

MARKET RELEASE (ASX:RDY)

Update on response to cyber incident

3 November 2025 – Ready Tech Holdings Limited (ASX:RDY) (**ReadyTech** or **Company**) refers to its announcements on 17 October 2025 and 24 October 2025 regarding a cyber incident involving its hosted student management system, VETtrak (**Platform**).

On 31 October 2025, the Company became aware that at approximately 9:00pm AEDT the cybercriminal involved published 13,866 files (**Impacted Dataset**), originating from the Platform. With the support of cyber security experts, the Company has downloaded the Impacted Dataset, conducted a technology-assisted data review and notified 23 VETtrak customers, whose data is involved. The Company is now working with its customers to understand the contents of the Impacted Dataset.

Although the specific categories will vary according to each customer, we anticipate that the Impacted Dataset may include contact information, financial details, Tax File Numbers, identity information, health information and other sensitive information. While initial analysis suggests that less than 3,000 individuals may be involved in total, the Company will work with the affected VETtrak customers to conduct a risk of harm analysis and depending on the categories of personal information involved, identify and notify affected individuals, as required.

The Supreme Court of New South Wales has granted an injunction prohibiting any access to, disclosure of, or dissemination of data involved in the incident, including Impacted Dataset. The Company urges that no one tries to access the post or the data, as such actions constitute the breach of a court order.

The Company has updated the Office of Australian Information Commissioner (OAIC) and will also continue to brief the National Office of Cyber Security (NOCS) and other relevant authorities including law enforcement and the Australian Cyber Security Centre (ACSC).

The Company sincerely apologises to their VETtrak customers and affected individuals impacted by this incident. The Company's highest priority is to ensure the security and privacy of customer data. The Company will continue to keep our customers and stakeholders updated as more information becomes available.

– ENDS –

This announcement has been authorised for release by the Board of Directors of ReadyTech Holdings Limited.
