growth) and compelling valuation. Conservative gearing ~1.8x

- Founder led. Growth outlook and return on equity support valuation
- · Strong balance sheet with under-utilised asset base

Notes: Price returns to 19/09/25 Source: FactSet

Annual General Meeting – October 2025

Share Prices Have Drifted In Our Larger Holdings

- Data Centre expansion is on-track with no debt on the balance sheet
- Aligned and highly capable founder. Investment case unchanged

- · Tariff uncertainty has weighed on the share price
- Under-rated US business opportunity supports our investment thesis

Notes: Price returns to 19/09/25 Source: FactSet

Annual General Meeting - October 2025

A Cyclical Downturn Creating Short-Term Headwinds

- · Market leader in a large, growing market
- Debt-funded acquisition has weighed on the share price
- Market opportunity remains unchanged

- Founder led. Market leader in Australia
- Less established US business facing cyclical headwinds
- Long-term opportunity remains but may require patience

Annual General Meeting – October 2025

Share Prices Have Diverged From Earnings Growth

Annual General Meeting – October 2025

Valuation Metrics – CBA vs. CSL

Annual General Meeting – October 2025

Banks Have Reached Record High Valuations

The Gold Price Has Run To All Time Highs

The gold price has reached record highs, driven by geopolitical uncertainty, Central Bank Buying, rising Government debt, and easing monetary conditions (rate cuts)

History shows these moves are often extreme in both directions

Gold mining stocks have outperformed substantially

These companies can have complex operations and limited lifespans, meaning it can be difficult to have long-term conviction

Portfolio Well Positioned For The Future

AMCIL's portfolio is well placed to navigate a wide range of economic outcomes

AMCIL's Portfolio Quality Characteristics

'Quality' for AMCIL means seeking high returning businesses with attractive earnings growth potential, aligned backable managers and Balance Sheet strength.

We invest in great companies with a resilient ability to grow profits over the long-term

Outlook

The ASX200 index is trading at all time highs and market valuation looks expensive, especially against long term valuation metrics.

Speculative market behaviour warrants caution.

Reinforce value considerations within our process.

With elevated cash holdings AMCIL is well positioned to take advantage of opportunities that will ultimately emerge.

The portfolio is well positioned to weather portfolio volatility with a focus on quality companies:
