Results for announcement to the market

For the half year ended 30 September 2025 (“reporting period”)

		30 September 2025	% Change from 6 months ended 30 September 2024 %	30 September 2024 (previous corresponding period)
		A\$'000		A\$'000
Fee and trading income	Down	109,106	(5%)	114,520
Revenue from ordinary activities	Down	113,498	(5%)	119,303
Net profit for the period attributable to members of parent (before non-controlling interest)	Down	2,366	(78%)	10,712

Statutory net profit after tax was \$2.4 million, a decrease of 78% from \$10.7 million in the prior corresponding period (PCP). This was driven by Fee and Trading Income of \$109.1 million, down 4.7% on PCP, reflecting ongoing global macroeconomic uncertainty and subdued business confidence across key markets. Total expenses increased 8.7% to \$105.5 million, largely due to higher employment and promotional costs to support the accelerated 2.0 strategy, as well as \$3.2 million of higher-than-expected bad debts arising from a small number of incidents in the North American Corporate segment. The Group is actively pursuing recoveries and has strengthened its risk controls. The result also included a \$1.1 million fair value gain on contingent consideration.

The Group continued to execute on its mission to simplify financial operations for global businesses, with its 2.0 strategy providing a strong foundation for future revenue growth through the New Client Platform (NCP). The NCP is now live across all major markets, with Corporate client migration progressing to plan and generating healthy engagement. Delivery remains excellent, with 115 new products, features and services launched during the half. These new capabilities have supported an uplift in product per client and 23.8% growth in non-FX revenue from 1Q26 to 2Q26, with 6.1k clients now holding an interest bearing balance on the platform. The Group continues to invest in training and development across commercial teams, driving improved client activation and higher marketing opt-in rates, supporting future growth.

Fee and Trading Income was \$109.1 million, down 4.7% on the prior corresponding period (PCP), reflecting ongoing global macroeconomic uncertainty and subdued business confidence across key markets. By region, APAC was down 6.2%, EMEA up 1.9%, and North America down 7.5%.

Corporate segment revenue was \$65.4 million, down 5.7% on PCP but up 2.3% on 2H25. Lower business confidence drove a 9.0% decline in cross-currency average transaction values, partially offset by a 5.7% increase in transaction volumes. The rate of decline in active Corporate clients continued to slow, supported by accelerated NCP migration and 11.8% growth in Corporate (excl OLS) new transacting clients (NTCs). Average revenue per client (ARPC) remained steady at \$4.1k.

High-value Consumer revenue was \$30.6 million, down 11.5% on PCP due to softer consumer confidence and low volatility. Enterprise revenue grew strongly to \$6.5 million, up 46.7% on PCP.

Net Operating Income (NOI) was \$105.0 million, down 5.6% on PCP but up 1.2% on 2H25. Underlying operating expenses rose 10.2% to \$90.5 million, reflecting higher employment and promotional costs to support the accelerated 2.0 strategy. This included \$3.2 million of higher-than-expected bad debts from a small number of incidents in the North American Corporate segment. The Group is pursuing recoveries and has strengthened risk controls. Excluding bad debts, underlying operating expenses increased 7.2%.

¹ Net operating income, a non-IFRS measure, is the combination of 'Fee and trading income' and 'Fee and commission expense' and 'Interest income'.

² Earnings before interest expense, taxation, depreciation and amortisation (EBITDA) is a non-IFRS, unaudited measure.

OFX Group Limited

Underlying EBITDA was \$14.4 million, down 50.1% on PCP, reflecting softer trading conditions and strategic investment in future growth.

The global roll-out of the NCP continues to deliver a strong client engagement, with growth in new clients across all regions. At the end of 1H26, approximately 39% of existing Corporate clients had migrated to NCP, with migration completion expected through 2H26. The Group has completed a refresh of its High-value Consumer strategy, with migration of this segment to the NCP expected in FY27.

The Group maintains a strong balance sheet and a healthy cash flow. Following \$2.5m principal debt repayment and \$1.9m share buybacks, it closed with \$47.1 million Net Available Cash and \$75.4m Net Cash Held as of 30 September 2025.

Note 1. Basis of preparation

This Interim Financial Report for the half year ended 30 September 2025 has been prepared in accordance with Accounting Standard AASB 134 *Interim Financial Reporting* and the *Corporations Act 2001*.

This Interim Financial Report does not include all the notes of the type normally included in an annual financial report. Accordingly, this report is to be read in conjunction with the annual report for the year ended 31 March 2025 and any public announcements made by OFX Group Limited during the interim reporting period in accordance with the continuous disclosure requirements of the *Corporations Act 2001*.

Material accounting policies

The Interim Financial Report does not early adopt any Accounting Standards and Interpretations that have been issued or amended but are not yet effective. Except as described in this note, the accounting policies applied in the Interim Financial Report are consistent with those applied as at 31 March 2025 and have been consistently applied by each entity in the Group.

New accounting standards, amendments and interpretations effective after 1 October 2025 not yet adopted

Certain new accounting standards, amendments and interpretations have been published that are not mandatory for the 30 September 2025 reporting period and have not been early adopted in preparing these financial statements.

Most of these are not expected to have a material impact on the financial statement of the Group. Management is in the process of assessing the impact of the new standard AASB 18 which was issued in June 2024 and replaces AASB 101 Presentation of Financial Statements.

Note 2. Segment information

The operating segments presented below reflect how senior management and the Board of Directors (the chief operating decision makers) allocate resources to the segments and review their performance.

The chief operating decision makers examine the performance both from a geographic perspective and by client market segment. OFX regions are based on client location covering APAC, North America and EMEA. These regions have been identified as reportable segments.

Each region serves Corporates, High Value Consumers, and Enterprise clients.

Segments are managed on an underlying basis. Segment EBITDA excludes \$0.3m of one-off items: \$0.8m one off costs net of \$1.1m fair value gain on contingent consideration (1H25: \$3.3m) that are excluded from underlying results.

Segment fee and trading income – half year 30 September 2025 v half year 30 September 2024 (\$'000)

Segment EBITDA – half year 30 September 2025 v half year 30 September 2024 (\$'000)

Following an internal reorganisation, effective 1 October, the Group has revised its reportable segments. The Group's operating segments are now structured around two key verticals: Business to Business (Corporate) and Business to Consumer (Consumer). Future segment reporting will reflect this new structure, which has been designed to help us better serve our clients, and accelerate our growth and transformation to 2.0.

The effective tax rate for the period was a credit (-209.3%) (1H25: 12%) predominantly due to the recognition of non-refundable research and development (R&D) tax offsets and deferred tax benefits arising from deductible temporary differences. These benefits, together with adjustments to prior-year tax provisions and income subject to lower overseas tax rates, resulted in a net income tax benefit despite a small profit before tax.

Note 5. Fair values of assets and liabilities

A financial instrument's categorisation within the valuation hierarchy is based on the lowest level input that is significant to the fair value measurement:

Level	Instruments	Valuation process
Level 1 – Traded in active markets and fair value is based on recent unadjusted quoted prices.	Cash and cash equivalents, amounts due from financial institutions, client liabilities, creditors and receivables.	These instruments are held at amortised cost. Fair values are considered to approximate to their carrying amounts as they are short term in nature.
Level 2 – Not actively traded and fair value is based on valuation techniques which maximise the use of observable market prices.	Over the counter derivatives.	Forward foreign exchange contract valuations are based on observable spot exchange rates and the yield curves of the respective currencies.
Level 3 – Not actively traded and fair value is based on at least one input which is not observable in the market due to illiquidity or complexity.	Contingent consideration.	Fair value measurement is based on expected cash flows, weighted average fair value share price, dividend yield and a probability of achievement of defined performance hurdles.

All derivative financial instruments held by the Group at fair value are categorised within Level 2.

Contingent consideration

The Group has recognised liabilities measured at fair value in relation to contingent consideration arising out of acquisitions made by the Group. The contingent consideration is designated as a financial liability and deemed to be a Level 3 measurement of fair value.

	Contingent consideration \$'000
Balance at 1 April 2024	-
Contingent consideration arising on Paytron acquisition	6,667
Gain included in 'Total net income'	
- Net unrealised change in fair value (gain) / loss	(2,167)
Balance at 31 March 2025	4,500
Balance at 1 April 2025	4,500
Gain included in 'Total net income'	
- Net unrealised change in fair value (gain) / loss	(1,080)
Balance at 30 September 2025	3,420

Contingent consideration is comprised of up to 11.25m deferred performance securities that have been granted to the former owners of Paytron at no cost and may convert to OFX Group fully paid ordinary shares on a one-to-one basis, contingent upon Paytron's successful achievement of defined revenue and client migration targets.

The final number of performance securities that may vest has a fair value of up to a maximum of \$22.3m. There is no minimum amount payable.

OFX Group Limited

The fair value of the contingent consideration determined at the grant date of the securities was \$8.1m and was estimated using a weighted average fair value share price of \$1.98, a dividend yield of 0% and an expected number of performance rights that may vest based on probability of achievement of defined revenue and client migration targets, along with alignment to the existing LTI performance hurdles.

The total fair value is reviewed at each reporting date and would increase or decrease with a respective change in probability assumptions. At 30 September a fair value gain of \$1.1m (1H25: loss \$2.2m) was recognised, based on a share price on this date of \$0.855.

Basis for Conclusion

We conducted our review in accordance with ASRE 2410 *Review of a Financial Report Performed by the Independent Auditor of the Entity*. Our responsibilities are further described in the *Auditor's Responsibilities for the Review of the Financial Report* section of our report.

We are independent of the Group in accordance with the auditor independence requirements of the *Corporations Act 2001* and the ethical requirements of the *Accounting Professional and Ethical Standards Board's APES 110 Code of Ethics for Professional Accountants (including Independence Standards)* (the Code) that are relevant to our audit of the annual financial report in Australia. Auditor's Responsibilities for the Review of the Interim Financial Report

Our responsibility is to express a conclusion on the Interim Financial Report based on our review. ASRE 2410 requires us to conclude whether we have become aware of any matter that makes us believe that the Interim Financial Report does not comply with the *Corporations Act 2001* including giving a true and fair view of the Group's financial position as at 30 September 2025 and its performance for the half-year ended on that date, and complying with *Australian Accounting Standard AASB 134 Interim Financial Reporting* and the *Corporations Regulations 2001*.

A review of an Interim Financial Report consists of making enquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with *Australian Auditing Standards* and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.
