Response to Television Broadcast Early This Week

On Monday, 9 December 2025, a television station broadcast and published a news story in which a director of a company made allegations concerning zinc oxide supplied by ANO in 2024.

ANO rejects the allegations and considers them to be misleading and deceptive. ANO has sought legal advice and will defend its position and reputation rigorously.

The television station did not request comment from ANO regarding the allegations prior to broadcasting the story.

ANO currently exports to more than 40 countries and supplies over 150,000 kg of zinc oxide per annum, which is the equivalent to over 6 million units of sunscreen, to the United States market, with no reported performance issues of its zinc oxide.
