ASX Announcement (AMX)

Significant update to MetroMap platform

Highlights

- Largest ever update to MetroMap Mapviewer platform
- Major new features including Oblique Imagery and Elevation tool
- New Modern look User Interface
- Increased coverage area with the same cost base
- Investment in Sales team with a proven talent and online channel
- Annual Contract value (ACV) now exceeding the cost to deliver the platform
- Update is the first stage in the development of long-term strategic roadmap

Aerometrex Limited (ASX: AMX) is pleased to announce the largest ever update to its flagship MetroMap Mapviewer. The product is now positioned with all the pieces necessary to achieve accelerated and sustained growth

MetroMap Mapviewer New features

MetroMap Mapviewer has added Oblique imagery allowing users to view imagery from every angle and an Elevation tool which enables users to measure heights of terrain, natural and built objects. Dynamic Contour Lines and Terrain Hillshade have been added along with a new User Interface. AI generated Insights layers identifying objects like swimming pools, solar panels and tree coverage have been added. These changes have been made in direct response to customer requests and are expected to increase appeal to a broader audience and support an increase in Average Revenue Per Subscriber (ARPS).

Rebuilt Sales function

As previously reported, Aerometrex has rebuilt its Sales function and team with industry veterans who have proven success driving growth at leading SaaS organizations. This new commercial structure is designed to accelerate enterprise adoption and extend reach into high-value verticals. There is continued investment in Digital Strategy including an improved E-commerce function allowing customers to self-service purchases if they chose.

MetroMap Capture Program

The MetroMap Capture program coverage continues to increase annually with 15% YoY increase over the past two calendar years, in response to customer demand. MetroMap now covers 94% of the population. Along with Vertical imagery, our multi-sensor strategy supports capture with Oblique imagery, Near Infrared and LiDAR data, leading to the availability of “off the shelf” datasets, creating a new revenue source.

MetroMap “breakeven”

MetroMap Annual Contract Value (ACV) reached \$11.54m at the end of FY26 Q1, covering the cost to deliver the MetroMap program. With a fixed cost base to deliver the program, additional ACV past this point directly supports further investment in product development and customer growth

Commenting on the progress of MetroMap, Aerometrex Managing Director & CEO Robert Veitch said:

We now have all the building blocks to take MetroMap to the next level, we have the product, the team, the coverage and the subscriber base to build sustained growth. While this is a major update, it’s only the first part of the company’s long term roadmap which will differentiate MetroMap from its competitors. As the only Australian owned image subscription product I’m very excited to see what the remainder of FY26 brings.

This release is approved by the Board of Directors of Aerometrex Limited.
