## **Clover Reaffirms Zero Connection to ARA Oil Contamination Identified in Infant Formula Market Recalls**

Clover Corporation Limited (ASX: CLV) reaffirms that product safety and quality are uncompromisable pillars of our business. Comprehensive routine controls, supported by targeted additional testing undertaken in light of recent industry events, confirm that all Clover products are safe, fully compliant with all applicable regulations, and unaffected by the issues currently impacting certain infant formula manufacturers.

Recent recall actions in the market relate exclusively to contamination detected in a batch of ARA (Arachidonic Acid) oil supplied by an unrelated third-party manufacturer. Clover does not source, supply, or have any commercial or technical association with the supplier involved.

Clover is actively supporting customers by:

- Assisting in evaluating alternative formulation pathways
- Providing expert guidance on supply continuity planning
- Working collaboratively to protect product stability, brand trust, and market position

Clover remains fully operational and continues to supply customers without interruption. The Company will continue monitoring developments across the sector and will update the market as appropriate.

## **About Clover Corporation Limited**

Clover Corporation is an Australian company listed on the Australian Stock Exchange (ASX:CLV). Clover evolved from being a research and development, manufacturing and marketing company to one concentrating on forming strategic relationships focused on technology, new product development and commercialisation.

Clover's superior microencapsulation technology enables nutritional oils, such as tuna, fish, algal and fungal oils, to be added to infant formula, foods and beverages. Developed through extensive research and development, our proprietary technologies protect those sensitive oils from oxidation, allowing them to be incorporated into a range of applications. All Clover products reach the highest standards of purity, stability and performance, allowing customers to maximise and deliver nutrition.
