ABx Group Managing Director and CEO Dr Mark Cooksey will provide an overview of the Company's recent activities across its rare earth exploration and bauxite development operations.

At the Company's Deep Leads rare earth project located 45km west of Launceston in northern Tasmania, ABx has recently received excellent extraction results reported by the Australian Nuclear Science and Technology Organisation (ANSTO).

The extractions from larger-scale slurry tests involving 300g samples returned¹:

- 60-66% for dysprosium (Dy) and 55-62% for terbium (Tb)
- 65-72% for neodymium (Nd) and 63-70% for praseodymium (Pr)

ANSTO remains on schedule to deliver a mixed rare earth carbonate (MREC) sample in Q4 2025.

Meanwhile, ABx Group has also executed a series of agreements with Good Importing International (GII) to develop the Company's bauxite projects².

Under the agreements, GII will invest up to \$5.4m to acquire up to a 75% interest in the ABx Sunrise Bauxite Project in Queensland. GII also has a 9-month exclusive option to invest up to \$4.8m to acquire a 75% interest in the ABx Taralga and Penrose Bauxite Projects in New South Wales.

Following the presentation, Dr Cooksey will participate in a moderated Q&A session which will allow investors to put questions directly to management.

A recorded copy of the webinar will be made available following the event.

This announcement is approved for release by Managing Director and CEO Mark Cooksey.

About ABx Group Limited

ABx Group Limited (ABx) is a uniquely positioned Australian company delivering materials for a cleaner future.

The three priority projects are:

- **Rare earths:** Supplying light and heavy rare earths from Tasmania into Western supply chains
- **Fluorine waste recycling:** Producing industrial chemicals from aluminium smelter waste (ALCORE)
- **Bauxite:** Mining bauxite resources for the aluminium, cement and fertiliser industries

ABx endorses best practices on agricultural land and strives to leave land and environment better than we find it. We only operate where welcomed.
